- **Pre-Religious Era** [Wikipedia](#) [Ziopedia](#), [Jewpedia](#) [Kabbalah](#), also spelled Kabala or Cabala (Hebrew: ?????????? literally "receiving"), is a variegated esoteric method, discipline and school of thought. Its definition varies according to the tradition and aims of those following it, 1] from its religious origin as an integral part of Judaism, to Christian, New Age, or Occultist syncretic adaptations. Kabbalah is a set of esoteric teachings meant to explain the relationship between an unchanging, eternal and mysterious Ein Sof (no end) and the mortal and finite universe (his creation). ... - **30 A.D.** [History of the Money Changers](#) **By Andrew Hitchcock**, Jesus Christ in the last year of his life uses physical force to throw the money changers out of the temple. This was the only time during the the life of his ministry in which he used physical force against anyone. When Jews came to Jerusalem to pay their Temple tax, they could only pay it with a special coin, the half-shekel. This was a half-ounce of pure silver, about the size of a quarter. It was the only coin at that time which was pure silver and of assured weight, without the image of a pagan Emperor, and therefore to the Jews it was the only coin acceptable to God. [more](#) and [Wikipedia](#) *Cleansing of the Temple* *In this episode Jesus and his disciples travel to Jerusalem for Passover, where he expels the money changers from the Temple, accusing them of turning the Temple to a den of thieves through their commercial activities.* 1] 2] *In the Gospel of John Jesus refers to the Temple as “my Father’s house” thus in some views making a claim to being the Son of God.* 3] and [Wikipedia](#) *Money Changers* *A money changer is a person who exchanges the coins or currency of one country for that of another. origin of modern banking in Europe. ... As the size and operations of money changers grew they began to provide a lending facility, hiding the interest rate in foreign exchange rate transaction. Later the Knights Templar provided this service to pilgrims traveling to and from the Holy Land. ... The Rothschilds were money changers.

These beliefs have heavily influenced the Western esoteric tradition and were considered greatly important during both the Renaissance and the Reformation. and Mongols have been equated with the Scythians, the Magog and the Turkic peoples. Based on Chinese historical texts the ancestry of the Mongol peoples can be traced back to the Donghu, a nomadic confederation occupying eastern Mongolia and Manchuria. The identity of the Xiongnu is still debated today. Although some scholars maintain that they were proto-Mongols, the fact that Chinese histories trace certain Turkic tribes from the Xiongnu complicates the issue. The Donghu, however, can be much more easily labeled proto-Mongol since the Chinese histories trace all the subsequent Mongolic tribes and kingdoms (Xianbei and Wuhuan peoples) from them, ...
- **514** [Bibliotec Pleyades](#) While the militaristic Roman Empire was collapsing, Pope Symmachus created the Vatican Palace in 514 as the seat of the "universal religion" called Catholicism. Catholicism itself was created about 150 years before that by Emperor Constantine I, using the first Council of Nicaea in 325, to control the political and spiritual uprisings among various regions, tribes and slave groups. Thereby making Constantine I the first in a long series of Roman Emperors (or Popes) who explicitly wanted to completely rule over both the spiritual and political realm. ... - **8th Century** [Care2](#) Jacob Rothschild, the current head of the Rothschild dynasty, has intermarried with the [Sinclair family](#), forging an important alliance between the head family of the Illuminati, and the supposed descendants of the [Grail family](#). As has been popularized recently by Dan Brown in the Da Vinci Code, or before him by the Holy Blood, Holy Grail, the Stuarts of Scotland are supposedly descended from King Arthur and Jesus Christ. These families are of course not descended from Jesus. The idea is preposterous. But they are related to the Holy Grail, and they are not Christians, but Kabbalists. In reality, they, like all the aristocratic bloodlines that form the core of the Illuminati, are descended from Guillaume de Gellone ([Wikipedia](#)) of the eighth century AD. Guillaume's father was Rabbi Makhir, among the Exilarchs who ruled the Jews in Baghdad, who was sent West after a dispute over the successorship. In France, he took the name Theodoric, married Alda, the aunt of Charlemagne, and was appointed "King of the Jews" in the region of the Languedoc, with his capital the city of Narbonne. ... Narbonne then became the heartland of the Medieval Kabbalah. The Kabbalists of Narbonne seem to have been responsible for instigating the Crusades, in order to retrieve sacred texts that had been buried there, but which had been inaccessible because of first the rule of the Romans, and then the Muslims. Once Jerusalem was conquered, a Kabbalistic order of knights known as the Templars conducted excavations, and discovered the text of the Sepher ha Bahir, which revived the lost mystical tradition, and set off the cultural revolution of the Medieval Kabbalah. - **9th Century (740-830?)** [Wikipedia](#) [Khazars](#) Conversion of the royalty and aristocracy to Judaism ... Jewish communities had existed in the Greek cities of the Black Sea coast since late classical times. Chersonesos, Sudak, Kerch and other Crimean cities sustained Jewish communities, as did Gorgippia, and Samkarsh / Tmutarakan was said to have had a Jewish majority as early as the 670s. Jews fled from Byzantium to Khazaria as a consequence of persecution under Heraclius, Justinian II, Leo III, and Romanos I. These were joined by other Jews fleeing from Sassanid Persia (particularly during the Mazdak revolts), and, later, the Islamic world. Jewish merchants such as the Radhanites regularly traded in Khazar territory, and may have wielded significant economic and political influence. Though their origins and history are somewhat unclear, the Mountain Jews also lived in or near Khazar territory and may have been allied with the [Khazars](#), or subject to them; it is conceivable that they, too, played a role in Khazar conversion. At some point in the last decades of the 8th century or the early 9th century, **the Khazar royalty and nobility converted to Judaism**, and part of the general population may have followed. 40] The extent of the conversion is debated. The 10th century Persian historian Ibn al-Faqih reported that "all the Khazars are Jews." Notwithstanding this statement, most scholars believe that only the upper classes converted to Judaism; 41] there is some support for this in contemporary Muslim texts. 42] and see Arthur Koestler's [The Thirteenth Tribe](#). and [Wikipedia](#) *Concerning male-line ancestry, several Y-DNA studies have tested the hypothesis of Khazar ancestry amongst Ashkenazim. The ultimate victory for the Rothschilds would be a war between China/Russia vs. The US where Rothchild companies supply both sides with weapons and materials, then declaring a 'new world order' as a solution to the mess they created through debt abuse; all consistent with the history of the last 250 years. Jews fled Rome and Greece to Khazaria to avoid forced conversion to Christianity. They adopted Islam when forced, repudiating it when safe. - **1000 ... EIR** it is no small irony that the Darbyism preached by Dolphin, Missler, and the other central figures in the American Jerusalem Temple Foundation, is deeply anti-Semitic. At the core of the Gnostic "dispensational premillennarianism," advocated by Nineteenth-Century Anglican clergyman John Nelson Darby, is the belief that the extermination of the Jews, in a final battle of Armageddon, brought on by the rebuilding of Solomon's Temple, is the Biblical precondition for the second coming of the Messiah and the Rapture. Pastor Chuck Smith, Dolphin's mentor at the Calvary Baptist Church, when asked by EIR whether he had any compunctions about unleashing a holy war that would lead to the possible extermination of millions of Jews and Muslims, replied, "Frankly, no, because it is all part of Biblical prophesy."

- **1000 Scribd** 11th Century: Founding of the order of the Knights **Templar** to protect the Holy Land (especially Jerusalem) from the Muslims. The name of the group is from the Temple Mount in Jerusalem where Solomon's temple once stood and where the Christian knights established their first camp during the Crusades. The Holy Land was wrestled from the Muslims [Wikipedia](#) *The Knights Templar trace their origin back to shortly after the First Crusade. Around 1119, a French nobleman from the Champagne region, Hugues de Payens, collected eight of his knight relatives including Godfrey de Saint-Omer, and began the Order, their stated mission to protect pilgrims on their journey to visit The Holy Places. They approached King Baldwin II of Jerusalem, who allowed them to set up headquarters on the southeastern side of the Temple Mount, inside the Al Aqsa Mosque. Since the Temple Mount was the site of biblical King Solomon's Temple the Order took the name "The Knights of the Temple of King Solomon", which later became abbreviated to "Knights Templar". The original order consisted of Hugues de Payens and eight knights, two of whom were brothers and all of whom were his relatives by either blood or marriage: Godfrey de Saint-Omer, Payen de Montdidier, Archambaud de St. Agnan, Andre de Montbard, Geoffrey Bison, and two men recorded only by the names of Rossal and Gondamer. The ninth knight remains unknown, although some have speculated that it was Count Hugh of Champagne himself—despite the Count returning to France in 1116 and documentary evidence showing that he joined the Knights on his third visit to the Holy Land in 1125.*

- **1024 History of the Money Changers** The money changers had control of Medieval England's money supply and at this time were generally known as goldsmiths. Paper money started out and this was simply a receipt you would get after depositing gold with a goldsmith, in their safe rooms or vaults. This paper started being traded as it was far more convenient than carrying round a lot of heavy gold and silver coins. Over time, to simplify the process, the receipts were made to the bearer, rather than to the individual depositor, making it readily transferable without the need for a signature. This, also, broke the tie to any identifiable deposit of gold. Economists continually try and sell the public the idea that recessions or depressions are a natural part of what they call the "business cycle". This timeline below will prove that is simply not the case. Recessions and depressions only occur because the Central Bankers manipulate the money supply, to ensure more and more is in their hands and less and less is in the hands of the people. Central Bankers developed out of money changers and it is with these people we pick the story up in 48 B.C. below. [more](#) and [Ludwig Von Mises Institute](#) *Both the Federal Reserve (Fed) and the European Central Bank (ECB) are owners of the printing press. They produce base money. On top of the base-money production, the fractional-reserve-banking system can produce money out of thin air. Both central banks produce money in order to finance their respective governments. As a result of their money production, prices will be higher than they would have been otherwise. All money users indirectly pay for the government deficits through a reduction in purchasing power and the reduced quality of their money.*

- **1100** [History of the Money Changers](#) King Henry I succeeds King William II to the throne of England. During his reign he decided to take the power the money changers had over the people, and he did this by creating a completely new form of money that took the form of a stick! This stick was called, a "tally stick," and ended up being the longest lasting form of currency, lasting 726 years until 1826 (even though other currencies came and went in that same period and ran alongside the talley sticks). [more](#) and [Wikipedia](#) *A tally (or tally stick) was an ancient memory aid device to record and document numbers, quantities, or even messages. Tally sticks first appear as notches carved on animal bones, in the Upper Paleolithic. A notable example is the Ishango Bone. Historical reference is made by Pliny the Elder (AD 23–79) about the best wood to use for tallies and Marco Polo (1254–1324) who mentions the use of the tally in China. NewsFollowup.com*

- **1509** [History of the Money Changers](#) King Henry VIII succeeds King Henry VII to the throne in England. During his reign he relaxed the laws regarding usury, and the money changers did not waste any time in re-asserting themselves over the population. They quickly made their gold and silver coin system plentiful again. It is interesting to note that under King Henry VIII the Church of England separated from Roman Catholicism, whose Church law prevented the charging of interest on money. [Investopedia](#) *Usury Definition of 'Usury' The act of lending money at an interest rate that is considered unreasonably high or that is higher than the rate permitted by law. Usury first became common in England under King Henry VIII, and originally pertained to charging any amount of interest on loaned funds. Over time it evolved to only mean charging excess interest, but in some religions and parts of the world charging any interest is considered illegal. The empire embarked on a retrogressive movement which was to continue for more than two centuries. The decline gained momentum towards the end of the 17th century, and deepened in the 18th and 19th centuries. The feudal system, with the sipahis -- the feudal landlords -- as its prop was gradually deteriorating. As the wars of expansion came to an end and spoils diminished, the landlords turned with increasing interest to the land, and tried to recoup the loss of spoils by merciless exploitation of the peasants. This naturally led to a sharp drop in agricultural production and ushered in the whole crisis of the empire."

During 1996, while Greenberg was deputy chairman of the Council on Foreign Relations (CFR), he chaired the CFR task force on intelligence, which published "Making Intelligence Smarter: The future of U.S. Intelligence." Kroll Associates, a security consultant firm, which was renamed to Kroll Inc. in August 2001, started in New York City in 1972. In December 1997, Kroll merged with armored car manufacturer O'Gara-Hess & Eisenhardt to form The Kroll-O'Gara Company. O'Gara is responsible for the security of all US- Presidents since 1945. In 1993, Maurice Greenberg's American International Group (AIG), became co-owner of the "private spy agency", Kroll Associates, as a result of rescuing Kroll from bankruptcy with a cash infusion. Kroll was notorious during the 1980s as the "CIA of Wall Street" due to the prevalence of former CIA, FBI, Scotland Yard, British secret service and British Special Air Service men Kroll employed for corporate espionage in takeover bids, as well as for destabilization of foreign nations. Greenberg has used his connections to covert intelligence, supranational institutions, private bankers and speculators, and his huge global cash inflow, to shape a unique personal empire. Since 1997, Frank G. Wisner, Jr., has been a board member of Kroll , and is currently Greenberg's Deputy Chairman for External Affairs. It discuss more specifically the modern Chinese History (from Chiang Kai-shek to the depreciation in the long term trend of U.S. dollar) seen from a Currency War perspective. It pushes towards an isolationist financial policy. According to the book, the western countries in general and the US in particular are controlled by a clique of international bankers, which use currency manipulation (hence the title) to gain wealth by first loaning money in USD to developing nations and then shorting their currency. The Japanese Lost decade, the 1997 Asian Financial Crisis, the Latin American financial crisis and others are attributed to this cause. Located in the private City of London the counterfeiting operation opened its doors in 1694 as an easy way for the Government to create finance. It was only later that the Rothschilds infiltrated the institution. The initial idea came from Scottish money changer William Paterson who some researchers claim was an initiate in to the Order of the Orange, a Merovingian Bloodline secret society developed by Dutch Freemason William of Orange.

- **1698** [History of the Money Changers](#) Following four years of the Bank of England, their plan to control the money supply had come on in leaps and bounds. They had flooded the country with so much money that the Government debt to the Bank had grown from the initial £1,250,000, to £16,000,000, in only four years. That's an increase of 1,280%. Why do they do it? Simple, if the money in circulation in a country is £5,000,000, and a central bank is set up and prints another £15,000,000, stage one of the plan, sends it out into the economy through loans etc, than this will reduce the value of the initial £5,000,000 in circulation before the bank was formed. This is because the initial £5,000,000 is now only 25% of the economy. NewsFollowup.com
- **1701** [MaskofZion](#) .. the Historical Research Department of the Nation of Islam, based 100% on Jewish (oftentimes rabbinical) and philo-Semitic sources, unequivocally demonstrates that the torturous, inhuman and genocidal Transatlantic Slave Trade was an endeavor dominated by Jews, going back to the very beginnings of it in Brazil and Surinam. Despite a systematic smear campaign still going on to this day, the Jewish-Zionist Power Configuration has failed miserably in refuting the scholarly volumes because of the meticulous sourcing. What makes this revelation all the more intriguing, as well as disturbing, is that this hegemony wasn't only material and physical, with Jews operating as both slave owners and slave traders; it was also ideological, with Jews passing down their dehumanizing religious beliefs to their Anglo partners in human misery. and [Wikipedia](#) minimizes Jewish slavery of course

WMR has pored through the CIA files and a complicated picture emerges of America's and Israel's top intelligence agencies, in cahoots with Saudi Arabia, establishing financial links and carve out intelligence programs to provide manpower and financial support to Bin Laden and his allies in Afghanistan. It was these very elements that later created the so-called "Al Qaeda," which the late British Foreign Secretary Robin Cook described as nothing more than a "database" of CIA front organizations, financial supporters, and field operatives. However, one component omitted by Cook in the Al Qaeda construct is the Israeli participation. ... Thanks largely to the CIA station chief in Riyadh in 1986-87, millions of dollars from the Saudi government, particularly then-deputy Prime Minister Prince Abdullah, now King Abdullah, and wealthy Saudi businessmen were funneled to the most radical leader of the Afghan rebels, Abdul Rasul Sayyaf, for whom militant southern Philippines Muslim rebels named their organization, the Abu Sayyaf group. ... Accounting for only two percent of the mujaheddin guerrillas in the field in Afghanistan, Sayyaf's group began receiving hundreds of millions of dollars and thousands of recruits from other countries, more than other six major mujaheddin groups fighting the Soviets. The tilt to Sayyaf was a result of the intercession of Pakistan's Inter-Services Intelligence (ISI), Saudi intelligence, the CIA, and Mossad. Another key Saudi intermediary was Saudi Prince Bandar bin Sultan, who the Bush family has dubbed "Bandar Bush" because of his close links to the Bushes, and who was the Saudi ambassador to the United States on 9/11. ... The Reagan White House's intermediary with Sayyaf's group during 1986 and 1987 was Michael Pillsbury, the Assistant Undersecretary of Defense for Policy who continues to serve as a Pentagon consultant. Eventually, with the urging of Salem Bin Laden, and his older brother Osama, the CIA gave the green light for Sayyaf to bring into Afghanistan a dedicated group of Arab fighters, recruited from countries such as Egypt, Syria, Yemen, Saudi Arabia, and other Arab countries. Some of the Syrian volunteers were refugee survivors of Syrian President Hafez Assad's massacre of Sunni Muslims in Hama in 1982. Ironically, the first Arab training camp was established in eastern Afghanistan near the Pakistani border and was known as Maasada, or the "Lion's Den." ◦ **WMR on the 9/11 'inside job'** ... I don't believe the attacks were planned by the FBI. I believe **they were an operation carried out by Mossad and Saudi intelligence**, with which Mossad has had and continues to have a close relationship since the days of the Safari Club of western and Middle East intelligence services combining their operations, and elements of the CIA. Cossiga, Gul, parliament members in Germany, Britain, and Japan, the late British Foreign Secretary Robin Cook, and others all understood this was an inside job that also involved a handful of people at the top of the Bush administration, including Dick Cheney, Donald Rumsfeld,

A.B.Krongard of the CIA, and Rudolph Giuliani see **Giuliani's connections to Rothschild**, as well. and ... **The Sauds and the Bin Ladens were close allies of the Bush family**, which had everything to gain in the 9-11 attacks. - **1757** [History of the Money Changers](#) [Benjamin Franklin](#) travels to England and would spend the next 18 years of his life there until just before the start of the American Revolution. 1760 Mayer Amschel Bauer changes him name to Mayer Amschel Rothschild and sets up the, House Of Rothschild, and soon learns that if he loans out money to Governments and Royalty then this is far more profitable than loaning to individuals. This is because the loans made are bigger and backed by their nations' taxes. He trains his five sons in the art of money creation. 1764 Benjamin Franklin is asked by officials of the Bank of England to explain the prosperity of the colonies in America. He replies, "That is simple. In the Colonies we issue our own money. It is called Colonial

Scrip. We issue it in proper proportion to the demands of trade and industry to make the products pass easily from the producers to the consumers. In this manner creating for ourselves our own paper money, we control its purchasing power, and we have no interest to pay no one." ... As a result of Franklin's statement, the British Parliament hurriedly passed the Currency Act of 1764. This prohibited colonial officials from issuing their own money and ordered them to pay all future taxes in gold or silver coins. Referring to after this act was passed, Franklin would state the following in his autobiography, ... "In one year, the conditions were so reversed that the era of prosperity ended, and a depression set in, to such an extent that the streets of the colonies were filled with the unemployed...The colonies would gladly have borne the little tax on tea and other matters had it not been that England took away from the colonies their money which created unemployment and dissatisfaction. ... The viability of the colonists to get power to issue their own money permanently out of the hands of King George III and the international bankers was the prime reason for the revolutionary war." ... Control of America's money system will change hands 8 times since 1764. [XAT History of Money](#) The idea of issuing money as Franklin put it "in proper proportion to the demands of trade and industry" and not charging any interest, was not causing any problems or inflation. - [Safehaven](#) ABSTRACT: Prior to industrialization the Kondratiev cycle reflected biological generations. It's economic effect was at least partially induced by the **generational war cycle**, with its impact on government finances. Shorter economic cycles did not reflect the longer *NewsFollowup.com* K-cycle, but rather operated on their own schedule, possibly also generational in nature. Hence financial panics followed a real estate cycle of about 18 years, denoted as the Kuznets cycle. Slumps occurring in between the Kuznets cycle defined a half-cycle that was of the same length as the business cycles first identified by Clement Juglar. Ordinary business cycles were of apparently random length up to a full Juglar. With the coming of industrialization, the ordinary business cycle became associated with a new phenomenon, the inventory cycle, also called the Kitchen cycle. It decreased to a lower, more uniform length of about 40 months. The Kuznets and Kondratiev cycles continued on more or less as before. From these changes induced by industrialization, the SMECT structure emerged, in which sixteen 40 month Kitchen cycles "fit" into a standard Kondratiev cycle and the K-cycle is subdivided into 1/2, 1/4 and 1/8-length sub-cycles. Standing aside from this was the old Kuznets real-estate cycle. After 1933, the Kondratiev cycle remained, but its length gradually increased to about 72 years today. The Kuznets real estate cycle continued, but was much weaker for about 40 years until

- **1781** [History of the Money Changers](#) Towards the end of the American Revolution the Continental Congress were desperate for money, so they allowed Robert Morris, their Financial Superintendent, to open a **privately owned central bank**, in the hope this would sort out the money problem. Morris was a wealthy man who had grown wealthier during the revolution by trading in war materials. This first central bank in America was called the Bank of North America, which was set up with a four year charter, and was closely modeled after the Bank of England. It was allowed to practice the fraudulent system of fractional reserve banking, so it could create money it didn't have, then charge interest on it. ... The bank's charter called for private investors to put up \$400,000 of initial capital, which Morris found himself unable to raise. Nevertheless he unashamedly used his political influence to have gold deposited in the bank, which had been loaned to America by France. Morris then loaned the money he needed to buy this bank from this deposit of gold that belonged to the government, or rather the American people. ... This Bank of North America, again deceptively named so the common people would believe it was under the control of the government, was given a monopoly over the national currency. [Wikipedia Bank of North America](#) .. Robert Morris deposited large quantities of gold and silver coin and bills of exchange obtained through loans from the Netherlands and France. He then issued new paper currency backed by this supply. He also managed to meet the interest obligations on the debt which he estimated to be about thirty million dollars. Accordingly, Thomas Goddard has called him "the father of the system of credit, and paper circulation, in the United States." Although able to operate nationwide, the Bank of North America primarily operated in three states, and in 1785 it lost its central bank status in Pennsylvania due to objections of "alarming foreign influence and fictitious credit", favoritism to foreigners and unfair competition against less corrupt state banks issuing their own bills of credit, such that Pennsylvania's legislature repealed its state charter on 13 September 1785. After a change of party in Pennsylvania's legislature in 1786 the Bank of North America was re-chartered within the Commonwealth in 1787, but under more restrictive conditions that would hinder it from performing its intended role as a central bank. ^{4]}

[more](#) He advised how he had been a high degree mason in the Scottish Rite of Freemasonry, and had been invited by Adam Weishaupt to Europe, where he had been given a revised copy of Weishaupt's conspiracy. However, although he pretended to go along with it, Professor Robison did not agree with it and therefore published his aforementioned book. The book included details of the Bavarian government's investigation into the Illuminati and the French Revolution.

- [Wikipedia](#) **John Robison** Towards the end of his life, he became an enthusiastic conspiracy theorist, publishing *Proofs of a Conspiracy ...* in 1797, alleging clandestine intrigue by the Illuminati and Freemasons (the work's full title was *Proofs of a Conspiracy against all the Religions and Governments of Europe*, carried on in the secret meetings of Freemasons, Illuminati and Reading Societies). The secret agent monk, Alexander Horn provided much of the material for Robison's allegations. 3] French priest Abbé Barruel independently developed similar views that the Illuminati had infiltrated Continental Freemasonry, leading to the excesses of the French Revolution. In 1798, the Reverend G. W. Snyder sent Robison's book to George Washington for his thoughts on the subject in which he replied to him in his Letter to the Reverend G. W. Snyder (24 October 1798). Modern conspiracy theorists like Nesta Webster and William Guy Carr believe that Robison's book described what the Illuminati may have started was the template for the subversion of otherwise benign organizations by radical groups through the 19th and 20th centuries. Spiritual Counterfeits Project editor Tal Brooke has compared the views of *Proofs of a Conspiracy* with those found in Carroll Quigley's *Tragedy and Hope* (Macmillan, 1966). Brooke suggests that the New World Order, which Robison believed Adam Weishaupt (founder of the Illuminati) had in part accomplished through the infiltration of Freemasonry, will now be completed by those holding sway over the international banking system (e.g., by means of the Rothschilds' banks, the U.S. Federal Reserve, the International Monetary Fund, and the World Bank). 4]

- **1812:** Backed by Rothschild money, and Nathan Mayer Rothschild's orders, the British declare war on the United States. The Rothschilds plan was to cause the United States to build up such a debt in fighting this war that they would have to surrender to the Rothschilds and allow the charter for the Rothschild owned First Bank of the United States to be renewed. Mayer Amschel Rothschild dies. In his will he lays out specific laws that the House of Rothschild were to follow: all key positions in the family business were only to be held by family members; only male members of the family were allowed to participate in the family business, this included a reported sixth secret bastard son (It is important to note that Mayer Amschel Rothschild also has five daughters, so today the spread of the Rothschild [Zionist](#) dynasty without the Rothschild name is far and wide, and Jews believe the mixed offspring of a Jewish mother is solely Jewish); the family was to intermarry with it's first and second cousins to preserve the family fortune (of the 18 marriages by Mayer Amschel Rothschild's grandchildren, 16 were between first cousins - a practice known today as inbreeding); no public inventory of his estate was to be published; no legal action was to be taken with regard to the value of the inheritance; the eldest son of the eldest son was to become the head of the family (this condition could only be overturned when the majority of the family agreed otherwise). This was straightaway the case and Nathan Mayer Rothschild was elected head of the family following his father, Mayer Amschel Rothschild's death. Jacob (James) Mayer Rothschild goes to Paris, France to set up the bank, de Rothschild Frères. Nathaniel de Rothschild, the son in law of Jacob (James) Mayer Rothschild, born.

The facts are somewhat less romantic, and more businesslike." This last line indicates the money was never returned by Rothschild to Prince William IX of Hesse-Hanau. The encyclopaedia goes on to state, "Nathan Mayer Rothschild invested this \$3,000,000 in, gold from the East India Company knowing that it would be needed for Wellington's peninsula campaign."

The Rothschilds love wars because they are massive generators of risk free debt. This is because they are guaranteed by the government of a country, and therefore the efforts of the population of that country, and it doesn't matter if that country loses the war because the loans are given on the guarantee that the victor will honour the debts of the vanquished. ... Whilst the Rothschilds are funding both sides in this war, they use the banks they have spread out across Europe to give them the opportunity to set up an unrivalled postal service network of secret routes and fast couriers. The post these couriers carried was to be opened up by these couriers and their details given to the Rothschilds so they always were one step ahead of current events. The United States government would once again supposedly own 20% of the shares of the bank. Their share was again paid up front into the bank and thanks to fraudulent fractional reserve lending, this was transformed into loans to the private investors who once again purchased the remaining 80% of the shares. Just as before the names of these investors was kept a secret.

- [1832 History of the Money Changers](#) The Second Bank of the United States, ask Congress to pass a renewal of the bank's charter, four years early. Congress complied and sent the bill to President Jackson for signing. President Jackson vetoed this bill and in his veto message he stated the following, "It is not our own citizens only who are to receive the bounty of our Government. More than eight millions of the stock of the Bank are held by foreigners...Is there no danger to our liberty and independence in a bank that in its nature has so little to bind it to our country? ... Controlling our currency, receiving our public moneys, and holding thousands of our citizens in dependence ...would be more formidable and dangerous than a military power of the enemy. If government would confine itself to equal protection, and, as Heaven does its rains, shower the favor alike on the high and the low, the rich and the poor, it would be an unqualified blessing. ... In the act before me there seems to be wide and unnecessary departure from these just principles." ... In July, Congress was unable to override President Jackson's veto. President Jackson then stood for re-election and for the first time in American history he took his argument directly to the people by taking his re-election campaign on the road. His campaign slogan was, "Jackson And No Bank!" ... Even though the bankers poured over \$3,000,000 into President Jackson's opponent, the Republican, Senator Henry Clays' campaign, President Jackson was re-elected by a landslide in November. President Jackson knew the battle was only beginning however, and following his victory he stated, "The hydra of corruption is only scotched, not dead!"

President Jackson's previous two Secretaries of State for the Treasury, William J. Duane and Louis McLane had both refused to comply with President Jackson's request and were fired as a result. However the head of the, Second Bank of the United States, Nicholas Biddle, used his influence to get the Senate to reject Roger B. Taney's nomination and even threatened to cause a depression if the Bank was not re-chartered. Biddle stated, ... "This worthy President thinks that because he has scalped Indians and imprisoned judges, he is to have his way with the Bank. He is mistaken." ... Biddle then went on to brazenly admit that the bank was intending to make money scarce in order to force the hand of Congress into re-chartering the bank. He stated, ... "Nothing but widespread suffering will produce any effect on Congress...Our only safety is pursuing a steady course of firm restriction - and I have no doubt that such a course will ultimately lead to restoration of the currency and re-charter of the Bank." ... What Biddle has done with that statement is prove to the world what central banks were really about. He made good on his word, and the Second Bank of the United States, sharply contracted the money supply by calling in old loans and refusing to issue new ones. Naturally a financial panic ensued, followed by America being plunged into a deep depression. ... Biddle then unashamedly blamed President Jackson for the crash, claiming that it was Jackson's withdrawal of federal funds that had caused it. This crash plunged wages and prices, unemployment soared along with business bankruptcies. The United States was in uproar and newspaper editors blasted the President in editorials.

It was the first time a President had ever been censured by Congress and Jackson stated of the Bank, ... "You are a den of thieves vipers, and I intend to rout you out, and by the Eternal God, I will rout you out." ... However, Pennsylvania Governor, George Wolf, came out in support of President Jackson and strongly criticized the Bank. This, coupled with the fact that Nicholas Biddle had been caught boasting in public about the bank's plan to crash the American economy, caused a shift in opinion of President Jackson's action. ... In a complete about turn on April 4, the House of Representatives voted 134 to 82

against re-chartering the bank. This was followed by another strong vote which established a special committee to investigate whether the Bank had caused the crash. ... However, when the investigating committee arrived at the bank's door in Philadelphia with a subpoena authorizing them to inspect the books, Nicholas Biddle refused to give them up, or allow inspection of correspondence with Congressmen relating to their personal loans and advancements he had made to them. He also refused to testify before the committee back in Washington.

- **1836: [IAmTheWitness](#)** Following his years of fighting against the Rothschilds and their central bank in America, President Andrew Jackson finally succeeds in throwing the Rothschilds central bank out of America, when the bank's charter is not renewed. It would not be until 1913 that the Rothschilds would be able to set up their third central bank in America, the Federal Reserve, and to ensure no mistakes are made, this time they will put one of their own bloodline, Jacob Schiff, in charge of the project. Nathan Mayer Rothschild dies and the control of his bank, N. M. Rothschild & Sons is passed on to his younger brother, James Mayer Rothschild.

Nicholas Biddle was later arrested and charged with fraud. He was tried and acquitted but died in 1844 still battling civil suits. 1838 On January 8th President Jackson pays off the final installment of the national debt, which had been necessitated by allowing the banks to issue currency for government bonds, rather than simply issuing treasury notes without such debt. He was the only President to ever pay off the debt. On January 30th an assassin called Richard Lawrence tried to shoot President Jackson, but both pistols misfired. Lawrence was later found not guilty by reason of insanity. However, after his release he openly bragged that powerful people in Europe had put him up to the task and promised to protect him if he were caught. ... When asked what his most important accomplishment had been in life, President Jackson stated without hesitation, ... "I killed the Bank!" It would take the money changers 75 years to establish the next central bank, the Federal Reserve. This time they would take no chances and use one of their own, Jacob Schiff, from the Rothschild bloodline, to undertake this.

- **1861** [History of the Money Changers](#) One month after the inauguration of President Abraham Lincoln, the American Civil War got underway at Fort Sumter, South Carolina, after South Carolina left the Union. Slavery has always been cited as the cause of the war but this was simply not the case, as President Lincoln himself stated, "I have no purpose directly or indirectly to interfere with the institution of slavery in the state where it now exists. I believe I have no lawful right to do so, and I have no inclination to do so...My paramount objective is to save the Union and it is not either to save or destroy slavery. If I could save the Union without freeing any slave, I would do it." ... The real reason for the war is that the Southern States were in an dire economic situation due to the actions of the Northern States. Northern industrialists had used trade tariffs to prevent the Southern States from buying cheaper European goods. Europe subsequently retaliated by stopping cotton imports from the South. Thus the South were being forced to pay more for goods whilst having their income slashed. ... This is when the money changers saw the opportunity to divide and conquer America by plunging it into Civil War. This is confirmed by Otto Von Bismarck when he was Chancellor of Germany (1871 - 1890), who stated, "The division of the United States into federations of equal force was decided long before the Civil War by the high financial powers of Europe, these bankers were afraid that the United States if they remained as one block and as one nation, would attain economic and financial independence which would upset their financial domination over the world." ... Only months after these first shots in South Carolina, the Central bankers loaned, Napoleon III of France (the Napoleon of the battle of Waterloo's nephew), 210 million francs to seize Mexico and then station troops along the Southern border of the United States, by taking advantage of the American Civil War to return Mexico to colonial rule. ... This was in violation of the, "Monroe Doctrine," which was issued by President James Monroe during his seventh annual State of the Union address to Congress, in 1823. This doctrine proclaimed the United States' opinion that European powers should no longer colonize the Americas or interfere with the affairs of sovereign nations located in the Americas, such as the United States, Mexico, and others. ... In return, the United States planned to stay neutral in wars between European powers and in wars between a European power and its colonies. However, if these latter type of wars were to occur in the Americas, the U.S. would view such action as hostile toward itself. Whilst the French were breaching the, Monroe Doctrine in Mexico, the British followed suit by moving 11,000 troops into Canada and positioning them along America's Northern border. President Lincoln knew he was in trouble, so he went with his Secretary To The Treasury, Salomon P. Chase, to New York to apply for the loans necessary to fund America's defense. ... The money changers had engineered the war to make the Union fail, and were not about to save it now, so they offered loans at 24% to 36% interest. President Lincoln declined this as they knew he would and returned to Washington, where he sent for Colonel Dick Taylor of Chicago, who he put in charge of the problem of how he should finance the war. ... During one meeting President Lincoln asked Colonel Taylor what proposals he had come up with to finance the war. Colonel Taylor stated, "Why Lincoln, that is easy, just get Congress to pass a bill authorizing the printing of full legal tender treasury notes...and pay your soldiers with them and go ahead and win your war with them also." ... President Lincoln asked Colonel Taylor if the people of the United States would accept the notes, Colonel Taylor said, "The people or anyone else will not have any choice in the matter, if you make them full legal tender. They will have the full sanction of the government and be just as good as any money, as Congress is given that express right by the Constitution."

- **1863 [History of the Money Changers](#)** The bankers struck back. With President Lincoln needing further congressional authority to issue more Greenbacks, Lincoln was forced into allowing the bankers to push their, "National Banking Act," through Congress. The most important part of this Act was that from now on, the entire United States money supply would be created out of debt by the National Banks buying United States Government Bonds and issuing them for reserves for banknotes. On top of this monopoly, the National Banks were allowed to operate under a virtual tax free status. This banking scam is best explained by historian, John Kenneth Galbraith, who stated, "In numerous years following the war, the Federal Government ran a heavy surplus. It could not however pay off its debt, retire its securities, because to do so meant there would be no bonds to back the national bank notes. To pay off the debt was to destroy the money supply." ... Later this year, Tsar Alexander II gave President Lincoln some unexpected help. The Tsar issued orders that if either England or France actively intervened in the American Civil War, and help the South, Russia would consider such action a declaration of war. To show that he wasn't messing about, he sent part of his Pacific Fleet to port in San Francisco. ... This wasn't because the Tsar was benevolent towards America, instead he was very clever. He, like Otto Von Bismarck in Germany, could clearly see what the money changers were up to, indeed he had already refused to let them set up a Central Bank in Russia. He understood if America was to come under the control of Britain or France, then America would be under the control of Central Bankers once again, and such an expansion of the bankers empire, would mean they would eventually threaten Russia. see also

After the appearance of the Russian ships in American waters the Rothschilds cancelled contracts to build more blockade running boats. The Czar won the day for the North as Russia promised to go to war with any nation that attacked America. One of the ships anchored in New York Harbor was the Russian frigate Osliaba. Harpers Weekly carried drawings of the ship in one of its 1863 issues. Civil War photographer Mathew Brady took numerous photographs of the Russian ships. And on October 5, 1863 the city of Baltimore issued a proclamation thanking the Czar for his assistance. In 1867 when the war ended and Lincoln was dead, President Andrew Johnson received a bill in the amount of \$7.2 million for the rental of the Russian fleet. The Constitution forbids giving tax dollars to any foreign nation for any reason whatever except for the purchase of land. Johnson directed Secretary of State William Seward to purchase Alaska from the Russians for \$7.2 million. These details of 'Seward's Folly' have been excised from the historical record. With international cotton prices soaring as a result of the US Civil War (which reduced supply), cotton profits enabled Lopez to build up the largest army on the South American continent. Determined to control the cotton-producing Plata basin in its entirety, Paraguay invaded Brazil in 1864, winning a series of early victories. Despite mutual tensions, Argentina and Uruguay quickly formed an alliance with Brazil. Lopez's ambitions clashed with British industry's own expansionist designs. Fearing that a victorious Paraguay would rob them of a controlling stake

He would later die of his injuries. Subsequent allegations that international bankers were responsible for President Lincoln's assassination, would be made in the Canadian House of Commons, nearly 70 years later in 1934. The person who revealed this was a Canadian Attorney, Gerald G. McGeer. He had obtained evidence deleted from the public record provided to him by Secret Service Agents at the trial of John Wilkes Booth, after Booth's death. McGeer stated that it showed that John Wilkes Booth was a mercenary working for the international bankers. His speech would be reported in an article in the Vancouver Sun, dated, 2nd May 1934, which stated, "Abraham Lincoln, the murdered emancipator of the slaves, was assassinated through the machinations of a group representative of the International Bankers, who feared the United States President's National Credit ambitions. There was only one group in the world at that time who had any reason to desire the death of Lincoln. They were the men opposed to his national currency program and who had fought him throughout the whole Civil War on his policy of Greenback currency." Gerald G. McGeer also stated that Lincoln's assassination was not purely because the International Bankers wanted to re-establish a central bank in America, but also because they wanted to base America's currency on gold, which they of course controlled. They wanted to put America on a Gold Standard. This was in direct opposition to President Lincoln's policy of issuing Greenbacks, based solely on the good faith and credit of the United States. ... The Vancouver Sun article also quoted Gerald G. McGeer with the following statement, ... "They were the men interested in the establishment of the Gold Standard and the right of the bankers to manage the currency and credit of every nation in the world. With Lincoln out of the way they were able to proceed with that plan and did proceed with it in the United States. Within 8 years after Lincoln's assassination, silver was demonetized and the Gold Standard system set up in the United States."

- **1866 [History of the Money Changers](#)** The European central bankers wanted the re-institution of a central bank under their control and an American currency backed by gold. They chose gold as gold has always been relatively scarce and therefore a lot easier to monopolize, than, for example, silver, which was plentiful in the United States, and had been found in huge quantities with the opening of the American West. So, on April 12th, Congress went back to work at the bidding of the European central bankers. It passed the, "Contraction Act," which authorized the Secretary of the Treasury to contract the money supply by retiring some of the Greenbacks in circulation. ... This money contraction and it's disastrous results is explained by Theodore R. Thoren and Richard F. Walker, in their book, "The Truth In Money Book," in which they state the following, "The hard times which occurred after the Civil War could have been avoided if the Greenback legislation had continued as President Lincoln had intended. Instead there were a series of money panics, what we call recessions, which put pressure on Congress to enact legislation to place the banking system under centralized control. Eventually the Federal Reserve Act was passed on December 23rd 1913." ... This is how the, "Contraction Act," passed by Congress affected America (the money supply goes down purely because currency in circulation is being withdrawn): ... Year In circulation Approximately per capita 1866 \$1,800,000,000 \$50.46 1867 \$1,300,000,000 \$44.00 1876 \$600,000,000 \$14.60 1886 \$400,000,000 \$6.67 Therefore in the twenty years since 1866 two thirds of the American money supply had been called in by the bankers, representing a 760% loss in buying power over this twenty years. - The key to understanding our world is the 1938 interrogation of Illuminati insider Christian Rakovsky (Chaim Rakover) ([Wikipedia](#)) by the Stalinist secret police, the NKVD. ([Rense](#)) Rakovsky was an associate of Trotsky, and a former Russian ambassador to Paris. (See "Rothschilds Conduct Red Symphony") Rakovsky explains that the real goal of **Communism** is the same as the New World Order, essentially a dictatorship of the Masonic Jewish central banking cartel. The real meaning of "revolution" and all socialist and liberal enterprise is this dictatorship, thinly veiled as "internationalism" and "world government." The propaganda about championing the working class and equality etc. is a ruse to hide the centralization of wealth and power in the hands of this relatively small network of Satanist bankers and tycoons known as the "Illuminati." ... Rakovsky explains that war is necessary to revolution. The Illuminati bankers financed Hitler because they had lost control of Stalin. Now Rakovsky invited Stalin to return to the fold and help them destroy Hitler or else they would give Hitler free rein. Thus Hitler was set up for a war on two fronts. First, the two dictators forged an alliance in August 1939, (mere months after the Fascists defeated the Communists in Spain.) Then when Hitler and Stalin invaded Poland, the Allies declared war against Hitler only. ... Rakovsky describes how the illuminati use economic turmoil to achieve totalitarian control. He says Oct 24, 1929, the date of the New York Stock Exchange crash ("the beginning of the so-called 'depression'") was more important than the 1918 Bolshevik revolution. It broke the "classical American" individualism and resulted in "a flourishing of parasitism, and capital is a large parasite." It began "a real revolution." ... "Although the power of money is political power, before it had only been used indirectly, but now the power of money was to be transformed into direct power, The man through whom they made use of such power was Franklin Roosevelt. Have you understood? Take note of the following: In that year 1929 the first year of the American revolution, in February Trotsky leaves Russia; the crash takes place in October...the financing of Hitler is agreed in July 1929. You think that all this was by chance? The four years of the rule of Hoover was used for the preparation for the seizure of power in the United States and USSR; there by means of a financial revolution, and here Russia] with the help of war and the defeat of Stalin] which was to follow." Thus the two apparently diametrically opposing theories - communism and capitalism - both stemmed from the same people. Their intention (as it is still) is the destruction of the existing social systems, attacking religion and the family in order to establish a Jewish-controlled state over a voiceless proletariat. The Communist regime created the largest concentration camps and the most horrendous slave labour system of the 20th century, in which millions of gentiles and Christians were slaughtered. The movement was staffed in its upper echelons by Judaic Communists and yet the world is comparatively silent about the identity of the persons who were its architects. Auschwitz is on the tip of every tongue but who has heard of Kolyma, Magadan, the Solovetsky islands and the other infernal Soviet centres of human destruction in eastern Siberia? Who has seen films and books about the millions of human beings worked, frozen and starved to death in the construction of the White Sea-Baltic Canal, over which stood a triumphant, colossal statue of the Judaic Communist mass murderer Genrikh Yagoda? Only in such a profoundly falsified world soaked in fraud could the international media sit by, uninterested, as the great-great grandson of the blood-drenched Jewish Red Army commander Leon Trotsky, David Axelrod, shot to death an elderly Palestinian couple in November 1990, as part of an Israeli "Kach" terror group raid. Sixteen million ethnic Germans were forcibly expelled from Silesia, Moravia and the Volga regions of the eastern territories at the end of the World War II. The Soviet cattle car deportations afflicted more than a half-million Estonian, Latvian and Lithuanian Christians who were shipped to the Gulag. 12% of the entire Baltic population was either deported to Siberia or executed by the Jewish Soviet Secret Police. Lenin declared, "We are exterminating the bourgeoisie as a class." ... the gentiles.
- **1920s** Morgan-Rockefeller interests played a leading role in numerous pro-Soviet commercial arrangements. They controlled the principal firms doing business with Soviet Russia: Vacuum Oil, International Harvester, Guaranty Trust and New York Life. In 1926, the Vacuum Oil Company, owned by Rockefeller, closed an agreement with the Soviet Naptha Syndicate to market Soviet oil in European countries through the Chase National Bank (also Rockefeller-owned). At the time, it was reported that John D. Rockefeller agreed on a \$75,000,000 loan to the Bolsheviks as "part of the price for the arrangement." As a result of this deal, Rockefeller's Standard Oil built an oil refinery in Russia in 1927, after they were promised 50% of the Caucasus oil production.

These bankers were afraid that the United States, if they remained in one block and as one nation, would attain economical and financial independence, which would upset their financial domination over the world. The voice of the Rothschilds predominated. The American Bankers Association secretary, James

In this letter he stated, "It is advisable to do all in your power to sustain such prominent daily and weekly newspapers, especially the Agricultural and Religious Press, as well as oppose the Greenback issue of paper money and that you will also withhold patronage from all applicants who are not willing to oppose the government issue of money.... ... This early control of the media didn't work entirely nevertheless, as on February 28th Congress passed the, "Sherman Law." This law allowed the minting of a limited number of silver dollars, ending the 5 year hiatus. Nazi Gold, Part 10: The Emperor's Golden Lily, Glen Yeadon , Copyright 2001-2004] The question may be asked: how and why did George Bush Sr. get control of a portion of that gold. The answer is reported by Wayne Madsen. "The Bush family off-shore money tranches originated with gold bars and jewels spirited out of the Philippines upon the overthrow of Ferdinand Marcos in 1986. The Marcos fortune was the price exacted by Vice President Bush for his being granted asylum in Hawaii. The gold bars were transported from the Philippines to the International Diamond Exchange Vaults near Rockefeller Center. A CIA proprietary firm called Oceaneering International of Houston procured barges to move some of the gold from secured warehouses to a specially-configured Boeing 747 which then flew the cargo to New York. Oceaneering sealed the remaining gold to Oregon. After George W. Bush's victory in 2000, the last of the gold and jewels stored in New York was moved to UBS Bank in Zurich. Marcos and Saudi billionaire Adnan Khashoggi set about to create Five Star Trust in 1983 as a means to create a vehicle to use the Philippine wealth to create and funnel fungible assets abroad. In 1989, Five Star Trust was officially established in the Isle of Man by a Houston-based attorney who was a close friend of the Bush family." <http://www.waynemadsenreport.com>] Is should be of historic note that it was three of George Bush's key aids who played primary roles in convincing President Ronald Reagan to withdraw his support for Marcos, thus forcing Marcos to seek asylum and deal with George Bush Sr. "Armitage, Wolfowitz and Sigur were at the center of what was in many ways the most surprising change in the Reagan administration's foreign policy; the decision to encourage Philippine President Ferdinand Marcos to give up power in 1986." Armitage, Wolfowitz and Sigur were at the center of what was in many ways the most surprising change in the Reagan administration's foreign policy; the decision to encourage Philippine President Ferdinand Marcos to give up power in 1986." Rise of the Vulcans- The History of Bush's War Cabinet, James Mann, Penguin, 2004, p128.] In answering the question as to "why?" the records point to the conclusion that George HW Bush set up a private funding mechanism for his own personal, 'dark-ops' foreign policy. This was a fund THE SEPTEMBER 11 COMMISSION REPORT Page 157 protected from Congressional oversight and a fund that would allow him to authorize and fund operations that violated United States law. This fund would subsequently be used to wage war against the former Soviet Union by financing Muslim terrorists and Russian Mafiya oligarchs in his continued efforts to destabilize the Soviet Union. It would be used illegally to fight "Communists" in South America. Some of the Marcos/Bush gold was

even considered for use in the Iran-Contra dealings: "In 1985, Oliver North] attempted to sell 44 tons of Marcos bullion, worth \$465 million, on the black market. He blithely suggested skimming \$5 million to finance the Nicaraguan contra war, but the deal fell through when North, true to form, stiffed the Israeli middlemen on the Marcos payroll. Tapes and documents implicating American officials in the gold transfers were withheld from the Iran-contra committee by Major General Colin Powell, Defense Secretary Caspar Weinberger and William Odom, director of the NSA. "It wasn't so much the mention of gold that concerned them," say Thompson and Kanigher. "It was Marcos talking (on tape) about contributions to U.S. presidential campaigns and the use of the gold proceeds to fund illegal arms deals." Iran-Contra Connections to the Oklahoma Bombing, by Alex Constantine © 2000 Alex Constantine. All rights reserved] This Marcos gold would be a fund the use of which had to be protected from ever being exposed to the world. It would be a fund that investigators housed in the World Trade Center were on the path to uncover. It would provide the basis for the "National Security" rationale for all the cover-up

associated with the government investigation of the destruction of the WTC. **Bankers Trust**, ([Tariganter](#)) where Marcos placed his gold in 1982, becomes

an important name in this report in that the merger of **Bankers Trust** ([Tariganter](#)) (formed by JP Morgan in 1903) and Deutschebank Alex. Brown was conducted by "Buzz" Krongard, with the assistance of his primary staff assistant, Mayo Shattuck. What it suggests is that Krongard, Shattuck, executives of JP Morgan, and executives of the Deutschebank were in a position to be knowledgeable about the illicit gold movements that ultimately were covered up by the destruction of the World Trade Towers. Krongard has been implicated as a potential "person of interest" in the alleged cover-up by the US Government of what really happened on September 11 because of his association to the bank to which many illegal stock trades were traced, and the unexplained 'shutdown' of that investigation. "By profession, Krongard is a banker and formerly was the Chairman and CEO of investment bank Alex. Brown, Inc. In September 1997, Krongard engineered the merger of Alex. Brown with Bankers Trust ([Tariganter](#)) and became the Vice Chairman of the board of directors of **Bankers Trust**. A few months later, in January 1998, he was recruited as a "counselor" to CIA boss George Tenet. In March 2001, he was promoted to Executive Director, making him the No. 2 man of the spy agency." Project Hammer Reloaded, Part 1 of 2, Nexus Magazine, Volume 10, Number 6 (October-November 2003), David G. Guyatt] What is not recognized by many is that Krongard's main assistant at Alex Brown [Wikipedia](#) was Mayo Shattuck. Mayo – who was also the personal financial advisor to Edgar Bronfman and Adnan Khashoggi - resigned as CEO of Deutschebank, America on September 12, 2001, and went on become CEO of the company that would replace the bankrupted Enron as the primary energy market maker. Mayo's Deutschebank operation in the WTC was buried on September 11. Also rarely mentioned is the fact the Senator Carl Levin's Senate Hearings into US money-laundering identified AB Brown – where Krongard, Shattuck and Beese were the top three executives - as one of the top twenty US banks involved in money-laundering. Finally, one should note that Krongard was mentor to another placement from the CIA training facilities of the U.S. War College and John THE SEPTEMBER 11 COMMISSION REPORT Page 158 Hopkins. That protégé was named J. Carter Beese, who was one of George Bush appointees to the board of directors of the Overseas Private Investment Corporation in 1992, and later would become Chairman of Riggs Bank, as well as an SEC Commissioner (appointed by Bush.) J. Carter Beese Jr. was Chairman at Alex from 1994 to 1997, and would move from there to also be vice-Chairman of **Bankers Trust**. Beese went from Banker's Trust to become President of Riggs Capital Partners, which will later be demonstrated to play a major role in George's Bush's 1991 10 year bond fraud, one of the major drivers behind the September 11 tragedy.

Deutsche had ties to Enron's LJM and Chewco partnerships. Enron also hired away SEC officials, while recruiting heavily from CIA to staff its global security operations. Some speculate that the vast pool of money that disappeared into the Enron abyss may have been a slush fund for 911 short-trade profiteering, or even for the operation itself. The Four Horsemen- now majority-owned by Deutsche Bank via the Banker's Trust buyout- got their desired US military presence in Central Asia courtesy of 911. With the US occupation of Afghanistan and new US bases popping up all across Central Asia, Big Oil's Caspian Sea bonanza would now sport US taxpayer-funded armed guards. There are six lines of evidence from eight sources that suggest this was indeed the case. Many of these instances are corroborated with documents available on the Internet, presented by those making the claims. The bonds sat for ten years, like a ticking time bomb. **They had to be settled – or cashed in by September 12, 2001**. Stakeholders involved in Brady Bond debt restructuring and transactions. Dollar values on outstanding loans and bonds are illustrative; bonds were rarely issued for less than \$125 million USD, and lenders frequently accepted either 30–50% losses on face value or reduced interest rates fixed at below-market values. 1] According to EMTA, a financial industry trade association, most lenders that accepted Brady Bonds for outstanding loans were either smaller US commercial banks or non-US financial institutions rather than "major money center

banks". 2]... [enlarge](#) Brady bonds were created in March 1989 in order to convert bank loans to mostly Latin American (and East European countries) countries into a variety or "menu" of new bonds after many of those countries defaulted on their debt in the 1980s. At that time, the market for Emerging Markets' sovereign debt was small and illiquid, and the standardization of emerging-market debt facilitated risk-spreading and trading. In exchange for commercial bank loans, the countries issued new bonds for the principal sum and, in some cases, unpaid interest. Because they were tradable and came with some guarantees, in some cases they were more valuable to the creditors than the original bonds. **The key innovation behind the introduction of Brady Bonds was to allow the commercial banks to exchange their claims on developing countries into tradable instruments, allowing them to get the debt off their balance sheets.** This reduced the concentration risk to these banks. ... The principal amount was usually, but not always, collateralized by specially issued U.S. Treasury 30-year zero-coupon bonds purchased by the debtor country using a combination of International Monetary Fund, World Bank, and the country's own foreign currency reserves. Interest payments on Brady bonds, in some cases, are guaranteed by securities of at least double-A-rated credit quality held with the Federal Reserve Bank of New York. ... Although the Brady Bond process ended during the 1990s, many of the innovations introduced in these restructurings (call options embedded in the bonds, "stepped" coupons, Pars and Discounts) were retained in the later sovereign restructurings in, for example, **Russia** and Ecuador. Jewish reaction to his plan was mixed. Many Jews rejected it as too extreme, although there were those who responded with enthusiasm and asked him to head what was to become the Zionist movement. He succeeded in convening the first Zionist Congress in Basle, Switzerland, August 29-31, 1897. The congress adopted the Basle Program and established the World Zionist Organization to help create the economic foundation for the proposed Jewish state. Herzl was elected president of the organization and chaired the first six Zionist congresses. They put Rothschild agent, J. P. Morgan at the forefront of their charge. Interestingly J. P. Morgan's father, Julius Morgan, had been America's financial agent to the British, and after Julius' death, J. P. Morgan took on a British partner, Edward Grenville, who was a long time director of the Bank Of England. ... This year was the year of the money changers attack. J. P. Morgan and his cohorts secretly crashed the stock market. They were aware that thousands of small banks were so vastly over extended, some only had reserves of 1% under the fraudulent fractional reserve principle. Within only a few days, bank runs became commonplace across the nation. ... Morgan then stepped up and publicly announced that he would support these failing banks. What he failed to mention is that he would do this by manufacturing money out of nothing. And then what happened, surprise, surprise, Congress let him do it! So, Morgan manufactured \$200,000,000 of this completely reserveless private money, purchased goods and services with it, and sent some of it to his branch banks to lend out at interest. ... As a result, the general public regained confidence in money, but most importantly it meant the banking power was now further consolidated into the hands of a few large banks.

- **1910** [History of the Money Changers](#) Senator Aldrich returns from his two year European fact finding mission on 22nd November. Shortly afterwards some of America's most wealthy and powerful men boarded Senator Aldrich's private railcar in the strictest secrecy. They journeyed to Jekyll Island off the coast of Georgia. In this group were Paul Warburg, who was earning a \$500,000 a year salary from Rothschild owned firm, Kuhn, Loeb & Company. This salary was for him to lobby for a privately owned central bank in America. Also present was Jacob Schiff, a Rothschild who had purchased Kuhn, Loeb and Company shortly after he arrived in America from England. The Rothschilds, Warburgs and Schiffs, interconnected by marriage, were essentially the same family. ... Secrecy at this meeting was so tight that all the participants were cautioned to use only first names, to prevent servants from learning their identities. Years later, one participant, Frank Vanderlip, President of National Citibank and a representative of the Rockefeller family, confirmed the Jekyll Island trip in a 9th February 1935 edition of the Saturday Evening Post in which he stated, "I was as secretive indeed, as furtive as any conspirator ...Discovery we knew, simply must not happen, or else all our time and effort would be wasted. If it were to be exposed that our particular group had got together and written a banking bill, that bill would have no chance whatever of passage by Congress." ... It was not just the setting up of a Central Bank that was on the agenda. Other problems for these bankers were that the market share of these big national banks was shrinking fast. In the first ten years of the century the number of United States banks had more than doubled to over 20,000. By 1913 only 29% of all banks were national banks and they held only 57% of all deposits. As John D. Rockefeller put it, "Competition is Sin!" Senator Aldrich later admitted in a magazine article, "Before passage of this Act, the New York Bankers could only dominate the reserves of New York. Now we are able to dominate bank reserves of the entire country." .. So one of the aims of these conspirators was to bring these new banks under their control. Secondly the nations economy was so strong that corporations were starting to finance their own expansions out of profits instead of taking out huge loans from large banks. Indeed, in the first ten years of the century, 70% of corporate funding came from profits. Basically, American Industry was becoming independent of the money changers, and the money changers were not about to let that happen. ... There was also much discussion regarding the name of the new bank, which took place in a conference room in the Jekyll Island Club Hotel. Aldrich believed the word, "bank," should not even appear in the name. Warburg wanted to call the legislation, the, "National Reserve Bill," or the, "Federal Reserve Bill." The idea was not only to give the impression that the purpose of the new central bank was to stop bank runs, but also to conceal its monopoly character. ... However it was Senator Aldrich, the egomaniac, who insisted it be called the, "Aldrich Bill." So, after nine days at Jekyll Island, the group dispersed. This group of conspirators immediately set up an educational fund of \$5,000,000 to finance Professors at top universities to endorse the new bank.

He was hand in glove with the Harrimans, the Goulds, and the Rockefellers in all their railroad enterprises and has become the dominant power in the railroad and financial power of America." 1913: On March 4, Woodrow Wilson is elected the 28th President of the United States. President Wilson does not have the money, so Untermyer volunteers to pay the \$40,000 out of his own pocket to the woman Wilson had had the affair with, on the condition that Wilson promise to appoint to the first vacancy on the United States Supreme Court a nominee to be recommended to President Wilson by Untermyer. Wilson agrees to this. ... Jacob Schiff sets up the Anti Defamation League (ADL) in the United States. This organisation is formed to slander anyone who questions or challenges the Rothschild global conspiracy as, "anti-semitic." ... Strangely enough, the same year that they do this they also set up their last and current central bank in America, the Federal Reserve. Congressman Charles Lindbergh stated following the passing of the Federal Reserve Act on December 23, "The Act establishes the most gigantic trust on earth. When the President signs this Bill, the invisible government of the monetary power

will be legalized.....The greatest crime of the ages is perpetrated by this banking and currency bill." It is important to note that the Federal Reserve is a private company, it is neither Federal nor does it have any Reserve. It is conservatively estimated that profits exceed \$150 billion per year and the Federal Reserve has never once in its history published accounts.

- 1912 [History of the Money Changers](#) The Aldrich bill is presented to Congress for debate. This was very quickly identified as a bill to benefit the bankers, or an expression for them which was coined at the time, "The Money Trust." During the debate, the Republican, Charles A. Lindbergh stated, "The Aldrich plan is the Wall Street Plan. It means another panic, if necessary, to intimidate the people. Aldrich, paid by the government to represent the people, proposes a plan for the trusts instead." As this debate continued on, the bankers realized they didn't have enough support, so the Republican leadership never brought the Aldrich bill to a vote. Instead the bankers decided to switch their attention to the Democrats and started heavily financing Woodrow Wilson, the Democratic Presidential nominee. The Wall Street banker, Bernard Baruch, was put in charge of the Wilson project, and as historian, James Perloff, stated, "Baruch brought Wilson to the Democratic Party headquarters in New York in 1912, 'leading him like one wood a poodle on a string.' Wilson received an, 'indoctrination course,' from the leaders convened there...." ... During the Democratic Presidential campaign, Wilson and the rulers of the Democratic Party pretended to oppose the Aldrich bill. As Republican representative, Louis T. McFadden, explained twenty years later, when he was Chairman Of The House Banking And Currency Committee, "The Aldrich Bill was condemned in the platform...when Woodrow Wilson was nominated...The men who ruled the Democratic Party promised the people that if they were returned to power there would be no central bank established here while they held the reins of government. ... Thirteen months later that promise was broken, and the Wilson administration, under the tutelage of those sinister Wall Street figures who stood behind Colonel House, established here in our free country the worm-eaten monarchical institution of the, 'King's Bank,' to control us from the top downward, and to shackle us from the cradle to the grave." On November 5th, Woodrow Wilson was elected, and J. P. Morgan, Paul Warburg, Bernard Baruch et al, advanced a new plan which Warburg called the Federal Reserve System. The leadership of the Democratic Party hailed this new bill called the, "Glass-Owen Bill," as totally different to the Aldrich bill, when in fact it was virtually identical. ... Funnily enough the Democrats were so vehement in their denial of the similarity of the, "Glass-Owen Bill," to the, "Aldrich Bill," that Paul Warburg, the creator of both bill, had to inform his paid friends in Congress, that the two bills were virtually identical and therefore they must vote to pass it. Warburg stated, "Brushing aside the external differences affecting the, 'shells,' we find the, 'kernels,' of the two systems very closely resembling and related to one another." However this admission by Warburg was not made public. Instead, Senator Aldrich, and Frank Vanderlip, the President of Rockefeller's National Citibank of New York, were to publicly state their opposition to the bill in order to make people think that the bill proposed was radically different to the Aldrich bill. Indeed, Frank Vanderlip stated years later in the Saturday Evening Post, "Although the Aldrich Federal Reserve Plan was defeated when it bore the name Aldrich, nevertheless its essential points were all contained in the plan that finally was adopted."

- **1913** [History of the Money Changers](#) With Congress nearing a vote on the Glass-Owen Bill, they called Ohio Attorney, Alfred Crozier, to testify. However, Crozier noticed the similarities between the Aldrich Bill and the Glass-Owen Bill, and subsequently stated, "The...bill grants just what Wall Street and the big banks for twenty-five years have been striving for - private instead of public control of currency. It (the Glass-Owen bill) does this as completely as the Aldrich bill. Both measures rob the government and the people of all effective control over the public's money, and vest in the banks exclusively the dangerous power to make money among the people scarce or plenty." ... The debate on this bill was not going well for the banks, with many Senators intimating the bill was corrupt and deceitful, however the bill was approved through the Senate on December 22nd. How did this happen? Because most of the Senators had left town to return home for the Christmas holidays. Furthermore, these Senators had been assured by the leadership, that nothing would be done regarding this bill until long after the Christmas recess. Representative Charles A Lindbergh Sr. stated, "This Act establishes the most gigantic trust on earth. When the President signs this bill, the invisible government of the monetary power will be legalized. The people may not know it immediately, but the day of reckoning is only a few years removed...The worst legislative crime of the ages is perpetrated by this banking and currency bill." ... Interestingly, only a few weeks earlier, in October, Congress finally passed a bill legalizing direct income tax of the people. This was in the form of a bill pushed through by Senator Aldrich, which is now commonly known as the 16th amendment. The income tax law was fundamental to the Federal Reserve. This is because the Federal Reserve was a system which would run up, essentially, an unlimited Federal debt. The only way to guarantee the payment of interest on this debt was to directly tax the people, as they had done with the Bank Of England. If the Federal Reserve had to rely on contributions from the States, they would be dealing with bigger entities, who could revolt and refuse to pay the interest on their own money, or at least bring political pressure to bear in order to keep the debt small. ... Actually, this 16th amendment was never ratified, and therefore many American citizens do not pay their income tax and there is nothing the United States Government can do about it. For further information on this go to [thelawthatneverwas.com](#) . Also, back in 1895, the Supreme Court had also found an income tax law similar to the 16th amendment, as unconstitutional. The Supreme Court also found a Corporate Tax Law unconstitutional in 1909. ... Another important amendment that was put through this year is the 17th amendment. This provided for the direct election by the people of two Senators from each state as oppose to the original system of having state legislatures elect United States Senators. More democratic, you would think, until you realize these bankers could now provide the funds for their hand picked people to run for the Senate, and thus avoid future problems like getting the Federal Reserve through the Senate. ... Anyway, back to the Federal Reserve, if you are in any doubt as to whether the Federal Reserve is a private company, a basic check the public can carry out is in their phone book. Look under the government pages and it is not listed, but you will find it listed within the business pages. .. Actually some recent evidence has come forward as to who really owns the Federal Reserve, and they are the following banks: Rothschild Bank of London Warburg Bank of Hamburg Rothschild Bank of Berlin Lehman Brothers of New York Lazard Brothers of Paris Kuhn Loeb Bank of New York Israel Moses Seif Banks of Italy Goldman, Sachs of New York Warburg Bank of Amsterdam Chase Manhattan Bank of New York Also some argue that the Federal Reserve is a quasi-governmental agency, yet the President appoints only 2 of the 7 members of the Federal Reserve Board of Governors, every four years, and he appoints them to 14 year terms, which is far longer than any term he could possibly serve as President. The Senate confirms these appointments, but as we have seen, that is the idea, because these are the very people hand picked by the bankers who also finance their campaigns, ensuring loyalty to them, not the people. Let's summarize how the Federal Reserve creates money out of nothing. It is a four step process: The Federal Open Market Committee approves the purchase of United States Bonds*.

He stated, "To cause high prices, all the Federal Reserve Board will do will be to lower the rediscount rate..., producing an expansion of credit and a rising stock market, then when ...business men are adjusted to these conditions, it can check... prosperity in mid-career by arbitrarily raising the rate of interest. ... It can cause the pendulum of a rising and falling market to swing gently back and forth by slight changes in the discount rate, or cause violent fluctuations by a greater rate variation, and in either case it will possess inside information as to financial conditions and advance knowledge of the coming change, either up or down. This is the strongest, most dangerous advantage ever placed in the hands of a special privilege class by any Government that ever existed. In tsarist times Aschberg was the Morgan agent in Russia and negotiator for Russian loans in the United States; during 1917 Aschberg was financial intermediary for the revolutionaries; and after the revolution Aschberg became head of Ruskombank, the first Soviet international bank, while Max May, a vice president of the Morgan-controlled Guaranty Trust, became director and chief of the Ruskom-bank foreign department. - **1917 History of the Money Changers** The money changers never forgave the Tsars of Russia for both continually opposing their request to set up a central bank in Russia, as well as their support of President Lincoln during the Civil War. Therefore, Jacob Schiff, a Rothschild, spent 20 million dollars through his firm, Kuhn, Loeb & Co., in financing the Russian Revolution. It is commonly believed that Communism is the opposite of Capitalism, so why would these capitalists support it? Respected researcher, Gary Allen, explains it as follows, "If one understands that socialism is not a share-the-wealth program, but it is in reality a method to consolidate and control the wealth, then the seeming paradox of super-rich men promoting socialism becomes no paradox at all. Instead it becomes logical, even the perfect tool of power seeking megalomaniacs. Communism, or more accurately socialism, is not a movement of the downtrodden masses, but of the economic elite." [Wikipedia](#) Jacob Schiff Jacob Henry Schiff, born Jakob Heinrich Schiff (January 10, 1847 – September 25, 1920) was a German-born Jewish American banker and philanthropist, who helped finance, among many other things, the Japanese military efforts against Tsarist Russia in the Russo-Japanese War. ... From his base on Wall Street, he was the foremost Jewish leader from 1880 to 1920 in what later became known as the "Schiff era", grappling with all major Jewish issues and problems of the day, including the plight of Russian Jews under the Tsar, American and international anti-semitism, care of needy Jewish immigrants, and the rise of Zionism. 1] He also became the director of many important corporations, including the National City Bank of New York, Equitable Life Assurance Society, Wells Fargo & Company, and the Union Pacific Railroad. In many of his interests he was associated with E.H. Harriman. ... The Jewish Communal Register of New York City noted that "Mr. Schiff has always used his wealth and his influence in the best interests of his people. He financed the enemies of autocratic Russia and used his financial influence to keep Russia from the money markets of the United States." 17] Henry Wickham Steed, the chief editor of The Times during the period, argued that this aid went beyond the Kerensky regime, stating that "the prime movers of the Bolshevik revolution] were Jacob Schiff, Warburg, and other international financiers, who wished above all to bolster up the Jewish Bolsheviks in order to secure a field for German and Jewish exploitation of Russia." 18] Historian Juri Lina in his book, Under the Sign of the Scorpion, claims that it was Schiff who gave the order to kill the Tsar and his family. The Hoover Institution scholar, Antony Sutton, who specialized in the role of Western Technological and financial transfers in building up the Soviet State, noted that the role of Schiff's firm of Kuhn, Loeb, & Co. in supporting the bolsheviks continued beyond the revolution, writing that "there is a report in the State Department files that names Kuhn, Loeb & Co. - **1917 Antony Sutton** The secret British War Cabinet papers are now available and record the argument used by Thompson to sell the British government on a pro-Bolshevik policy. The prime minister of Great Britain was David Lloyd George. Lloyd George's private and political machinations rivaled those of a Tammany Hall politician — yet in his lifetime and for decades after, biographers were unable, or unwilling, to come to grips with them. In 1970 Donald McCormick's The Mask of Merlin lifted the veil of secrecy. McCormick shows that by 1917 David Lloyd George had bogged "too deeply in the mesh of international armaments intrigues to be a free agent" and was beholden to Sir Basil Zaharoff, an international armaments dealer, whose considerable fortune was made by selling arms to both sides in several wars. 5 Zaharoff wielded enormous behind-the-scenes power and, according to McCormick, was consulted on war policies by the Allied leaders. On more than one occasion, reports McCormick, Woodrow Wilson, Lloyd George, and Georges Clemenceau met in Zaharoff's Paris home. McCormick notes that "Allied statesmen and leaders were obliged to consult him before planning any great attack." British intelligence, according to McCormick, "discovered documents which incriminated servants of the Crown as secret agents of Sir Basil

Zaharoff with the knowledge of Lloyd George." [6](#) In 1917 Zaharoff was linked to the Bolsheviks; he sought to divert munitions away from anti-Bolsheviks and had already intervened in behalf of the Bolshevik regime in both London and Paris. In late 1917, then — at the time Lamont and Thompson arrived in London — Prime Minister Lloyd George was indebted to powerful international armaments interests that were allied to the Bolsheviks and providing assistance to extend Bolshevik power in Russia. The British prime minister who met with William Thompson in 1917 was not then a free agent; Lord Milner was the power behind the scenes and, as the epigraph to this chapter suggests, favorably inclined towards socialism and Karl Marx. ... By way of summary, we find that Federal Reserve Bank director William Thompson was active in promoting Bolshevik interests in several ways — production of a pamphlet in Russian, financing Bolshevik operations, speeches, organizing (with Robins) a Bolshevik revolutionary mission to Germany (and perhaps France), and with Morgan partner Lamont influencing Lloyd George and the British War Cabinet to effect a change in British policy. Further, Raymond Robins was cited by the French government for organizing Russian Bolsheviks for the German revolution. We know that Robins was undisguisedly working for Soviet interests in Russia and the United States. Finally, we find that Robert Minor, one of the revolutionary propagandists used in Thompson's program, was released under circumstances suggesting intervention from the highest levels of the U.S. government.

- **1917** [Antony Sutton](#) On December 17, 1917, there appeared in a Moscow newspaper an attack on Red Cross colonel Raymond Robins and Thompson, alleging a link between the Russian Revolution and American bankers: Why are they so interested in enlightenment? Why was the money given the socialist revolutionaries and not to the constitutional democrats? One would suppose the latter nearer and dearer to hearts of bankers. The article goes on to argue that this was because American capital viewed Russia as a future market and thus wanted to get a firm foothold. The money was given to the revolutionaries because the backward working men and peasants trust the social revolutionaries. At the time when the money was passed the social revolutionaries were in power and it was supposed they would remain in control in Russia for some time. Another report, dated December 12, 1917, and relating to Raymond Robins, details "negotiation with a group of American bankers of the American Red Cross Mission"; the "negotiation" related to a payment of two million dollars. On January 22, 1918, Robert L Owen, chairman of the U.S. Senate Committee on Banking and Currency and linked to Wall Street interests, sent a letter to Woodrow Wilson recommending de facto recognition of Russia, permission for a shipload of goods urgently needed in Russia, the appointment of representatives to Russia to offset German influence, and the establishment of a career-service group in Russia. This approach was consistently aided by Raymond Robins in Russia. For example, on February 15, 1918, a cable from Robins in Petrograd to Davison in the Red Cross in Washington (and to be forwarded to William Boyce Thompson) argued that support be given to the Bolshevik authority for as long as possible, and that the new revolutionary Russia will turn to the United States as it has "broken with the German imperialism." According to Robins, the Bolsheviks wanted United States assistance and cooperation together with railroad reorganization, because "by generous assistance and technical advice in reorganizing commerce and industry America may entirely exclude German commerce during balance of war." In brief, the tug-of-war in Washington reflected a struggle between, on one side, old-line diplomats (such as Ambassador Francis) and lower-level departmental officials, and, on the other, financiers like Robins, Thompson, and Sands with allies such as Lansing and Miles in the State Department and Senator Owen in the Congress.

- **1917** [Antony Sutton](#) Chapter I THE ACTORS ON THE REVOLUTIONARY STAGE Dear Mr. President: I am in sympathy with the Soviet form of government as that best suited for the Russian people... Letter to President Woodrow Wilson (October 17, 1918) from William Lawrence Saunders, chairman, Ingersoll-Rand Corp.; director, American International Corp.; and deputy chairman, Federal Reserve Bank of New York The frontispiece in this book was drawn by cartoonist Robert Minor in 1911 for the St. Louis Post-Dispatch. Minor was a talented artist and writer who doubled as a Bolshevik revolutionary, got himself arrested in Russia in 1915 for alleged subversion, and was later bank-rolled by prominent Wall Street financiers. Minor's cartoon portrays a bearded, beaming Karl Marx standing in Wall Street with Socialism tucked under his arm and accepting the congratulations of financial luminaries J.P. Morgan, Morgan partner George W. Perkins, a smug John D. Rockefeller, John D. Ryan of National City Bank, and Teddy Roosevelt — prominently identified by his famous teeth — in the background. Wall Street is decorated by Red flags. The cheering crowd and the airborne hats suggest that Karl Marx must have been a fairly popular sort of fellow in the New York financial district. Was Robert Minor dreaming? On the contrary, we shall see that Minor was on firm ground in depicting an enthusiastic alliance of Wall Street and Marxist socialism. The characters in Minor's cartoon — Karl Marx (symbolizing the future revolutionaries Lenin and Trotsky), J. P. Morgan, John D. Rockefeller — and indeed Robert Minor himself, are also

prominent characters in this book. The contradictions suggested by Minor's cartoon have been brushed under the rug of history because they do not fit the accepted conceptual spectrum of political left and political right. Bolsheviks are at the left end of the political spectrum and Wall Street financiers are at the right end; therefore, we implicitly reason, the two groups have nothing in common and any alliance between the two is absurd. Factors contrary to this neat conceptual arrangement are usually rejected as bizarre observations or unfortunate errors. Modern history possesses such a built-in duality and certainly if too many uncomfortable facts have been rejected and brushed under the rug, it is an inaccurate history. On the other hand, it may be observed that both the extreme right and the extreme left of the conventional political spectrum are absolutely collectivists. The national socialist (for example, the fascist) and the international socialist (for example, the Communist) both recommend totalitarian politico-economic systems based on naked, unfettered political power and individual coercion. Both systems require monopoly control of society. While monopoly control of industries was once the objective of J. P. Morgan and J. D. Rockefeller, by the late nineteenth century the inner sanctums of Wall Street understood that the most efficient way to gain an unchallenged monopoly was to "gopolitical" and make society go to work for the monopolists — under the name of the public good and the public interest. This strategy was detailed in 1906 by Frederick C. Howe in his Confessions of a Monopolist.¹ Howe, by the way, is also a figure in the story of the Bolshevik Revolution. Therefore, an alternative conceptual packaging of political ideas and politico-economic systems would be that of ranking the degree of individual freedom versus the degree of centralized political control. Under such an ordering the corporate welfare state and socialism are at the same end of the spectrum. Hence we see that attempts at monopoly control of society can have different labels while owning common features. Consequently, one barrier to mature understanding of recent history is the notion that all capitalists are the bitter and unswerving enemies of all Marxists and socialists. This erroneous idea originated with Karl Marx and was undoubtedly useful to his purposes. In fact, the idea is nonsense. There has been a continuing, albeit concealed, alliance between international political capitalists and international revolutionary socialists — to their mutual benefit. This alliance has gone unobserved largely because historians — with a few notable exceptions — have an unconscious Marxian bias and are thus locked into the impossibility of any such alliance existing. The open-minded reader should bear two clues in mind: monopoly capitalists are the bitter enemies of laissez-faire entrepreneurs; and, given the weaknesses of socialist central planning, the totalitarian socialist state is a perfect captive market for monopoly capitalists, if an alliance can be made with the socialist powerbrokers. Suppose — and it is only hypothesis at this point — that American monopoly capitalists were able to reduce a planned socialist Russia to the status of a captive technical colony? Would not this be the logical twentieth-century internationalist extension of the Morgan railroad monopolies and the Rockefeller petroleum trust of the late nineteenth century?

- **1919:** [IAmTheWitness](#) In January, Ashkenazi Jews, Karl Liebknecht and Rosa Luxemburg, are killed as they attempt to lead another Rothschild funded Communist coup, this time in Berlin, Germany. The Versailles peace conference is held to decide reparations that the Germans need to pay to the victors following the end of the first world war. A delegation of 117 Zionists headed up by Ashkenazi Jew, Bernard Baruch, bring up the subject of the promise of Palestine for them. At this point the Germans realised why America had turned on them and under whose influence, the Rothschilds. The Germans, naturally, felt they had been betrayed by the Zionists. This is because, at the time the Rothschilds made their deal with Britain for Palestine, in exchange for bringing America into the war, Germany was the most friendly country in the world towards the Jews, indeed the German Emancipation Edict of 1822 guaranteed Jews in Germany all civil rights enjoyed by Germans. ... Also, Germany was the only country in Europe which did not place restrictions on Jews, even giving them refuge when they had to flee from Russia after their first attempted Communist coup failed there in 1905. ... Nevertheless, the Rothschilds had held up their side of the bargain to spill the blood of millions of innocents and as a result, Palestine is confirmed as a Jewish homeland, and whilst its handover to the Rothschilds takes place it is to remain under the control of Britain as the Rothschilds control Britain. At that time less than one percent of the population of Palestine was Jewish. Interestingly, the host of the Versailles peace conference is its boss, Baron Edmond de Rothschild. The Versailles peace conference is also used as an attempt by the Rothschilds to set up a world government under the pretext of ending all wars (which they create). This was called the, "[League of Nations](#)." Fortunately not enough countries accepted it and so it soon died. On March 29th The Times of London reports on the Bolsheviks in Russia, ... "One of the curious features of the Bolshevik movement is the high percentage of non Russian elements among its leaders. Of the twenty or thirty commissaries, or leaders, who provide the central machinery of the Bolshevik movement, not less than 75% were Jews." It is reported that the Rothschilds were angry with the Russians because they were not prepared to allow them to form a central bank within their nation. They therefore gathered groups of Jewish spies and sent them into Russia to drum up a revolution for the benefit of the common man, which was actually a takeover of Russia by a Rothschild controlled satanic elite. These Jewish spies were, in age old deceptive Ashkenazi tradition, given Russian names, for example Trotsky was a member of the first group and his original name was Bronstein. These groups were sent to areas throughout Russia to incite riots and rebellion. ... The Jewish Post International Edition, week ending January 24th 1991, confirms Vladimir Lenin was Jewish. Lenin is also on record as having stated, "The establishment of a central bank is 90% of communizing a nation." These Jewish, Rothschild funded Bolsheviks would go on in the course of history to slaughter 60 million Christians and Non-Jews in Soviet controlled territory. Indeed the author Aleksandr Solzhenitsyn in his

work, "Gulag Archipelago, Vol 2," affirms that **Zionist Jews created and administered the organized Soviet concentration camp system** in which these tens of millions of Christians and Non-Jews died. On page 79 of this book he even names the

administrators of this the greatest killing machine in the history of the world. They are Aron Solts, Yakov Rappoport, Lazar Kogan, Matvei Berman, Genrikh Yagoda, and Naftaly Frenkel. All six are Zionist Jews. In 1970 Solzhenitsyn would be awarded the Nobel Peace Prize for literature. ... N. M. Rothschild & Sons' are given a permanent role to fix the world's daily gold price. Don Heddesheimer's compact but substantive "First Holocaust" documents post-WWI propaganda that claimed East European Jewry was on the brink of annihilation, regularly invoking the talismanic six million figure. It gives details how that propaganda was used to agitate for minority rights for Jews in Poland, and for Zionism and Bolshevism in Poland and Russia; and demonstrates how Jewish fundraising operations in America raised vast sums in the name of feeding Polish and Russian Jews, then funneled much of the money to Zionist and Communist "constructive undertakings" -- including banks, unions, and kibbutzes -- rather than to starving Jews. "The First Holocaust," which includes eye-opening testimony from American diplomats and military attachés stationed in Poland and Russia that contradicted Jewish persecution claims, is a valuable study of American Jewish institutional operations at a fateful juncture in Jewish and European history, an incisive examination of a cunningly contrived campaign of atrocity and extermination propaganda, two decades before the alleged WWII Holocaust.

It is certainly a very great one; it probably outweighs all others. With the notable exception of Lenin, the majority of the leading figures are Jews. Moreover, the principal inspiration and driving power comes from the Jewish leaders. Thus Tchitcherin, a pure Russian, is eclipsed by his nominal subordinate, Litvinoff, and the influence of Russians like Bukharin or Lunacharski cannot be compared with the power of Trotsky, or of Zinovieff, the Dictator of the Red Citadel (Petrograd), or of Krassin or Radek -- all Jews. In the Soviet institutions the predominance of Jews is even more astonishing. The French interrogatory establishes that Count Minotto, a German espionage agent, was in the employ of Guaranty Trust Company; that Max May was his superior officer; and that Max May was also closely associated with Bolshevik banker Olof Aschberg. In brief: Max May of Guaranty Trust was linked to illegal fund raising and German espionage in the United States during World War I; he was linked indirectly to the Bolshevik Revolution and directly to the establishment of Ruskombank, the first international bank in the Soviet Union. It is too early to attempt an explanation for this seemingly inconsistent, illegal, and sometimes immoral international activity. In general, there are two plausible explanations: the first, a relentless search for profits; the second — which agrees with the words of Otto Kahn of Kuhn, Loeb & Co. and of American International Corporation in the epigraph to this chapter — the realization of socialist aims, aims which "should, and can, be brought about" by nonsocialist means.

This official report estimates the minerals, except oil, in 1925 as follows: Magnesium Chloride, 22,000 tons, value 600 billion dollars; Potassium Chloride, 20,000 tons, value 75 billion dollars; other minerals valued at 1,200 billion dollars; or a total of about three trillion dollars, exclusive of oil (The Palestine Mystery, pages 12 and 13).[enlarge](#)

The minerals industry of Israel is based on the production of industrial minerals and, by extension, inorganic chemicals. The Dead Sea's mineral-rich saline waters have allowed Israel to become a large-scale producer of potash, salt, bromine, magnesia and magnesium metal, plus numerous downstream products. The country is also a significant supplier of fertiliser and chemicals based on the minerals and chemicals from the Dead Sea, plus phosphate rock. ... at present, approximately 200 quarries are in operation within the country. Overall annual production totals about 50-60 million tons of raw materials, including different kinds of aggregates, gravel, dimensional stones, sand and other materials used mainly in construction. Phosphate mines are found in the southern part of the country, and the minerals extracted are used primarily in the chemical industry and agriculture sector. ... Commercial production is dominated by the subsidiary companies of Israel Chemical Ltd (ICL), in particular, Dead Sea Works (DSW potash and salt), Dead Sea Bromine (bromine and bromine derivatives), Dead Sea Periclase (magnesia-based precuts), Dead Sea Magnesium (magnesium metal), Rotem Amfert Negev (phosphates, phosphate chemicals and fertilisers), Rami Ceramic Industries (ceramics and refractories), Negev Industrial Materials, Fertilisers and Chemicals, and PAMA (oil shales). Dead Sea Works and Rotem now conduct the marketing and transportation of these products.

Republican Congressman, Louis T. McFadden, Chairman of the House Banking & Currency Committee, from 1920 to 1931, would comment on this Bank of England plan in the midst of the Great Depression in February 1931 when he stated, "I think it can hardly be disputed that the statesmen and financiers of Europe are ready to take almost any means to reacquire rapidly the gold stock which Europe lost to America as a result of World War I."

- 1929 [History of the Money Changers](#) In April, Paul Warburg sent out a secret warning to his friends that a collapse and nationwide depression had been planned for later that year. It is certainly no coincidence that the biographies of all the Wall Street giants of that era: John D. Rockefeller; J. P. Morgan; Joseph Kennedy; Bernard Baruch; et al, all marveled at the fact these people got out of the stock market completely just before the crash and put their assets into cash or gold. So, as all the bankers and their friends already knew, in August the Federal Reserve began to tighten the money supply. Then on 24th October the big New York bankers called in their 24 hour broker call loans. This meant that both the stockbrokers and their customers had to dump their stocks on the stock market to cover their loans, irrespective of what price they had to sell them for. As a result of this the stock market crashed on a day that would go down in history as, "Black Thursday." Despite the claims of how the Federal Reserve would protect the country against depressions and inflation, they continued to further contract the money supply. Between 1929 and 1933, they reduced the money supply by an additional 33%. Even, Milton

Friedman, the Nobel Peace Prize winning economist stated the following in a radio interview in January 1996, "The Federal Reserve definitely caused the Great Depression by contracting the amount of currency in circulation by one-third from 1929 to 1933." In only a few weeks from the day of the crash, 3 billion dollars of wealth vanished. Within a year, 40 billion dollars of wealth vanished. However, it did not simply disappear, it just ended up consolidated in fewer and fewer hands, as was planned. An example of this is Joseph P. Kennedy, John F. Kennedy's father. In 1929 he was worth 4 million dollars, in 1935 that had increased to over 100 million dollars. ... This is why depressions are caused. As stated previously the top bankers and their friends got out of the stock market and purchased gold just before the crash, which they shipped over to London. This meant that the money lost by most Americans during the crash didn't just vanish, it just ended up in these people's hands. ... It also was spent overseas, as whilst the Great Depression was occurring, millions of American dollars was being spent on rebuilding Germany from damage sustained during World War I, in preparation for the bankers World War II. Republican Louis T. McFadden, Chairman of the House Banking & Currency Committee from 1920 to 1931, stated the following in relation to this, "After World War I, Germany fell into the hands of the German International Bankers. Those bankers bought her and now they own her, lock, stock, and barrel. They have purchased her industries, they have mortgages on her soil, they control her production, they control all her public utilities. ... The international German bankers have subsidized the present Government of Germany and they have also supplied every dollar of the money Adolph Hitler has used in his lavish campaign to build up a threat to the government of Bruening. When Bruening fails to obey the orders of the German International Bankers, Hitler is brought forth to scare the Germans into submission... All this was done on our money. All this was given to Germany through the Federal Reserve Board. The Federal Reserve Board...has pumped so many billions of dollars into Germany that they dare not name the total." ... The apex of the system was to be the Bank For International Settlements in Basel, Switzerland (*), a private bank owned and controlled by the world's central banks which were themselves private corporations. ... - **1930 [Wikipedia](#) Young Plan** ... The Young Plan was a program for settlement of German reparations debts after World War I written in 1929 and formally adopted in 1930. It was presented by the committee headed (1929–30) by American Owen D. Young. The reparations, set in January 1921 by an Inter-Allied Reparations Commission at 269 billion gold marks (the equivalent of around 100,000 tonnes of pure gold) were deliberately crushed. This 100,000 tonnes of gold is equivalent to more than 50% of all the gold ever mined in history (est. 165000 tonnes), which many economists at the time including John Maynard Keynes deemed to be irrational and excessive. After the Dawes Plan was put into operation (1924), it became apparent that Germany could not meet the annual payments, especially over an indefinite period of time. The Young Plan reduced further payments to 112 billion Gold Marks, US \$8 billion in 1929 (US\$ 108 billion in 2012) over a period of 59 years (1988). 1] In addition, the Young Plan divided the annual payment, set at two billion Gold Marks, US \$473 million, into two components, one unconditional part equal to one third of the sum and a postponable part, incurring interest and financed by a consortium of American investment banks coordinated by the Morgan Guaranty Trust Company, for the remaining two-thirds. Contents hide] 1 The plan 2 Subsequent Events 3 Opposition to war reparations: the "Liberty Law" 4 Bibliography 5 Further reading edit]The plan Owen Young, 1924 The Committee, which had been appointed by the Allied Reparations Committee, met in the first half of 1929, and submitted its first report on June 7 of that year. In addition to Young, the United States was represented by J. P. Morgan, Jr., the prominent banker, and his partner, Thomas W. Lamont. The report met with great objections from the United Kingdom but, after a first Hague Conference, a plan was finalized on August 31. The plan was formally adopted at a second Hague Conference, in January 1930. Amongst other provisions, the plan called for an international bank of settlements to handle the reparations transfers. The resulting Bank for International Settlements was duly established at the Hague Conference in January. Subsequent Events Between agreement and adoption of the plan came the Wall Street Crash of 1929, of which the main consequences were twofold. The American Banking system had to recall money from Europe, and cancel the credits that made possible the Young Plan. Moreover, the downfall of imports and exports affected the rest of the world. By 1933, almost two-thirds of world trade had vanished. A new trade policy was set with the Smoot–Hawley Tariff Act. The latter was influenced by nationalism and the adopted economic policy. Unemployment soared to 33.7% in 1931 in Germany, and 40% in 1932.

Under such circumstances, U.S. President Herbert Hoover issued a public statement that proposed a one-year moratorium on the payments. He managed to assemble support for the moratorium from 15 nations by July 1931. But the adoption of the moratorium did little to slow economic decline in Europe. Germany was gripped by a major banking crisis. A final effort was made at the Lausanne Conference of 1932. Here, representatives from Great Britain, France, Italy, Belgium, Germany and Japan gathered to come to an agreement. By that time it was clear that the deepening depression had made it impossible for Germany to resume its reparations payments. They agreed: Not to press Germany for immediate payments. To reduce indebtedness by nearly 90% and require Germany to prepare for the issuance of bonds. This provision was close to cancellation, reducing the German obligation from the original \$32.3 billion to \$713 million. It was also informally agreed among the delegates that these provisions would be ineffective unless the US government agreed to the cancellation of war debts owed by the Allied governments. Hoover made the obligatory public statement about the lack of any connection between reparations and war debts, however in December 1932, the U.S. Congress rejected the Allied war debt reduction plan, which technically meant that the war reparations and debt reverted to the debt reduction previously granted Germany by the 1929 Young Plan. However, the system had collapsed, and Germany did not resume payments. Once the National Socialist government consolidated power, the debt was repudiated and Germany made no further payments. By 1933, Germany had made World War I reparations of only one eighth of the sum required under the Treaty of Versailles. The plan ultimately failed, not because of the U.S. Congress' refusal to go along, but because it became irrelevant upon Hitler's rise to power.

- **1931** [JTA](#) "international Jewish Capital" Cry in Austria: Socialist and Democratic Press Join Antisemitic in Ab December 25, 1931 Vienna (Dec. 24) The Social Democratic papers and the papers of the Left Democratic Parties here have joined the antisemitic Hitlerist papers to-day in violent denunciations of "international Jewish finance" and the Rothschilds? over the Government bill carried in Parliament to-day for regulating the affairs of the Credit-Anstalt, of which Baron Louis de Rothschild is head. The Vienna Rothschilds are nothing more than the resident representatives of international Jewish finance in the Austrian colony of Jewish world capital, the papers write, and the people of Austria are nothing more than the slaves of Jewish world capital. Even the Austrian Parliament has surrendered its sovereignty to the Jewish capitalists, they say, because our Prime Minister actually held up the sitting of Parliament which was dealing with the Government bill while he telephoned to Mr. Lionel de Rothschild, in London, to ask him whether the Government measure meets with his approval. The "Arbeiter Zeitung", the chief organ of the Austrian Socialist Party (which was founded and for many years edited by a Jew, the late Dr. Victor Adler, whose son, Dr. Friedrich Adler, is now the Secretary of the Second Socialist International is beside itself at what it describes as

“the adaptation of the affairs of the Austrian State to the wishes of the Rothschilds. The Government Party is no longer a “Christian Socialist Party”, but a “Rothschild Socialist Party”, it declares, and the new laws regulating the Credit-Anstalt mean the enslavement of the Christian people of Austria on the very eve of [Christmas](#) to the international Jewish bankers and to Jewish world capital. When the Austrian Credit-Anstalt fell into difficulties last May and the Government stepped in to help the Rothschild House to save the Bank, the general expression of opinion in the entire Austrian press, including the antisemitic papers, was that the Rothschilds had by their prompt action prevented a financial catastrophe, which would have overwhelmed half Europe. The Prime Minister, Dr. Ender, and the Minister of Finance, Dr. Juch, made a declaration at a press reception that no blame whatever attached to the administration of the Credit-Anstalt, of which Baron Louis de Rothschild was President, everything being in proper order and the difficulty of the Bank being caused solely by the responsibilities which it had assumed in taking over the Boden Credit-Anstalt and the depreciation of securities caused by the economic [depression](#). The intervention of the State, it was pointed out, was essential, since the Credit-Anstalt had assumed the liabilities of the Boden Credit-Anstalt on the urgent demand of the Government, which, together with the National Bank, had assured the Rothschild House that they would help to cover any losses which would result on the absorption. Mr. Lionel de Rothschild of the London firm of Messrs. N. M. However, later that year, President Roosevelt outlawed private ownership of all gold bullion and all gold coins with the exception of rare coins. Most of the gold in the hands of the average American was in the form of gold coins and this decree by Roosevelt was effectively a confiscation. ... In small town America, the people did not trust Roosevelt. However, the people were given a simple choice. Either turn in your gold and be paid the official price for it of, \$20-66 an ounce, or you will be liable for a \$10,000 fine and a ten year prison sentence. ... This confiscation order was so unpopular, it's author has never been discovered. No Congressman ever claimed having written it, President Roosevelt stated he had not written it, nor had he even read it. Roosevelt's Secretary of the Treasury, William H. Hitler refuses and as a result of this, Samuel Untermyer, the Ashkenazi Jew who blackmailed President Wilson, and is now the head of the American delegation and the president of the whole conference, returns to the United States, and makes a speech on radio which was transcribed in the From the New York Times, Monday, August 7, 1933. In the speech he made the following statements, "...the Jews are the aristocrats of the world...Our campaign is...the economic boycott against all German goods, shipping and services...What we are proposing...is to prosecute a purely defensive economic boycott that will undermine the Hitler regime and bring the German people to their senses by destroying their export trade on which their very existence depends... Each of you, Jew and Gentile alike...must refuse to deal with any merchant or shopkeeper who sells any German-made goods or who patronizes German ships or shipping." ... As two thirds of Germany's food supply had to be imported, and could only be imported with the proceeds of what they exported, if Germany could not export, two thirds of Germany's population would starve, as there would be not enough food for more than one third of the population. As a result of this boycott, Jews throughout America, would protest outside and damage any stores in which they found any products with, "Made in Germany," printed on them, causing stores to have to dump these products or risk bankruptcy. ... Once the effects of this boycott began to be felt in Germany, the Germans, who had demonstrated no violence towards the Jews up to this point, simply began boycotting Jewish stores in the same way the Jews had done to stores selling German products in America. ... Rothschild financed IBM, supply machines to the Nazis which produce punch cards to help organize and manage the initial identification and social expulsion of Jews, the confiscation of their property and their extermination. ... On November 16, President Roosevelt recognizes the Zionist regime of Stalin in Russia without consultation with Congress even as 8,000 Ukrainians march in protest in New York. ... As Nobel Prize winning economist Milton Friedman put it, "The stock of money, prices and output was decidedly more unstable after the establishment of the Reserve System than before. The most dramatic period of instability in output was, of course, the period between the two wars, which includes the severe (monetary) contractions of 1920-21, 1929-33, and 1937-38. No other 20 year period in American history contains as many as three such severe contractions. ... This evidence persuades me that at least a third of the price rise during and just after World War I is attributable to the establishment of the Federal Reserve System...and that the severity of each of the major contractions - 1920-21, 1929-33, and 1937-38 - is directly attributable to acts of commission and omission by the Reserve authorities... ... Any system which gives so much power and so much discretion to a few men, (so) that mistakes - excusable or not - can have such far reaching effects is a bad system. It is a bad system to believers in freedom just because it gives a few men such power without any effective check by the body politic - this is the key political argument against an independent central bank...To paraphrase Clemenceau money is much too serious a matter to be left to the central bankers." Milton Friedman would also state, "I know of no severe depression, in any country or any time that was not accompanied by a sharp decline in the stock of money, and equally of no sharp decline in the stock of money that was not accompanied by a severe depression."

It presented the Nazi occupation officials with a memorandum entitled "New Order for the Greater Chemical Industry of Austria." 1 Essentially, the "new order" plan was a request for government permission for I.G. to take over SkodaWerke Wetzler, the largest chemical concern in Austria. I.G. made sure to clothe its plea with the rhetoric of German national interests. The erstwhile Jewish company was now ready to goose-step with Hitler. The absorption of the Austrian concern, I.G. promised, would aid in the pursuit of the aims of the four-year plan as well as promote the elimination of Jewish influence in Austrian industry. Farben board members had precise and prior knowledge that Zyklon B was being used to murder civilians in concentration camps, with no attempt made to halt production of the gas after such murders were understood. I.G. Farben was crucially instrumental in funding the rise to power of the Nazi Party, and also in building up the industrial and war-making capabilities of Germany once the Nazis were in power while simultaneously attempting to restrict industrial production materials to countries marked for invasion by Nazi Germany, all of this to such a degree that all German board members other than Max Warburg were charged after World War II as war criminals. ◦ 1939 Energy.net his is a summary of family ties between the Rothschilds and Warburg families. The Warburgs brought in their former clients whom they had previously financed to invest in IG Farben and they recruited these American Companies: Rockefeller's Standard Oil, Ford, ITT, Dupont, General Electric, etc. etc. etc. I have a compilation from the State Department Decimal Files and Harry Truman's Kilgore Investigation – Trading with the Enemy Act. IG Farben manufactured 95% of the Zyklon B gas that were used to gas the Europeans Jews. IG Farben was the Nazi Warmacht and without IG Farben, there'd be no Hitler. Farben was Hitler and Hitler was Farben. *Very similar to Obama, the puppet of the banks and the military industrial complex.* BAYER head Carl Duisberg personally propagated the concept of forced labor during First World War. The idea was later warped to mass murder at the company's own IG FARBEN concentration camp, Monowitz. IG Farben was the only German company in the Third Reich that ran its own concentration camp Monowitz. At least 30,000 slave workers died in this camp; a lot more were deported to the gas chambers. It was no coincidence that IG Farben built their giant new plant in Auschwitz, since the workforce they used (altogether about 300,000 people) was practically for free. The Zyklon B gas, which killed millions of Jews, Gypsies, Germans, Polish and other people was produced by IG Farben's subsidiary company Degesch.

- o **1939** [TakeOverWorld](#) There is also vast evidence of collaboration between leading [Zionists and Nazis](#) --- NOT to rescue Jews --- 800,000 Hungarian Jews and others were abandoned by the Zionists over the pleas of a Rabbi. NOT out of fear --- collaboration came from Zionists who had already relocated to Palestine, but who received Nazi leaders and broke a global boycott of Nazi goods. Zionists were EAGER to exterminate "undesireable" Jews and cleanse Jewry of the poor, the old and feeble, the religious and moral, old-fashioned Euro-Jews who were not "on program" with Zionism and founding the State of Israel. They organized to prevent Jews from escaping Nazi-held territory to neutral territory. They organized to prevent rescue funds from reaching Euro-Jews and to divert it to Zio-Jews and their new "ethnically pure" State. This was based on a similar nationalist/racist/separatist ideology coupled with the recognition of Nazi power and the desire to personally and politically benefit from such power.
- o **1941** [Bibliotec Pleyades](#) One year before Hitler seized power, IG Farben donated 400,000 marks to Hitler and his Nazi party. Accordingly, after Hitler's seizure of power, IG Farben was the single largest profiteer of the German conquest of the world, the Second World War. Zyklon-B, an extermination gas produced by Hoechst, was used to kill millions of innocent people, before their corpses were burnt One hundred percent of all explosives and one hundred percent of all synthetic gasoline came from the factories of IG Farben. Whenever the German Wehrmacht conquered another country, IG Farben followed, systematically taking over the industries of those countries. Through this close collaboration with Hitler's Wehrmacht, IG Farben participated in the plunder of Austria, Czechoslovakia, Poland, Norway, Holland, Belgium, France and all other countries conquered by the Nazis. The U.S. government investigation of the factors that led to the Second World War in 1946 came to the conclusion that without IG Farben the Second World War would simply not have been possible. We have to come to grips with the fact that it was not a psychopath, Adolph Hitler, or bad genes of the German people that brought about the Second World War. Economic greed by companies like Bayer, BASF and Hoechst was the key factor in bringing about the Holocaust.

It also brought new evidence concerning complex price and marketing agreements between DuPont, a major investor in and producer of leaded gasoline, United States Industrial Alcohol Company and its subsidiary, Cuba Distilling Co. The investigation was eventually dropped, like dozens of others in many different kinds of industries, due to the need to enlist industry support in the war effort. The most important of these is Reinhard Gehlen, Hitler’s master spy who had built up an intelligence network in the Soviet Union. With full U.S. blessing, he creates the “Gehlen Organization,” a band of refugee Nazi spies who reactivate their networks in Russia. These include SS intelligence officers Alfred Six and Emil Augsburg (who massacred Jews in the Holocaust), Klaus Barbie (the “Butcher of Lyon”), Otto von Bolschwing (the Holocaust mastermind who worked with Eichmann) and SS Colonel Otto Skorzeny (a personal friend of Hitler’s). The Gehlen Organization supplies the U.S. with its only intelligence on the Soviet Union for the next ten years, serving as a bridge between the abolishment of the OSS and the creation of the CIA. However, much of the “intelligence” the former Nazis provide is bogus. Gehlen inflates Soviet military capabilities at a time when Russia is still rebuilding its devastated society, in order to inflate his own importance to the Americans (who might otherwise punish him). In 1948, Gehlen almost convinces the Americans that war is imminent, and the West should make a

preemptive strike. In the 50s he produces a fictitious "missile gap." To make matters worse, the Russians have thoroughly penetrated the Gehlen Organization with double agents, undermining the very American security that Gehlen was supposed to protect.

- **1945** [Reformation](#) in 1945, Vietnam was still a colony of the French. Laurence Rockefeller, it appears, had given the extensive store of weapons to Ho Chi Minh with the hope that Vietnam would drive out the French so that Standard Oil would be able to take over the as yet undeveloped offshore fields. But in 1954, Vietnamese General Giap finally defeated and drove out the French at Dien Bien Phu with weaponry provided by the U.S. Ho Chi Minh reneged on the deal since he could read too, and he was well aware of the Hoover resource report and knew there was a vast supply of oil off the Vietnamese coast. ... In the 1950's a method of undersea oil exploration was perfected which used small explosions deep in the water and then recorded the sound echoes bouncing off the various layers of rock below. The surveyor could then determine the exact location of the arched salt domes which hold the accumulated oil beneath them. But if this method were used off the Vietnam coast on property Standard didn't own or have the rights to, the Vietnamese, the Chinese, the Japanese and probably even the French would quickly run to the United Nations and complain that America was stealing the oil, and that would shut down the operation. ... In 1964, after Vietnam was divided into North and South, and the contrived Gulf of Tonkin incident, several U.S. aircraft carriers were stationed offshore of Vietnam and the 'war' was started. Every day jet planes would take off from the carriers, bomb locations in North and South Vietnam, and then using normal military procedure when returning would dump their unsafe or unused bombs in the ocean before landing back on the carriers. Safe ordnance drop zones were designated for this purpose away from the carriers. ... Even close-up observers would only notice many small explosions occurring daily in the waters of the South China Sea and thought it was only part of the 'war.' The U.S. Navy carriers had begun Operation Linebacker One, and Standard Oil had begun its ten year oil survey of the seabed off of Vietnam. And the Vietnamese, Chinese and everybody else around, including the Americans, were none the wiser. The oil survey hardly cost Standard Oil a nickel, the U.S. taxpayers paid for it. - **1946 [History of the Money Changers](#)** The Bank of England was nationalized, which might seem at first sight to be a far reaching measure, but actually made little difference in practice. Yes, the state did acquire all the shares in the Bank of England, they now belong to the Treasury and are held in trust by the Treasury Solicitor. However, the government had no money to pay for the shares, so instead of receiving money for their shares, the shareholders were issued with government stocks. Although the state now received the operating profits of the bank, this was offset by the fact that the government now had to pay interest on the new stocks it had issued to pay for the shares. ... So, although the Bank of England is now state-owned, the fact is that the British money supply is once again almost entirely in private hands, with 97% of it being in the form of interest bearing loans of one sort or another, created by private commercial banks. ... As a result of this, the bank is largely controlled and run by those from the world of commercial banking and conventional economics. The members of the Court of Directors, who set policy and oversee its functions, are drawn almost entirely from the world of banks, insurance, economists and big business. ... Although the Bank of England is called a central bank it is now essentially a regulatory body that supports and oversees the existing system. It is sometimes referred to as "the lender of last resort," in so far as one of its functions as the bankers' bank is to support any bank or financial institution that gets into difficulties and suffers a run on its liquid assets. Interestingly, in these circumstances, it is not obliged to disclose details of any such measures, the reason being so as to avoid a crisis in confidence.

How could the Jewish population have increased so rapidly after losing six million during World War II? Walter Sanning, the author of Dissolution of European Jewry, says that no less than 2,200,000 Jews had emigrated out of Europe leaving 2,847,000 Jews residing there at the height of the German occupation in June 1941. After the war, 3,375,000 Jews, according to the Red Cross, applied for holocaust reparations. This figure included many of the emigrants. Thus, the actual number of those who died at the camps from all causes ranges between 150,000 and 300,000.

Truman (33rd President of the United States 1945 – 1953) to recognise Israel (Rothschild owned Zionist not Jewish territory) as a sovereign state with \$2,000,000 which they give to him on his campaign train. ... They then declare Israel to be a sovereign Jewish state in Palestine and within half an hour President Truman declared the United States to be the first foreign nation to recognise it. The Flag of Israel is unveiled. Despite tremendous opposition the emblem on the flag is a blue coloured version of the Rothschild, "Red Hexagram or Sign." ... This angers many Jews who realise this Hexagram was used in the ancient mystery religions as the symbol of, "Moloch," (described as a demon of unwilling sacrifice and is also interestingly the name of the stone owl the elite worship at Bohemian Grove), and, "Astaroth," (described as the Lord Treasurer of Hell). The Hexagram was also used to represent Saturn, which has been identified as the esoteric name for, "Satan." This indicates that anyone killed in the name of Israel is actually a sacrifice to Satan. They asked for help from neighbouring Arab states, but those states did not get involved as they were no match for the Israelis whose up to date military hardware had been supplied by the Jewish Stalinist regime in Russia. - **1946** [Eustace Mullins](#) On March 5, 1946, at Fulton, Churchill made his famous "Iron Curtain" speech. He warned that an "Iron Curtain" had descended upon Europe, the Communist enslavement of the Eastern European countries. He failed to mention that he and Franklin Delano Roosevelt had joined at Yalta to deliver Eastern Europe to Stalin, with Alger Hiss, the originator of the plan, beaming in the background. Not a single journalist, anywhere in the world, mentioned Churchill's overwhelming personal complicity in creating and maintaining the dire situation which he now publicly deplored. ... Although few Americans recognize the name of George Kennan, he ... was the bureaucrat entrusted with the maintenance of the Cold War in Washington ... spent many years travelling in Czarist Russia on "missionary work" for the world Communist movement. He was entrusted with many millions of dollars by Jacob Schiff, known as "A Prince in Israel", who was born in the

Rothschild house in Frankfurt, and who, according to his grandson, John Schiff, had spent twenty-two-million dollars of his, personal funds to bring about the Bolshevik Revolution in Russia. ... George Kennan also worked with Jacob Schiff in financing Japan in the Russo-Japanese War of 1905 ... Kennan, .. actually drafted the text of the Marshall Plan. ... It was a permanent guarantee that the captive nations of Eastern Europe, which had been delivered to Stalin by Roosevelt, Churchill and Alger Hiss at Yalta, would never be liberated from Communism.

King Ibn Saud was being influenced by Juan Pablo Pérez Alfonzo of Venezuela who cut a similar 50/50 deal with Jersey Standard Oil (Rockefeller) and Royal Dutch Shell. (*Rothschild's own controlling interest*) This 50/50 deal accorded the American oil companies a tax break equivalent to 50% of their profits on oil sales, the other 50% was diverted to King Ibn Saud via the US Treasury. Britain withdraws an offer to build the Aswan Dam (which would later create 50% of Egypt's electrical production). Nasser allowed the Soviets to build it and stated his plan to nationalize Egypt's Suez Canal. He pressed for the British to remove their troops. That same year Israel attempted a false flag operation to prevent the British from leaving the Suez and to paint Nasser's party as terrorists. It was known as Operation Susannah better known today as the Lavon Affair since Israel's Defense Minister Pinhas Lavon (a fall guy) was forced to resign.

- **1957:** [IAmTheWitness](#) James de Rothschild dies and it is reported (by the Rothschild owned media) that he bequeaths a large sum of money to the state of Israel to pay for the construction of their parliament building, the Knesset. He states that the Knesset should be, "a symbol, in the eyes of all men, of the permanence of the State of Israel." On page 219 of his book, "Tales of the British Aristocracy," L.G. Pine, the Editor of Burke's Peerage, states that the Jews, "have made themselves so closely connected with the British peerage that the two classes are unlikely to suffer loss which is not mutual. So closely linked are the Jews and the lords that a blow against the Jews in this country would not be possible without injuring the aristocracy also." Maurice de Rothschild dies in Paris. 1962: de Rothschild Frères establishes Imétal as an umbrella company for all their mineral mining interests. Frederic Morton publishes his book, The Rothschilds, in which he states, "Though they control scores of industrial, commercial, mining and tourist corporations, not one bears the name Rothschild. Being private partnerships, the family houses never need to, and never do, publish a single public balance sheet, or any other report of their financial condition." This attitude reveals the true aim of the Rothschilds, to eliminate all competition and create their own worldwide monopoly. 1963: On June 4th President John F. Kennedy (the 35th President of the United States 1961 – 1963) signs Executive Order 11110 which returned to the U.S. government the power to issue currency, without going through the Rothschilds owned Federal Reserve. Less than 6 months later on November 22nd, president Kennedy is assassinated by the Rothschilds for the same reason as they assassinated President Abraham Lincoln in 1865, he wanted to print American money for the American people, as oppose to for the benefit of a money grabbing war mongering foreign elite. This Executive Order 11110, is rescinded by President Lyndon Baines Johnson (the 36th President of the United States 1963 to 1969) on Air Force One from Dallas to Washington, the same day as President Kennedy was assassinated. ... Another, and probably the primary, reason for Kennedy's assassination is however, the fact that he made it quite clear to Israeli Prime Minister, David Ben-Gurion, that under no circumstances would he agree to Israel becoming a nuclear state. The Israeli newspaper Ha'aretz on February 5, 1999, in a review of, Avner Cohen's book, "Israel and the Bomb," states the following, "The murder of American President John F. Kennedy brought to an abrupt end the massive pressure being applied by the U.S. administration on the government of Israel to discontinue the nuclear program...The book implied that, had Kennedy remained alive, it is doubtful whether Israel would today have a nuclear option." Edmond de Rothschild establishes La Compagnie Financière Edmond de Rothschild (LCF), in Switzerland as a venture capital house. This later develops into an investment bank and asset management company with many affiliates. He also marries his wife Nadine and they have a son, Benjamin de Rothschild. 1965: Israel illegally obtains enriched uranium from NUMEC (Nuclear Materials and Equipment Corporation).

Philipp Brothers, largely in the person of their top trader Marc Rich, began by selling small quantities of Iranian crude oil to independent refiners. The oil shocks of 1973 and 1979, which were orchestrated by the financier oligarchy under the cover of the OPEC oil embargo and the fall of the Shah in Iran, resulted in a shift in oil pricing away from long-term contracts toward the Rotterdam-based spot market. By "spot" is meant, that one buys the oil at a market only 24-48 hours before one takes physical (spot) delivery, as opposed to buying it 12 or more months in advance. - [PhilipCoppens](#) Over the course of 1998 and early 1999, as the scandal (Clinton / [Lewinsky](#)) dominated American politics, Clinton seemed to take inspiration from the movie (Wag the Dog) and engaged US forces in three military campaigns. There was Operation Desert Fox, a three-day bombing campaign in Iraq, which took place at the time when the House of Representatives debated articles of impeachment against Clinton. There was Operation Infinite Reach, a pair of missile strikes against suspected terrorist targets in Sudan and Afghanistan, just three days after Clinton admitted in a nationally televised address that he had indeed had an inappropriate relationship with Lewinsky. Thirdly, Operation Allied Force, a months-long [NATO](#) bombing campaign against Serbia that began just weeks after Clinton was acquitted in his Senate impeachment trial. No wonder that critics charged that these operations were an attempt to distract public attention away from the Lewinsky scandal; Serb state television went so far as to broadcast Wag the Dog in the midst of the NATO attacks on Serbia. *or can you also surmise that the Lewinsky affair was raised to disguise the NATO actions?*

According to IRIB, "Islamic Times", quoted by Farsnews, the Secretary of State Hillary Clinton knew about the terrorist operation, which targeted the security complex in Damascus. On tour last week in the region, Clinton tried to coordinate the operation and the countries that are involved, namely, Qatar, Saudi Arabia, Israel and Turkey. The head of diplomacy even oversaw the content of the debates that took place in the context of multiple security meetings of the above countries, before the terrorist attack. No wonder, therefore, if the Israeli authorities claimed, following their meeting with Clinton, the Assad regime's days are numbered.(*****SO ARE HER'S) Three days before the attack, Israel has even made the decision to deploy troops along the borders with Syria. As for Saudi Arabia and Qatar, the new head of the intelligence services, Prince Bandar bin Soltan and Qatari Prime Minister Hamad bin Jassem had assisted, while two preparatory meetings in the presence of intelligence agents. Last week, the press had reported a secret meeting between Hamad bin Jassem and a senior Israeli security. - 1967: [IAmTheWitness](#) The treatment of the Palestinians by the Zionist Jews, finally ignites enough anger in the Arab world for Egypt, Jordan and Syria to mobilise on Israel's borders. All of these three countries are suddenly attacked by Israel and as a result the Sinai which included Gaza was stolen from Egypt, and the West Bank and the Jordan River stolen from Jordan. ... As a result of this, on June 8, the Israelis launch an attack on the USS Liberty with Israeli aircraft and motor torpedo boats, in an effort to blame it on Egypt, to bring America into the war on their side, and of course follow to the

letter, their Mossad motto, "By Way Of Deception, Thou Shalt Do War." ... As a result of their attack, 34 American servicemen were killed and 174 wounded. Israel lies as usual, claiming it mistook this warship that was flying a large United States flag, for an ancient out-of-service Egyptian horse carrier El Quseir, that was 180 feet shorter. They also claim the ship was in the war zone, when it was actually in international waters, far from any fighting. The Israeli's attack on this warship lasts for 75 minutes during which time they shoot up one of the United States flags, resulting in the sailors desperately raising another one. ... In the aftermath of this attack, the American sailors who survived are warned by the United States military not to discuss the matter with anyone due to, "national security." This story gets no prominence in the Rothschild controlled mainstream media and as usual Israel is in no way even rebuked for their crimes by their subservient country of America. ... The following day, June 9th, Israel illegally occupies the Golan Heights which it seizes from Syria. This area goes on to provide Israel with one third of its fresh water. ... Israeli General Matityahu Peled, is quoted in Ha'aretz (19 March 1972) with the following statement, "The thesis that the danger of genocide was hanging over us in June 1967 and that Israel was fighting for its physical existence is only bluff, which was born and developed after the war." Another sickening and deceptive statement but again at least he's consistent with the Mossad motto, "By Way Of Deception, Thou Shalt Do War." de Rothschild Frères is renamed Banque Rothschild. 1968: Noémie Halphen, wife of Maurice de Rothschild dies.

- **2012** [WMR](#) The controversy surrounding the Vatican Bank, formally known as the Institute of Works of Religion (IOR), began when J.P. Morgan Chase closed an IOR account at its branch in Milan, citing a lack of transparency. That was followed by the firing by the IOR's supervisory board of Ettore Gotti Tedeschi, a former Banco Santander executive, for pushing for more transparency for the Vatican Bank and compliance with the EU's laws on financial transparency. However, the J.P. Morgan Chase action was, according to our sources, prompted by Sunstein and his colleagues at the Treasury and State Departments. On March 7, the State Department, for the first time, added the Holy See to its list of money-laundering nations. That move triggered a wave of financial pressure on the IOR and Vatican, which was aided and abetted by Tedeschi. The IOR board then ousted Tedeschi. ... WMR has been told that the Vatican came under pressure after it had backed the initiatives of the BRICS bloc of nations -- Brazil, Russia, India, China, and South Africa -- to seek a realignment of the world's financial system to provide greater influence for the emerging economies of BRICS and a reorientation of financial control away from London (*Rothschild*), Frankfurt (*Warburgs*), New York, and Washington. The Vatican's policy placed it on the list of de facto enemies of Soros, the Rothschild baking cartel, the European Central Bank, and the World Bank/International Monetary Fund.

Trillions in Offshore Accounts ... it's immoral.

- [RT](#) Wealthy tax evaders, aided by private banks have exploited loopholes in tax legislation and stashed over \$21 trillion in offshore funds, says a report. The capital drained from some developing countries since 1970 would be enough to pay off national debts. The findings show the gap between the haves and the have-nots is much larger than previously thought. The document, entitled The Price of Offshore Revisited, was commissioned by The [Tax Justice Network](#) (pdf file) campaign group and leaked to the Guardian. The report provides the most detailed valuation of the offshore economy to date. "The problem here is that the assets of these countries are held by a small number of wealthy individuals while the debts are shouldered by the ordinary people of these countries through their governments," wrote James Henry, expert on tax havens and former chief economist at consultancy McKinsey in his report. The document cites the world's leading private banks as cherry-picking from the ranks of the uber-rich and siphoning their fortunes into tax-free havens such as Switzerland and the Cayman Islands. The wealth of the super-rich is "protected by a highly paid, industrious bevy of professional enablers in the private banking, legal, accounting and investment industries taking advantage of the increasingly borderless, frictionless global economy." WMR has pored through the CIA files and a complicated picture emerges of America's and Israel's top intelligence agencies, in cahoots with Saudi Arabia, establishing financial links and carve out intelligence programs to provide manpower and financial support to Bin Laden and his allies in Afghanistan. It was these very elements that later created the so-called "Al Qaeda," which the late British Foreign Secretary Robin Cook described as nothing more than a "database" of CIA front organizations, financial supporters, and field operatives. However, one component omitted by Cook in the Al Qaeda construct is the Israeli participation. Thanks largely to the CIA station chief in Riyadh in 1986-87, millions of dollars from the Saudi government, particularly then-deputy Prime Minister Prince Abdullah, now King Abdullah, and wealthy Saudi businessmen were funneled to the most radical leader of the Afghan rebels, Abdul Rasul Sayyaf, for whom militant southern Philippines Muslim rebels named their organization, the Abu Sayyaf group.

Laden Experts debate whether or not the al-Qaeda attacks were blowback from the American CIA's "Operation Cyclone" program to help the Afghan mujahideen. Robin Cook, British Foreign Secretary from 1997 to 2001, has written that al-Qaeda and Bin Laden were "a product of a monumental miscalculation by western security agencies", and that "Al-Qaida, literally 'the database', was originally the computer file of the thousands of mujahideen who were recruited and trained with help from the CIA to defeat the Russians." Munir Akram, Permanent Representative of Pakistan to the United Nations from 2002 to 2008, wrote in a letter published in the New York Times on January 19, 2008: The strategy to support the Afghans against Soviet military intervention was evolved by several intelligence agencies, including the C.I.A. and Inter-Services Intelligence, or ISI. After the Soviet withdrawal, the Western powers walked away from the region, leaving behind 40,000 militants imported from several countries to wage the anti-Soviet jihad. Pakistan was left to face the blowback of extremism, drugs and guns. and Wikipedia In mid-1979, about the same time as the Soviet Union deployed troops into Afghanistan, the United States began giving several hundred million dollars a year in aid to the [Afghan Mujahideen](#) insurgents fighting the [Democratic Republic of Afghanistan](#) and the [Soviet Army](#) in [Operation Cyclone](#). Operation Cyclone was the code name for yet another the United States Central Intelligence Agency program to arm terrorists and sow death and destruction for the benefit of American money and power politics. Operation Cyclone is one of the longest and most expensive covert CIA operations ever undertaken; funding began with \$20-30 million per year in 1980 and rose to \$630

million per year in 1987. Funding continued after 1989 as the Mujahideen battled the forces of Mohammad Najibullah's PDPA during the Civil war in Afghanistan (1989–1992). ... and ... Brzezinski has stated that the US provided communications equipment and limited financial aid to the mujahideen prior to the "formal" intervention, but only in response to the Soviet deployment of forces to Afghanistan and the 1978 coup, and with the intention of preventing further Soviet encroachment in the region. and ... The U.S. government has been criticized for allowing Pakistan to channel a disproportionate amount of its funding to controversial Afghan resistance leader Gulbuddin Hekmatyar, who Pakistani officials believed was "their man". Hekmatyar has been criticized for killing other mujahideen and attacking civilian populations, including shelling Kabul with American-supplied weapons, causing 2,000 casualties. Hekmatyar was said to be friendly with Osama bin Laden, founder of al-Qaeda, who was running an operation for assisting "Afghan Arab" volunteers fighting in Afghanistan, called Maktab al-Khadamat and According to author David N. An Iraqi-Iranian war will tear Iraq apart and cause its downfall at home even before it is able to organize a struggle on a wide front against us. Every kind of inter-Arab confrontation will assist us in the short run and will shorten the way to the more important aim of breaking up Iraq into denominations as in Syria and in Lebanon. Dunham re-applied for her U.S. passport in Honolulu on April 27, 1986. She supposedly left Hawaii for Indonesia in 1988 to complete her PhD in anthropology from the University of Hawaii. However, she also reportedly lived in Pakistan from 1987 to 1992 working for the Asian Development Bank. Dunham was officially registered as a student at the University of Hawaii from the fall semester of 1984 to the summer semester of 1992, when she finally earned her PhD. Dunham's two-year employment contract for the Ford Foundation ended in December 1982, before which she may have been involved as a Javanese speaker with the Suriname exile community to help plan the CIA's overthrow of the country's left-wing dictator Desi Bouterse. Dunham reportedly returned to Jakarta to work for Ford until 1984. There is no indication as to when Dunham went to Ghana but in the mid-1980s, the country and one of its northern neighbors, Burkina Faso, were hotbeds for CIA activity.

International the global voice of the Jewish community, is an international Jewish organization ... and the World Jewish Congress. George Soros is a Rothschild Zionist agent, not only donates to Obama but is one of Obama's puppeteers. Obama's advisors and czars who are connected to Rothschild Zionism include Cass Sunstein. Cass appointed two Rothschild Zionists (Carol Browner & Todd Stem) to take charge of the climate change and global warming. Ken Feinberg was appointed by Obama to be the special pay master for the companies bailed out by our stimulus money and yes, Ken is connected to the Rothschild Zionists. Economic Czar – Larry Summers, Pay Czar – Kenneth Feinberg, Guatanomo/Military Jails Czar -Daniel Fried, Car Czar – Steven Rattner, Border Czar and there's so much more. So when you wake up tomorrow and wonder why Obama acts and sounds like a crazy man – you know who the real puppeteers are and you'd better believe that David Axelrod is destroying our Nation under the watchful eye of the Rothschild Zionists.

- Webster Tarpley Obama is a creature and puppet of finance capital and of the Wall Street bankers and investment bankers, as represented by the Trilateral Commission, Bilderberger Group [more](#) , Council on Foreign Relations, Skull and Bones Society, Ford Foundation, and Chicago School of Friedmanite economics. The family business which Obama inherited from his mother (a Ford Foundation anthropologist and counterinsurgency operative who also worked for the World Bank and the US Agency for International Development) was to work for foundations. And this is what Obama has done in his life, working at various times for or with the Gamaliel Foundation, the Woods Fund, the Joyce Foundation, the Annenberg Foundation,

While Andre Malraux was meeting with Pres. John Kennedy from 1961 through 1963, the future Grand Master of the Prieuré de Sion (1963-81), Gaylord Freeman, was also meeting with JFK. As Chairman of the Board of the First National Bank of Chicago, a Federal Reserve Bank and BIS member bank, and its parent, the First Chicago Corporation, Gaylord Freeman held official positions in several U.S. administrations – Eisenhower, Kennedy, Nixon, Ford and Carter. Also on the Board of First Chicago was Thomas G. Ayers, the father of Bill Ayers. Under the patronage of Thomas G. Ayers, young Barack Obama made the right connections in Chicago's Jewish community thus insuring the success of his career. Thomas Ayers also financed Obama's rise to power as the President of the United States.

Out of these troubled times a new world order can emerge. We are now in sight of a United Nations that performs as envisioned by its founders." But who were the founders of the U.N. and what exactly were their intentions? At least 43 members of the U.S. delegation to the founding conference in San Francisco were also members of the CFR. The Secretary General at the U.N. founding conference in 1945 was a U.S. State Department official named Alger Hiss. It was later determined that Alger Hiss was a Soviet spy. He was convicted of perjury for lying about his pro-Soviet activities. And Hiss was not just an aberration. The U.N. has always chosen socialist one-worlders for leaders.]

- **1990** [Wikipedia](#) [Adnan Khashoggi](#) He was implicated in the Iran–Contra affair as a key middleman in the arms-for-hostages exchange along with Iranian arms dealer Manucher Ghorbanifar and, in a complex series of events, was found to have borrowed money for these arms purchases from the now-bankrupt financial institution the Bank of Credit and Commerce International (BCCI) with Saudi and US backing. In 1988, Khashoggi was arrested in Switzerland, accused of concealing funds, held for three months and then extradited to the United States where he was released on bail and subsequently acquitted. In 1990, a United States federal jury in Manhattan acquitted Khashoggi and Imelda Marcos, widow of the exiled Philippine President Ferdinand Marcos, of racketeering and fraud. 6] see also: [Khashoggi](#), along with Ramy El-Batrawi, was the principal financier behind GenesisIntermedia, Inc. ...Valerie Red Horse... Khashoggi's unwillingness to pay his margin loan to Native Nations Securities, and Native Nations (and Red Horse's) inability to pay its debts to MJK Clearing, began a series of bankruptcies that ended in the largest payout in Securities Investor Protection Corporation history. DAN GLICKMAN (D-Kansas) In the Clinton administration he became head of the Department of Agriculture. BCCI/Banca Nazionale del Lavoro were implicated in a huge Atlanta scandal where billions of U.S. dollars disguised as "Agriculture" loans, were used by Daddy Bush to supply weapons to Iraqi strongman Saddam Hussein. Glickman was reportedly part of the coverup. Sen. ROBERT BYRD (D-West Virginia) There is strong reason to believe that he and some of his staff members know a lot about the murder in 1991 of Journalist/Author Danny Casolaro in West Virginia, also about the apparent frame-up of computer wizard Michael Riconosciuto.
- **1991** [Chicago Tribune](#) WASHINGTON — Was the recent mysterious death of a journalist investigating a link between BCCI and high government officials really a suicide? Did Washington lawyers Clark Clifford and Robert Altman know what BCCI was really up to? Who else knew? When did they know it? And how high does the trail lead? The rumor mill has been fueled by the death of free-lance journalist Joseph Daniel Casolaro, who was found with his wrists slashed in the bathroom of a West Virginia motel room Aug. 10 after meeting a source for a book he was researching-on, among other things, the BCCI scandal. Casolaro was out to prove a theory that linked the Iran-contra affair; the so-called October Surprise deal, which the Reagan presidential campaign is alleged to have struck with Iran in 1980 for the delayed release of U.S. hostages; and the Inslaw case, in which the Justice Department is accused of illegally selling software to the Middle East. BCCI, he believed, was the financial conduit for all these deals. Casolaro was not the only one investigating the scandals, although no one has yet managed to prove the speculative link. Last month a British journalist working for the Financial Times of London was found murdered in a Guatemala hotel room shortly after telling his editors in London he had stumbled on a story linking BCCI with illegal arms transfers between Guatemala and the U.S. Congress will hold hearings on the October Surprise allegations in the fall.

He was involved in deals with notable BCCI luminaries [Agha Hasan Abedi](#), [Mochtar Riady](#) and [Ghaith Pharaon](#) and with BCCI's largest borrower, P. S. Prasad, and joined with Arkansas-based power investor [Jackson Stephens](#) in facilitating BCCI's takeover of Financial General Bankshares. (See [OpenJurist](#)) Lance and Stephens made millions in the wake of BCCI's collapse. In January 1978, Lance sold his stock in National Bank of Georgia to [Ghaith Pharaon](#), while on the same day, BCCI founder [Agha Hasan Abedi](#) paid off Lance's \$3.5 million loan at the First National Bank of Chicago. The following month, Lance helped BCCI with their hostile bid for Financial General Bankshares of Washington. The attempt failed, but three years later, BCCI secretly acquired the bank (renamed First American Bankshares) using 15 Arab investors as nominees. The next year, Lance introduced [Jimmy Carter](#) to Abedi. In 1987, First American Bankshares acquired National Bank of Georgia from Pharaon. [BCCI](#) was terminated in 1991 and it was subsequently revealed that the bank had done many illegal activities, including secretly controlling several U.S. banks, in violation of federal banking statutes.

On 24 February the ground campaign commenced which was to last 100 hours until on February 28 when a horrendous war crime occurred. ... This crime was the slaughter of 150,000 Iraqi troops with fuel air bombs. These Iraqis were fleeing on a crowded highway from Kuwait to Basra. President George Herbert Walker Bush ordered United States military aircraft and ground units to kill these surrendering troops, they were then bulldozed into mass unmarked graves in the desert, some still alive. ... President Bush then ordered a cessation of hostilities. What was the significance of this slaughter and President Bush declaring the war over on this day? Well it was the day the, "Day of Purim," fell on this year. This the day the Jews celebrate their victory over Ancient Babylon, now based within the borders of Iraq and a day when the Jews are encouraged to get bloody revenge against their perceived enemies. ... At the Bilderberg Conference on June 6 to 9 of this year, in Baden-Baden, Germany, David Rockefeller (a Rothschild) made the following statement, "We are grateful to the Washington Post, the New York Times, Time Magazine, and other great publications whose directors have attended our meetings and respected their promises of discretion for almost 40 years. It would have been impossible for us to develop our plan for the world, if we had been subjected to the lights of publicity during those years. This is right on cue for the Rothschilds, after they had privatised Britain's state owned assets during the 1980's, driven the share price up, and then collapsed the markets so they could buy them up for pennies on the pound, a carbon copy of what Nathan Mayer Rothschild did to the British economy 180 years before, in 1812. ... Both, through their executive roles at Deutschebank Alex Brown [Wikipedia](#) were in a position to be familiar with the Khashoggi/Marcos gold deposits at that Bank. Remember that Krongard managed the merger between Bankers Trust ([Tariganter](#)) and Deutschebank Alex Brown [Wikipedia](#), and that Banker’s Trust is the bank that received significant amounts of the Marcos gold with the assistance of Khashoggi. 4. The Deutsche Bank was identified as a major gold trading partner with Barrick in both the Blanchard and Howe law suits. 5. Enron - an energy trading company - had created a gold bullion and gold derivatives trading operation. When Enron went bankrupt, Enron On-Line was bought by UBS. A competitive market for trading energy and gold bullion was set-up by former Deutschebank executive Mayo Shattuck as new CEO at Constellation Energy, using former Enron employees. These five points suggest that if it doesn’t exist already, there exists the potential for a cozy relationship between the US oil cartel, the German Banking cartel and Barrick.

Adnan Khashoggi - is first and foremost one of the world’s elite arms merchants. Referred to as a “notable member of this elite group” he was described in the Small Arms Survey of 2004 with the following words: "Some brokers with powerful political clout, like Khashoggi, are virtually ‘untouchable’ insofar as their relationships and dealings involving government officials at the highest echelons go. Any persecution of these brokers, or denunciation of their activities as illicit, could result in the incrimination of states, or the exposure of embarrassing covert activities by the governments themselves." Small Arms Survey, Graduate Institute of International Studies in Geneva, Switzerland, 2004] Khashoggi has his fingerprints on so many aspects of 9/11 that he may well be “the” key conspirator. Gaining notoriety by being at the heart of the Iran-Contra ‘guns for drugs scandal’ during the Reagan administration, Khashoggi has since leveraged his notoriety to the point where he is a familiar face with film and rock stars, presidents, sultans, sheiks, kings and queens, investment bankers and of course, war lords. While most famous for his connections

with the Arab banking community, he is also well established with the Deutsche Bank, most recently continuing his notoriety in the U.S. press by being sued, with Deutsche Bank Securities of Canada , for fraudulent manipulation of security prices. In the case of MJK Clearing vs Deutsche Bank Securities, Adnan Khashoggi et al., filed in December 2002, the facts presented suggest that in addition to misrepresentation by the defendants, an ‘unanticipated drop in stock prices’ on September 11, 2001 enhanced their ability to increase the payout of the purported fraud. (Business Week, May 2003.) As part of the ever increasingly tangled web of relationships, Khashoggi also had ties not only to the Deutsche Bank, but the Bronfman family as well (additional key investors in Barrick) by way of another Deutsche Bank executive: Mayo Shattuck. "Khashoggi, a trusted adviser to the Saudi royal family, is one of the "high net worth individuals" whose past investments have been handled by Mayo Shattuck, formerly head of Alex. Brown (mentioned earlier). ". In 1997, Mayo Shattuck was made Trustee of the Bronfman (mentioned earlier) family fortune. He resigned as CEO of Deutsche Banc Alex. Brown on 12 September 2001, the day following the tragic events in New York City and Washington, DC--the day that has come to be known as "9-11" David G. Guyatt, Nexus Magazine, Volume 10, Number 6, October- November 2003] His ties to the Bronfmans went well beyond Shattuck, as Khashoggi and Bronfman would become investment partners in Barrick, through Trizec Hahn (landlord to the headquarters of Halliburton and Enron, in the same building). Khashoggi was also identified as an early participant in the October Surprise meetings and subsequent Iran-Contra deals. He would later create Oryx, which funded Hoffman Aviation –the training school where many of the hijackers validated their “education” visas. After the invasion of Iraq, Adnan Khashoggi (Genesis Aviation) became a business partner with retired General William Lyon (on the Board of Kellstrom Industries, Inc., an Israeli owned company) in a venture called Wings of Democracy, an attempt to penetrate the commercial Iraq air business. Lyon is the founder of several university diploma-mill operations in California (American Commonwealth University, aka William Lyon University). These operations are directly associated THE SEPTEMBER 11 COMMISSION REPORT Page 296 with the entry to the U.S. by two of the 9/11 hijackers in the early 1990s. Lyon is a major Republican fund raiser in Orange County, associate of Karl Rove, major financial backer of the Swift Boat Veterans, and keynote speaker at the Republican national convention. Khashoggi is also of interest due to his relationship with Yaslem Bin Laden, a known business partner of his on a limited number of investments. In this case, Yaslem admits to have recruited young Arabs from across the world for Huffman Aviation, a school owned by his former and ongoing business partner, Adnan Khashoggi. Similary, Khashoggi has banks in Azerbaijan, where he easily could have coordinated the recruitment of hijackers with the assistance of his other business associates Richard Secord and David Kimche (Mossad). · Sheik Kamal Adham [see Capcom](#) The last and least mentioned investor in Oryx was Sheik Kamal Adham, [see Capcom](#) director of Saudi intelligence (1963-79), brother-in-law of King Faisal and the CIA's key liaison in the Arab world, a relationship established with George HW Bush when he was Director of the CIA

They also give the details of Obama's involvement in a slumlord business largely operating out of the Chicago based Davis, Miner & Barnhill law firm, which hired Obama in 1993, with his boss, Allison Davis, reaping in the profits with Rezko's development company, Rezmar. - **1993** [Physics911](#) Nuclear False Flag ... Was the [1993 World Trade Center bombing](#) related to 9/11? The 1993 explosion under the World Trade Center complex in New York City was the first major terrorist event on American soil. And, as many claim, this could well have paved the way for the events of September 11, 2001. The explosion along with the trials, which started soon after the September 1993 Oslo Agreement between Israel and the PLO, brilliantly solved many troublesome problems at one stroke for the US and its allies, Israel and Egypt. The convictions that flowed from the trials proved that the U.S. government was able to obtain terrorism convictions with virtually no evidence against defendants with no motives and no ability to have carried out the explosion. Despite the evidence that the act was facilitated by agents connected to and protected by the US government, with funds from supposedly unidentifiable sources and leadership, there has been no doubt expressed in the mainstream media about the legitimacy of the convictions. In short, the WTC 1993 bombing trials demonstrated the cynical use that the United States — with the cooperation of its courts and the media — would make of its Muslim community to carry out its new, post-Cold War geopolitical agenda.

The Washington Post reports US intelligence has intercepted a conversation in which two Israeli officials had discussed the possibility of getting a confidential letter that then-Secretary of State Warren Christopher had written to Palestinian leader Yasser Arafat. One of the Israelis, identified only as, "Dov," had commented that they may get the letter from, "Mega," the code name for Israel's top agent inside the United States. US ambassador to Israel, Martin Indyk, complains privately to the Israeli government about heavy-handed surveillance by Israeli intelligence agents. Israeli agents place a tap on Ashkenazi Jew and daughter of a Rabbi, Monica Lewinsky's, phone at the Watergate and record phone sex sessions between her and President Bill Clinton. The Ken Starr report confirms that Clinton warned Lewinsky their conversations were being taped and ended the affair. Interestingly, at the same time, the FBI's hunt for, "Mega," is called off. - **1998**, TheVertigo Russian investigators traced a \$300,000 ransom payment from the Bank of New York, which opened up the Bank of New York/Russian Mafiya bank scandal. This scandal would later be shown to be connected to the Swiss banks and the Deutsche Bank. "The plundering exemplified in the BNY case is of an immense magnitude, ...in a report prepared by Fitch IBCA, an international credit rating agency, that estimated a total of \$136 billion was taken out of all of Russia between 1993 and 1998. this ... lined the pockets of the new Russian kleptocracy, but also flowed into the coffers of US and European financial institutions. (The BNY case may well involve a number of major European banks. On Tuesday, the Wall Street Journal, citing sources familiar with the investigation, said that Credit Suisse, Union Bank of Switzerland (UBS), Dresdner Bank, Westdeutsche Landesbank and Banque Internationale of Luxembourg are being scrutinized for their role in the matter.)" Bank of New York probe exposes ties between Western financiers and Russian Mafia, World Socialist Website, James Brookfield, 8/27/ 1999] It is of significant note that two primary owner-investors in two of the key banks involved in the Russian money laundering scandal were Bruce Rappaport, a Swiss- Israeli banker who was involved with Khashoggi and George Bush Sr. in the Iran- Contra, October Surprise and BCCI scandals, and Dr. Alfred Hartmann. "...what has never been identified in a single major Western press

investigation was that the Rothschild group was at the heart of the vast illegal web of BCCI. The key figure was Dr. Alfred Hartmann, the managing director of the BCCI Swiss subsidiary, Banque de Commerce et de Placement SA; at the same time, he ran the Zurich Rothschild Bank AG, and sat in London as a member of the board of N.M. Rothschild and Sons, Hartmann was also a business partner of Helmut Raiser, friend of de Picciotto, and linked to Nordex. Hartmann was also chairman of the Swiss affiliate of the Italian BNL bank, which was implicated in the Bush administration illegal transfers to Iraq prior to the 1990 Iraqi invasion of Kuwait. The Atlanta branch of BNL, with the knowledge of George Bush when he was vice president, conducted funds to Helmut Raiser's Zug, Switzerland company, Consen, for development of the CondorII missile program by Iraq, Egypt, and Argentina, during the Iran-Iraq War. Hartmann was vice-chairman of another secretive private Geneva bank, the Bank of NY-Inter-Maritime Bank, a bank whose chairman, Bruce Rappaport, was one of the illegal financial conduits for Col. Oliver North's Contra drugs-for-weapons network during the late 1980. North also used the BCCI as one of his preferred banks to hide his illegal funds." See Alfred Hartman [ZoomInfo](#) [enlarge](#)“ [LaRouchePub](#) The Real Story of the BCCI Two rather critical facts, however, were invariably left out of the story—even during the lengthy soap opera trial of former BCCI attorney Robert Altman. The first fact was the extraordinarily close alliance between BCCI and some of Britain's most powerful financial houses and aristocratic families. The second fact was that BCCI was created, and then built up as a "world class" bank, primarily to manage the covert funds that poured into the secret war in Afghanistan. Hardly any mention was made of the fact that BCCI was in the middle of the Afghan effort—serving as the de facto central bank for a multibillion-dollar Golden Crescent illegal arms-for-drugs trade that mushroomed during 1979-90. ... In 1976, BCCI established a Swiss base of operations by purchasing 85% of Banque de Commerce et Placements (BCP) of Geneva. The remaining 15% was retained by the original owner, Thesarus Continental Securities Corp., a wholly owned subsidiary of Union Bank of Switzerland (UBS). Under BCCI control, BCP was managed by Alfred Hartmann, a former senior official of UBS. Hartmann eventually became chief financial officer for BCC Holding, and was the person most accountable for the "lost" \$23 billion. While serving as BCCI's "man in Switzerland," Hartmann was always operating on behalf of the Rothschild family. Hartmann was president of Rothschild Bank AG of Zurich, was vice-chairman of NY-Intermaritime Bank of Geneva (run by Mossad operative Bruce Rappaport), and was a member of the board of directors of the elite N.M. **Rothschild** and Sons in London.

Hartmann was also chairman of the Swiss affiliate of the Italian BNL bank, which was implicated in the Bush administration illegal transfers to Iraq prior to the 1990 Iraqi invasion of Kuwait. The Atlanta branch of BNL, with the knowledge of George Bush when he was vice-president, conduited funds to Helmut Raiser's Zug, Switzerland company, Consen, for development of the Condor II missile program by Iraq, Egypt, and Argentina, during the Iran-Iraq War. Hartmann was vice-chairman of another secretive private Geneva bank, the Bank of NY-Inter-Maritime Bank, a bank whose chairman, Bruce Rappaport, was one of the illegal financial conduits for Col. Oliver North's Contra drugs-for-weapons network during the late 1980. North also used the BCCI as one of his preferred banks to hide his illegal funds. Rich's, Reichmann's, and Soros's Israeli links According to reports of former U.S. State Department intelligence familiar with the Soros-case, Soros's Quantum Fund amassed a war chest of well over \$10 billion, with the help of a powerful group of "silent" investors who let Soros deploy the capital to demolish European monetary stability in September 1992. Among Soros's silent investors, these sources say, are the fugitive metals and oil trader Marc Rich, based in Zug, Switzerland; and Shaul Eisenberg ([ThinkAboutIt](#)) ([Globes](#), Rothschild), a decades-long member of Israeli Mossad intelligence, who functions as a major arms merchant throughout Asia and the Near East. Eisenberg was recently banned from doing business in Uzbekistan, where he had been accused by the government of massive fraud and corruption. A third Soros partner is Israel's "Dirty Rafi" Eytan, who served in London previously as Mossad liaison to British intelligence. Rich was one of the most active western traders in oil, aluminum, and other commodities in the Soviet Union and Russia between 1989 and 1993. This, not coincidentally, is just the period when Grigori Luchansky's Nordex Group became a multibillion-dollar company selling Russian oil, aluminum, and other commodities. The IMF then swoops in and orders the now-indebted country to privatize its economy – with the banker-owned multinationals picking up state assets for pennies on the dollar as part of “debt reorganization”. One of the Eight Families’ tentacles facilitates this kabuki dance for a healthy fee. More often than not it is Goldman Sachs. No case illustrates this type of IMF official mugging better than that of the mysterious Bank of Credit & Commerce International (BCCI). see terms: Rockefeller, CDB, Caribbean Development Bank... BCCI – launched by Bank of America – was a CIA drug money laundry which moonlighted as mugger for the IMF bankers. The IMF helped BCCI set up shop in numerous countries, including virtually every Latin American nation. ... The racket worked something like this: BCCI, in addition to providing loans for deposits, would offer to broker a country’s debt with the IMF if the central bank was willing to deposit funds at BCCI’s local branch. Those countries that cooperated with the IMF would be rewarded with more loans. Those that refused never saw their money again. Most of the \$20 billion that disappeared when BCCI was shut down belonged to Third World central banks whose governments had not bent over far enough for the IMF. This outright theft left the poorest, most debt-ridden countries in the world even more impoverished. African nations were hardest hit. BCCI sponged over \$2 billion from the African continent. Even in England, where \$400 million was lost by depositors when BCCI closed shop, most of the money belonged to African immigrants of marginal means who believed BCCI’s claim of being “a bank for the world’s poor”. BCCI specialized in facilitating capital flight from poor countries by helping rich Third World nationals start offshore accounts with the bank. BCCI would hire siblings of wealthy clients to man its local branches. ... The global elite had once again shaken down the world’s poor.

Out on bail awaiting trial, dual US-Syrian citizen, Antoin 'Tony' Rezko, was rousted out of bed by police pounding on the doors of his Chicago mansion the morning of Monday, January 28. According to the Associated Press: "U.S. District Judge Amy J. St. Eve jailed Rezko...saying he had disobeyed her order to keep her posted on his financial status. Among other things, he failed to tell her about a \$3.5 million loan from London-based Iraqi billionaire Nadhmi Auchi -- a loan that was later forgiven in exchange for shares in a prime slice of Chicago real estate. Rezko gave \$700,000 of the money to his wife and used the rest to pay legal bills and funnel cash to various supporters." Funds from Auchi's loan may have helped finance a complex series of transactions between Rezko and Democratic Presidential candidate Illinois Senator Barack Obama involving the 2005 purchase of Obama's Chicago mansion and Rezko's purchase of an adjoining landlocked parcel. o **1976 LaRouchePub BCCI became a "crown jewel" in the British offshore hot money system because of its ties to the City of London (**Rothschild**)**. In 1976, BCCI established a Swiss base of operations by purchasing 85% of Banque de Commerce et Placements (BCP) of Geneva. The remaining 15% was retained by the original owner, Thesarus Continental Securities Corp., a wholly owned subsidiary of Union Bank of Switzerland (UBS). Under BCCI control, BCP was managed by Alfred Hartmann, a former senior official of UBS. Hartmann eventually became chief financial officer for BCC Holding, and was the person most accountable for the "lost" \$23 billion. While serving as BCCI's "man in Switzerland," Hartmann was always operating on behalf of the Rothschild family. Hartmann was president of Rothschild Bank AG of Zurich, was vice-chairman of NY-Intermaritime Bank of Geneva ([EuropeBanks](#)) (run by Mossad operative Bruce Rappaport), and was a member of the board of directors of the elite N.M. ◦ **1995** LaRouchePub Two rather critical facts, however, were invariably left out of the story—even during the lengthy soap opera trial of former BCCI attorney Robert Altman. The first fact was the extraordinarily close alliance between BCCI and some of Britain's most powerful financial houses **Rothschild** and aristocratic families. The second fact was that BCCI was created, and then built up as a "world class" bank, primarily to manage the covert funds that poured into the secret war in Afghanistan. Hardly any mention was made of the fact that BCCI was in the middle of the Afghan effort—serving as the de facto central bank for a multibillion-dollar Golden Crescent illegal arms-for-drugs trade that mushroomed during 1979-90. When the last of the Red Army troops pulled out of Kabul in February 1989, the massive British-devised and American-led covert action program in support of the Afghan mujahideen began to wind down. BCCI lost its raison d'être, and went the way of the 1960s-era Investors Overseas Service (IOS), and the Vietnam War-era Nugen Hand Bank of Australia: **The money was siphoned out, a diversionary scandal was manufactured, and its doors were shut.**

No investigation is undertaken as to what they were doing there. It is discovered that US drug agents' communications have been penetrated. Suspicion falls on two companies, AMDOCS and Comverse Infosys, both owned by Israelis. AMDOCS generates billing data for most US phone companies and is able to provide detailed logs of who is talking to whom. ... Comverse Infosys builds the tapping equipment used by law enforcement to eavesdrop on all American telephone calls, but suspicion forms that Comverse Infosys, which gets half of its research and development budget from the Israeli government, has built a back door into the system that is being exploited by Israeli intelligence and that the information gleaned on US drug interdiction efforts is finding its way to drug smugglers. The investigation by the FBI leads to the exposure of the largest foreign spy ring ever uncovered inside the United States, operated by Israel. Half of the suspected spies have been arrested when 9-11 happens. On 9-11, 5 Israelis are arrested for dancing and cheering while the World Trade Towers collapse. Supposedly employed by Urban Moving Systems, the Israelis are caught with multiple passports and a lot of cash. Two of them are later revealed to be Mossad. As witness reports track the activity of the Israelis, it emerges that they were seen at Liberty Park at the time of the first impact, suggesting a foreknowledge of what was to come. The Israelis are interrogated, and then eventually sent back to Israel. The owner of the moving company used as a cover by the Mossad agents abandons his business and flees to Israel. The United States Government then classifies all of the evidence related to the Israeli agents and their connections to 9-11. All of this is reported to the public via a four part story on Fox News by Carl Cameron. Pressure from Jewish groups, primarily AIPAC, forces Fox News to remove the story from their website. Two hours prior to the 9-11 attacks, Odigo, an Israeli company with offices just a few blocks from the World Trade Towers, receives an advance warning via the internet. The manager of the New York Office provides the FBI with the IP address of the sender of the message, but the FBI does not follow this up. The FBI is investigating 5 Israeli moving companies as possible fronts for Israeli intelligence. ... It is revealed that prior to the attack millions of dollars of put options on both American Airlines and United Airlines, were traded. The FBI have promised to followed the purchasers up, but have never revealed their findings. That is because this would lead directly to Israel, the state behind the 911 attacks. Following the World Trade Center attack, anonymous letters containing anthrax are sent to various politicians and media executives. Like the 9-11 attack this is immediately blamed on Al-Qaeda, until it is discovered that the anthrax contained within those letters is a specific type of weaponized anthrax made by a United States military laboratory. ... The FBI then discover that the main suspect for these anthrax letters is a Ashkenazi Jew, Dr. Philip Zack, who had been reprimanded several times by his employers due to offensive remarks he made about

Arabs. Dr. Philip Zack, was caught on camera entering the storage area where he worked at Fort Detrick which is where the Anthrax was kept. - **2001 [History of the Money Changers](#)** Professor Joseph Stiglitz, former Chief Economist of the World Bank, and former Chairman of President Clinton's Council of Economic Advisers, goes public over the World Bank's, "Four Step Strategy," which is designed to enslave nations to the bankers. I summarize this below, Step One: Privatization. This is actually where national leaders are offered 10% commissions to their secret Swiss bank accounts in exchange for them trimming a few billion dollars off the sale price of national assets. Bribery and corruption, pure and simple. ... Step Two: Capital Market Liberalization. This is the repealing any laws that taxes money going over its borders. Stiglitz calls this the, "hot money," cycle. Initially cash comes in from abroad to speculate in real estate and currency, then when the economy in that country starts to look promising, this outside wealth is pulled straight out again, causing the economy to collapse. ... The nation then requires IMF help and the IMF provides it under the pretext that they raise interest rates anywhere from 30% to 80%. This happened in Indonesia and Brazil, also in other Asian and Latin American nations. These higher interest rates consequently impoverish a country, demolishing property values, savaging industrial production and draining national treasuries. ... Step Three: Market Based Pricing. This is where the prices of food, water and domestic gas are raised which predictably leads to social unrest in the respective nation, now more commonly referred to as, "IMF Riots." These riots cause the flight of capital and government bankruptcies. This benefits the foreign corporations as the nations remaining assets can be purchased at rock bottom prices. ... Step Four: Free Trade. This is where international corporations burst into Asia, Latin America and Africa, whilst at the same time Europe and America barricade their own markets against third world agriculture. They also impose

extortionate tariffs which these countries have to pay for branded pharmaceuticals, causing soaring rates in death and disease There are a lot of losers in this system, but a few winners - bankers. In fact the IMF and World Bank have made the sale of electricity, water, telephone and gas systems a condition of loans to every developing nation. This is estimated at 4 trillion dollars of publicly owned assets. In September of this year, Professor Joseph Stiglitz is awarded the Nobel Prize in economics.

- **2002 ForeignPolicyJournal** Speaking of the Pentagon, the little discussed British company called AMEC had some interesting personnel. It was AMEC's subsidiary AMEC Construction NA that was responsible for reconstructing Wedge 1 of the Pentagon just before (and after) Flight 77 hit that exact spot in the building. AMEC Construction NA was also immediately hired to clean-up the WTC site at Ground Zero, within hours of the destruction there. 17] The British parent company, AMEC, provides "engineering and project management services to the world's energy, power and process industries." 18] It is a major international player in the oil and gas industry, as well as in other natural resource industries. AMEC had a significant presence in Saudi Arabia dating back to the late 1970s, providing support to the national oil company Saudi Aramco, which is by far the richest company in the world. 19] Executives and board members at AMEC included former directors of NM Rothschild, Kellogg Brown and Root (now Halliburton), and SG Warburg. and see [Amec](#) Recently, one of our non-executive directors, Jock Green-Armytage, was appointed our chairman. - **2002: IAmTheWitness** Webster's Third New International Dictionary (Unabridged), re-printed in 2002, provides a new definition of Anti Semitism which has not been updated since 1956. It reads, "Anti-Semitism: (1) hostility toward Jews as a religious or racial minority group, often accompanied by social, political or economic discrimination (2) opposition to Zionism (3) sympathy for the opponents of Israel." It was definition (2) and (3) that were added in the 2002 edition, just before the USA decide to invade Iraq under orders from the State of Rothschild, I mean Israel. Also this year, the Prime Minister of

Israel, war criminal, Ariel Sharon, orders the massacre in the Jenin refugee camp in the West Bank. Best get that definition updated to protect these criminals. The DEA issues a report that Israeli spies, posing as art students, have been trying to penetrate US Government offices. Police near the Whidbey Island Naval Air Station in southern Washington State stop a suspicious truck and detain two Israelis, one of whom is illegally in the United States. The two men were driving at high speed in a Ryder rental truck, which they claimed had been used to, "deliver furniture." The next day, police discovered traces of TNT and RDX military-grade plastic explosives inside the passenger cabin and on the steering wheel of the vehicle. The FBI then announces that the tests that showed explosives were, "false positives," by cigarette smoke, a claim test experts say is ridiculous. Based on an alibi provided by a woman, the case is closed and the Israelis are handed over to INS to be sent back to Israel. One week later, the woman who provided the alibi vanishes.

- **2002** [History of the Money Changers](#) On April 12th every major paper in the USA runs a story that Venezuelan President Hugo Chavez had resigned as he was, "unpopular and dictatorial." In fact he had been kidnapped under a coup, where he was imprisoned on an army base. Following sympathy from the guards, the coup falls apart and President Chavez is back in his office one day later. Interestingly he has video evidence that whilst he was imprisoned on that base a United States military attaché entered the base. President Chavez, demonized by the controlled western media, gives milk and housing to the poor, and gives land not used for production by big plantation owners for more than two years, to those without land. His big crime however, was in passing a petroleum law that doubled the royalty taxes from 16% to 30% on new oil discoveries, which affected Exxon Mobil and other international oil operators. ... He also took full control of the state oil company, PDVSA, which before was nominally owned by the government, but in actual fact was in thrall to these international oil operators. Not only that but President Chavez is also the President of OPEC (Organization of Petroleum Exporting Countries). The main reason is, however, that President Chavez fully rejects the World Bank's, "Four Step Strategy," and plan to reduce wages of the people for the benefit of the bankers. Indeed President Chavez has increased the minimum wage by 20%, which has increased the purchasing power of the lower paid workers and strengthened the economy. His minister, Miguel Bustamante Madriz, fully aware of the danger Venezuela poses to the bankers when people contrast the fact it wouldn't let them in, for example, with Argentina who did, stated, "America can't let us stay in power. We are an exception to the new globalization order. If we succeed, we are an example to all the Americas."

This, "Day of Purim," is a day the Jews celebrate their victory over Ancient Babylon, now based within the borders of Iraq, how interesting. What is also significant is that the previous U.S. led invasion of Iraq ended on the Day of Purim ten years earlier with the slaughter of 150,000 fleeing Iraqis under the current President's father, George Herbert Walker Bush. Purim is also the time when the Jews are encouraged to get bloody revenge against their perceived enemies. Ancient Babylon, I mean Iraq, is now one of six nations left in the world who don't have a Rothschild controlled central bank. This war is mainly about stealing Iraq's water supply for Israel and is being fought with the blood of the American military which the State of Rothschild, I mean Israel control. Israel has always struggled for water, it had to steal the Golan Heights from Syria which provided Israel with one third of its fresh water 36 years before, yet still in Israel water extraction has surpassed replacement by 2.5 billion metres in the last 25 years. This means the water is far more precious to them than the oil reserves which are the second largest reserves of oil on the planet. It has been called France's biggest postwar financial scandal. ... The sale of Ertoil to Elf has formed a substantial part of the court case. Recently the person who brokered the Spanish deal, Nadhmi Auchi, gave evidence to the court. The French authorities in a statement published by Channel Four News said, "He has been charged on the warrant with three charges of conspiracy to defraud involving the takeover of Ertoil by General Mediterranean Holdings (GMH) Auchi's arms company] and its subsequent sale to Elf between December 1990 and August 1994." Auchi is an Iraqi-born British businessman who has recently been extradited to France from Britain. It has taken the French authorities nearly two years to get the extradition as it was blocked by the Blair government. While in Britain Auchi developed some very powerful friends. being considered, Chrysler was primarily owned (80.1 percent) by the private equity firm Cerberus Capital Management, L.P., headed by Stephen A. Feinberg and **Jacob Ezra Merkin**. It should be noted that Feinberg and Merkin also controlled General Motors Acceptance Corp. (GMAC), the financial services branch of GM. GM sold 51 percent of GMAC in 2006 to Feinberg's private equity firm Cerberus Capital Management LP, and Jacob Ezra Merkin became chairman of GMAC. Had the merger gone through, Feinberg and Merkin would have probably become majority owners of both GM and Chrysler. This appears to have been the plan. Feinberg and Merkin, the owners of GMAC, had plundered and conspired to bring down GM so that they could take it over. When Cerberus gained control of GMAC, they hurt GM's domestic sales by raising the credit requirements for car loans. Feinberg and Merkin reportedly raised the credit requirements so high that they caused a very sizable chunk of sales to be lost due to customers' inability to secure financing. Cerberus reportedly used this tactic to pressure GM into selling or trading their remaining stake in GMAC. 2008 'Marion Cotillard sparked a political row yesterday after accusing America of fabricating the 9/11 attacks.

- **2012** [Commondreams](#) Shadow Banking System Here is a working hypothesis, suggested by Martin Andelman: securitized mortgages are the

“pawns” used in the pawn shop known as the “repo market.” “Repos” are overnight sales and repurchases of collateral. Yale economist Gary Gorton explains that repos are the “deposit insurance” for the shadow banking system, which is now larger than the conventional banking system and is necessary for the conventional system to operate. The problem is that repos require “sales,” which means the mortgage notes have to remain free to be bought and sold. The mortgages are left unendorsed so they can be used in this repo market. Gorton observes that there is a massive and growing demand for banking by large institutional investors – pension funds, mutual funds, hedge funds, sovereign wealth funds – which have millions of dollars to park somewhere between investments. But FDIC insurance is designed to protect individual investors and covers only up to \$250,000. The large institutional investors want an investment that is secure, that provides them with a little interest, and that is liquid like a traditional deposit account, allowing quick withdrawal. The shadow banking system evolved in response to this need, operating largely through the repo market. “Repos” are sales and repurchases of highly liquid collateral, typically Treasury debt or mortgage-backed securities—the securitized units into which American real estate has been ground up and packaged, sausage-fashion. The collateral is bought by a “special purpose vehicle” (SPV), which acts as the shadow bank. The investors put their money in the SPV and keep the securities, which substitute for FDIC insurance in a traditional bank. (If the SPV fails to pay up, the investors can foreclose on the securities.) To satisfy the demand for liquidity, the repos are one-day or short-term deals, continually rolled over until the money is withdrawn. This money is used by the banks for other lending, investing or speculating. All Behind the Curtain of MERS The housing shell game was made possible because it was all concealed behind an electronic smokescreen called MERS (an acronym for Mortgage Electronic Registration Systems, Inc.). MERS allowed houses to be shuffled around among multiple, rapidly changing owners while circumventing local recording laws. Title would be recorded in the name of MERS as a place holder for the investors, and MERS would foreclose on behalf of the investors. Payments would be received by the mortgage servicer, which was typically the bank that signed the mortgage with the homeowner. The homeowner usually thinks the servicer is the lender, but in fact it is an amorphous group of investors. This all worked until courts started questioning whether MERS, which admitted that it was a mere conduit without title, had standing to foreclose. Courts have increasingly held that it does not. It was first discussed in the 1946 Acheson-Lilienthal Report on the international control of atomic energy and the Baruch Plan. President Obama breathed new life into the idea in his Prague speech on April 5. In short, the FMCT would ban the production of all fissile material suitable for use in nuclear weapons. It could also address existing stockpiles earmarked for blend-down or for use in nuclear powered subs. All five Nuclear Weapons States stopped production of weapons-grade fissile material by 1996, and all five support a verifiable FMCT. Discussions on the FMCT are carried out through the UN Conference on Disarmament (CD). The initiative has been stalled several times since the official resumption of talks in 1995. Israel has said that it opposes any FMCT that doesn't address the Iranian nuclear threat. Pakistan opposes an FMCT without limits on stockpiles because it is concerned that India's current stockpile is larger than its own. With so many seemingly immovable roadblocks, agreement on the FMCT is a ways off. - [LaRouchePub](#) .. the Inter-Alpha Group, the Rothschild-run banking syndicate at the core of the British Empire's predatory monetary system. "That's what they're hanging by, and whatever they're hanging by, is what will hang them." ... The Inter-Alpha Group was formed in 1971, as a syndicate of six oligarchic European banks, the year the Nixon Administration foolishly took the dollar off gold and destroyed FDR's Bretton Woods system of fixed currency rates. That move opened the door to imperial currency warfare, the creation of the petrodollar market, and ultimately the British Empire's control over the U.S. dollar. In short, virtually everything that has gone wrong in the world economy can be traced to the predatory actions of the Inter-Alpha Group and its associates. I would've thought this makes their relationship even closer, and Terry's self-styled Robin Hood image even more unlikely: Tullet Prebon is one of the largest inter-dealer money brokers in the world. It is therefore something of a conflict for Angie to be on its Board while allegedly offering objective information to the world about how the Libor rate is not being fixed; and pretty damn difficult for Terry to say he was unaware of that fixing.  - **2012** July [World Shia Forum](#) As a result of a well-hatched evil plot starting murder of Rafique Hariri and its blame being laid on Syria, the Syrian troops were forced to leave Lebanon in 2006 before Israel attacked Lebanon. The point is that the Syrian army is considered professional and strong. Moreover, the army, as claimed by some Western media, consists mainly of Alawites. Hence, there is little chance that there will be any defecting from senior army generals or mutiny. Moreover, their track record so far shows full dedication to the cause of crushing the terrorist Salafist rebels. There is little chance that the Syria army will be defeated as a result of lack of motivation or lack of belief in their president. Most of the rebels on the other hand are not Syrians in the first place. They consist of imported terrorists from Iraq (the re-stationed al-Qaida terrorists), Saudi Arabia, Somalia and even Pakistan as per some reports. That is why there have been reports that the rebels have set the corpses of their dead comrades on fire in order to conceal their nationalities.
 - **2012** July [Scribd](#) LIBOR [Indictment](#) excerpt: To analyze how well the Federal Reserve Eurodollar Deposit Rate captures changes in Market Fundamentals and absorbs variations in LIBOR that are driven by such fundamentals, consulting experts used regression analysis to measure the day-to-day changes in the Spread against changes in the T-Bill rate and the commercial paper rate. The evidence from these regressions strongly supports that day-to-day changes in the Federal Reserve Eurodollar Deposit Rate effectively capture day-to-day movements in LIBOR caused by Market Fundamentals. Thus, once the Federal Reserve Eurodollar Deposit Rate is subtracted to arrive at the Spread, remaining movements in LIBOR reflected in the Spread would be unrelated to movements in Market Fundamentals.58. ... Because Market Fundamentals are fully captured by the Spread, absent manipulation, the Spread should always be zero or close to zero. - **2012 Aug** [PressTV](#) Current neo-conservative doctrine foresees the fall of the governments of Iran, Belarus, and, ultimately Russia and China, after the fall of Damascus, to the combined forces of NATO and the Saudi- and Qatari-backed Salafist Wahhabis, who make up a large portion of the Syrian rebel movement. Russia has clearly drawn a line in the sand in Syria and does not want to see yet another Arab nation fall into the clutches of neo-con globalists and radical Muslims. Libya constituted proof of the alliance between the neo-con uber-capitalists, Zionists, and Wahhabists. Even if Russia concedes Damascus and the rest of inland Syria to the rebels, it is prepared, through the use of its Navy and naval base at Tartus in the predominantly-Alavi coastal region of Syria, to offer military protection for Bashar al-Assad, his fellow Alavis, and Syrian Christians who have been protected by the Alavis in an independent salient that includes Tartus and Latakia. The complete fall of Syria to Wahhabists and NATO will move the instability of the Middle East closer to the Russian southern frontier. ... The stakes for Russia are immense. One only needs to examine Nazi Germany’s “New Order” (Neuordnung) plans for the occupation of the Soviet Union and Persia to understand what the neo-cons and their Israeli and Wahhabist colleagues have in store for southern Russia and Iran.

- **[BeforeItsNews](#)** Oct 2012 RIOTING IN IRAN – ROTHSCHILD DEVALUES THE CURRENCY THERE – I THINK I NEED A WEEK IN A CARAVAN AT SKEGNESS ... From William Mount = ” The Rothschilds banking system strikes again, they must have their war. The Rothschild has ordered two economies to dump, they are: 1) Iran. The Rial is the Iranian currency. For 20 years the Rial remained constant at about 9,000 Rial per dollar. A loaf of bread remained at about \$2-3 per one pound loaf. In January the Iran Central Bank – Owned by the IMF, which is 54.5% owned by David Rothschild – devalued the Rial to 12,000 to the dollar. Bread went to about \$4 per loaf. President Achmadenajab, in a Betrayal to Putin, not only ordered the printing presses to run continuously to print Rials but also built 14 Nukes in their underground research labs. Russia controls the other 350 + nukes they have, about 100 mounted on US made, Chinese rebuilt, cruise missiles – Range, 4,000 Miles +. Over the last 4 days the Central Iran Bank (IMF) has devalued the Rial to about 40,000 per dollar, a loaf of bread is now about \$12. The population is furious and out in the streets rioting. The oil exports only account for about 1 Million Gallons per day, and oil is purchased for about \$15 per barrel from the wells, so this income cannot help Iran very much. By the way, in Saudi Arabia, Mobile pays around \$.50 per barrel from their own wells – not the \$112 a barrel listed for 1 year out Brent Crude. See: Oil-Prices.net. Unless the IMF wants that Nuke to go off next to their HQ in London, yes the Iranian Embassy has a Nuke in their Embassy in London as well, they had better return the Rial back to around 12,000 per US dollar. If the Iranians abandon their London Embassy – watch out. They are crazy enough to do this. My recommendation: IMF: Stop trying to create WW3. 2) Southern California. There in Southern California, which still has Oil bubbling out of shore of Redondo Beach and Los Angeles still has Open Tar Pits filled with oil, the oil industry is trying to convince the public that there is an Oil Shortage. Oil deliveries to refineries there have been cut by the Oil Industry and now there is Gas Rationing. Prices for gasoline has been raised by over \$1.25 per gallon in a matter of days.

During his time at the Hoover Institution, he wrote the major study Western Technology and Soviet Economic Development (in three volumes), arguing that the West played a major role in developing the Soviet Union from its very beginnings up until the present time (1970). Sutton argued that the [Soviet Union](#)'s technological and manufacturing base — which was then engaged in supplying the [Viet Cong](#) – was built by [United States](#) corporations and largely funded by US taxpayers. Steel and iron plants, the [GAZ](#) automobile factory – a [Ford](#) subsidiary, located in eastern Russia – and many other Soviet industrial enterprises were, according to Sutton, built with the help or technical assistance of the United States or U.S. corporations. He argued further that the Soviet Union's acquisition of [MIRV](#) technology was made possible by receiving (from U.S. sources) machining equipment for the manufacture of precision [ball bearings](#), necessary to mass-produce MIRV-enabled missiles. In 1973, Sutton published a popularized, condensed version of the three volumes called National Suicide: Military Aid to the Soviet Union and was thereby [citation needed](#)] forced out

of the Hoover Institution. His conclusion from his research on the issue was that the conflicts of the Cold War were "not fought to restrain communism", since the United States, through financing the Soviet Union "directly or indirectly armed both sides in at least Korea and Vietnam"; rather, these wars were organized in order "to generate multibillion-dollar armaments contracts".^[1] The update to this text, The Best Enemy Money Can Buy, looked at the role of technology transfers up to the 1980s. Leaked emails have allegedly proved that the White House gave the green light to a chemical weapons attack on Syria that could be blamed on Assad's regime and in turn, spur international military action in the devastated country.

A report released on Monday contains an email exchange between two senior officials at British-based contractor Birtan Convoce where a scheme 'approved by Washington' is outlined explaining that Galtar would fund rebel forces in Syria to use chemical weapons.

Barack Obama made it clear to Syrian president Bashar al-Assad last month that the U.S. would not tolerate Syria using chemical weapons against its own people.

The Federal Reserve Act of 1913

The Federal Reserve Act (ch. 6, 38 Stat. 251, enacted December 23, 1913, 12 U.S.C. ch.3) is an Act of Congress that created and set up the Federal

Reserve System, the central banking system of the United States of America, and granted it the legal authority to issue Federal Reserve Notes (now commonly known as the U.S. Dollar) and Federal Reserve Bank Notes as legal tender. The Act was signed into law by President Woodrow Wilson. For nearly eighty years, the U.S. was without a central bank after the charter for the Second Bank of the United States was allowed to expire. After various financial panics, particularly a severe one in 1907, some Americans became persuaded that the country needed some sort of banking and currency reform that would, 1] when threatened by financial panics, provide a ready reserve of liquid assets, and furthermore allow for currency and credit to expand and contract seasonally within the U.S. economy. Some of this was chronicled in the reports of the National Monetary Commission (1909–1912), which was created by the Aldrich–Vreeland Act in 1908. Included in a report of the Commission, submitted to Congress on January 9, 1912, were recommendations and draft legislation with 59 sections, for proposed changes in U.S. banking and currency laws. 2] The proposed legislation was known as the Aldrich Plan, named after the chairman of the Commission, Republican Senator Nelson W. Aldrich of Rhode Island. The Plan called for the establishment of a National Reserve Association with 15 regional district branches and 46 geographically dispersed directors primarily from the banking profession. The Reserve Association would make emergency loans to member banks, print money, and act as the fiscal agent for the U.S. government. State and nationally chartered banks would have the option of subscribing to specified stock in their local association branch. 2] It is generally believed that the outline of the Plan had been formulated in a secret meeting on Jekyll Island in November 1910, which Aldrich and other well connected financiers attended. 3] Since the Aldrich Plan essentially gave full control of this system to private bankers, there was strong opposition to it from rural and western states because of fears that it would become a tool of certain rich and powerful financiers in New York City, referred to as the "Money Trust". 4] Indeed, from May 1912 through January 1913 the Pujo Committee, a subcommittee of the House Committee on Banking and Currency, held investigative hearings on the alleged Money Trust and its interlocking directorates. These hearings were chaired by Rep. Arsene Pujo, a Democratic representative from Louisiana. 5] In the election of 1912, the Democratic Party won control of the White House and both chambers of Congress. The party's platform stated strong opposition "to the so called Aldrich bill for the establishment of a central bank." However, the platform also called for a systematic revision of banking laws in ways that would provide relief from financial panics, unemployment and business depression, and would protect the public from the "domination by what is known as the Money Trust." 6] edit]Legislative history

The banking and currency reform plan advocated by President Wilson in 1913 was sponsored by the chairmen of the House and Senate Banking and Currency committees, Representative Carter Glass, a Democrat of Virginia and Senator Robert Latham Owen, a Democrat of Oklahoma. According to the House committee report accompanying the Currency bill (H.R. 7837) or the Glass-Owen bill, as it was often called during the time, the legislation was drafted from ideas taken from various proposals, including the Aldrich bill. 6] However, unlike the Aldrich plan, which gave controlling interest to private bankers with only a small public presence, the new plan gave an important role to a public entity, the Federal Reserve Board, while establishing a substantial measure of autonomy for the (regional) Reserve Banks which, at that time, were allowed to set their own discount rates. Also, instead of the proposed currency being an obligation of the private banks, the new Federal Reserve note was to be an obligation of the U.S. Treasury. In addition, unlike the Aldrich plan, membership by nationally chartered banks was mandatory, not optional. The changes were significant enough that the earlier opposition to the proposed reserve system from Progressive Democrats was largely assuaged; instead, opposition to the bill came largely from the more business-friendly Republicans instead of from the Democrats. 1] After months of hearings, debates, votes and amendments, the proposed legislation, with 30 sections, was enacted as the Federal Reserve Act. The House, on December 22, 1913, 7] agreed to the conference report on the Federal Reserve Act bill by a vote of 298 yeas to 60 nays, with 76 not voting. The Senate, on December 23, 1913, agreed to it by a vote of 43 yeas to 25 nays with 27 not voting. The record shows that there were no Democrats voting "nay" in the Senate and only two in the House. The record also shows that almost all of those not voting for the bill had previously declared their intentions and were paired with members of opposite intentions. 8] edit]The Act

The plan adopted in the original Federal Reserve Act called for the creation of a System that contained both private and public entities. There were to be at least eight, and no more than 12, private regional Federal reserve banks (12 were established) each with its own branches, board of directors and district boundaries 9] and the System was to be headed by a seven member Federal Reserve Board made up of public officials appointed by the President and confirmed by the Senate (strengthened and renamed in 1935 as the Board of Governors of the Federal Reserve System with the Secretary of the Treasury and the Comptroller of the Currency dropped from the Board). 10] Also created as part of the Federal Reserve System was a 12 member Federal Advisory Committee 11] and a single new United States currency, the Federal Reserve Note. 12] In the Federal Reserve Act, Congress provided that all nationally chartered banks were required to become members of the Federal Reserve System. The Act required these banks to purchase specified non-transferable stock in their regional Federal reserve banks, and to set aside a stipulated amount of non-interest bearing reserves with their respective reserve banks. (Since 1980, all depository institutions have been required to set aside reserves with the Federal Reserve. Such institutions are entitled to certain Federal Reserve services. 13]. State chartered banks were given the option of becoming members of the Federal Reserve System and in the case

of the exercise of such option were to be subject to supervision, in part, by the Federal Reserve System. 14] Member banks became entitled to have access to discounted loans at the discount window in their respective reserve banks, to a 6% annual dividend in their Federal Reserve stock, and to other services. 15] Section 15 of the Act also permitted Federal Reserve banks to act as fiscal agents for the United States government. 16] Section 25 allowed banks to establish foreign branches. Citibank became the first to do so with a branch in Buenos Aires. 17] edit]Subsequent amendments

In the 1930s the Federal Reserve Act was amended to create the Federal Open Market Committee (FOMC), consisting of the seven members of the Board of Governors of the Federal Reserve System and five representatives from the Federal reserve banks (Section 12B). The FOMC is required to meet at least four times a year (the practice is usually eight times) and is empowered to direct all open-market operations of the Federal reserve banks. During the 1970s, the Federal Reserve Act was amended to require the Board and the FOMC "to promote effectively the goals of maximum employment, stable prices, and moderate long-term interest rates." 18] Also in that decade, the Act was amended so that the member governor proposed by the President to be Chairman would have a four year term as Chairman and would be subject to confirmation by the Senate (member governors per se each have 14 year terms, with a specific term ending every two years) (Section 10). The Chairman was also required to appear before Congress at semi-annual hearings to report on the conduct of monetary policy, on economic development, and on the prospects for the future. 19] The Federal Reserve Act has been amended by some 200 subsequent laws of Congress. citation needed] It continues to be one of the principal banking laws of the United States. edit]Criticism

Main article: Criticism of the Federal Reserve Controversy about the Federal Reserve Act and the establishment of the Federal Reserve System has existed since prior to its passage. Some of the questions raised include: whether Congress has the Constitutional power to delegate its power to coin money or issue paper money, whether the Federal Reserve is a public cartel of private banks (also called a banking cartel) established to protect powerful financial interests, and whether the Federal Reserve's actions increased the severity of the Great Depression in the 1930s (and/or the severity or frequency of other boom-bust economic cycles, such as the late-2000s recession). Allegations that the Act was passed while most of Congress was away for Christmas on December 23 are not supported by the legislative history: The house passed the bill 298-60 with 76 not voting, while the Senate passed it 43-25 with 27 not voting, 20] showing 70%-80% participation before accounting for announced pairs.

EXECUTIVE SUMMARY Over the last decade, the U.S. Senate Permanent Subcommittee on Investigations as worked to strengthen U.S. AML efforts by investigating how money launderers, terrorists, organized crime, corrupt officials, tax evaders, and other wrongdoers have utilized U.S. financial institutions to conceal, transfer, and spend suspect funds.¹ In 2001, the Subcommittee focused, in particular, on how U.S. banks, through the correspondent services they provide to foreign financial institutions, had become conduits for illegal proceeds associated with organized crime, drug trafficking, and financial fraud.² Correspondent banking occurs when one financial institution provides services to another financial institution to move funds, exchange currencies, cash monetary instruments, or carry out other financial transactions. The Subcommittee’s 2001 investigation showed not only how some poorly managed or corrupt foreign banks used U.S. bank accounts to aid and abet, commit, or allow clients to commit wrongdoing, but also how U.S. financial institutions could protect themselves and the U.S. financial system from misuse. In response to that investigation and the money laundering vulnerabilities exposed by the 9/11 terrorist attack, Congress enacted stronger AML laws as part of the Patriot Act of 2002, including stronger provisions to combat the misuse of correspondent services.³ Federal bank regulators followed with stronger regulations⁴ and examination requirements⁵ 1 See, e.g., U.S. Senate Permanent Subcommittee on Investigations, “Keeping Foreign Corruption out of the United States,” S.Hrg. 111-540 (Feb. 4, 2010); “Tax Haven Banks and U.S. Tax Compliance,” S.Hrg. 110-614 (July 17 and 25, 2008); “Tax Haven Abuses: The Enablers, The Tools and Secrecy,” S.Hrg. 109-797 (Aug. 1, 2006); “Money Laundering and Foreign Corruption: Enforcement and Effectiveness of the Patriot Act,” S.Hrg. 108-633 (July 15, 2004); “Role of U.S. Correspondent Banking in International Money Laundering,” S.Hrg. 107-84 (March 1, 2 and 6, 2001); and “Private Banking and Money Laundering: A Case Study of Opportunities and Vulnerabilities,” S.Hrg. 106-428 (Nov. 9 and 10, 1999). laundering through correspondent accounts. In response, over the next ten years, U.S. banks substantially strengthened their correspondent AML controls. Before the 2002 Patriot Act, for example, most U.S. banks opened correspondent accounts for any foreign bank with a banking license; now, most U.S. banks evaluate the riskiness of each foreign bank's owners, business lines, products, clients, and AML controls before agreeing to open an account. They also routinely monitor account activity and wire transfers for suspicious activity, with enhanced monitoring of high risk correspondents. In addition, before the 2002 Patriot Act, some U.S. banks readily opened accounts for foreign shell banks, meaning banks without any physical presence in any jurisdiction; today, in accordance with the Patriot Act's ban on shell bank accounts, all U.S. banks take measures to ensure they don't provide services to such banks, the ban on shell bank accounts has become an international AML standard,⁶ and the thousands of stand-alone shell banks licensed by the Bahamas, Cayman Islands, Nauru, and other jurisdictions have virtually disappeared. At the same time, the money laundering risks associated with correspondent banking have not been eliminated. Correspondent accounts continue to provide a gateway into the U.S. financial system, and wrongdoers continue to abuse that entryway. This investigation takes a fresh look at the U.S. vulnerabilities to money laundering and terrorist financing associated with correspondent banking, focusing in particular on the operations of global banks with U.S. affiliates that enable foreign financial institutions to gain access to the U.S. financial system. HSBC Case Study. To examine the current money laundering and terrorist financing threats associated with correspondent banking, the Subcommittee selected HSBC as a case study. HSBC is one of the largest financial institutions in the world, with over \$2.5 trillion in assets, 89 million customers, 300,000 employees, and 2011 profits of nearly \$22 billion. HSBC, whose initials originally d for Hong Kong Shanghai Banking Corporation, now has operations in over 80 countries, with hundreds of ffiliates spanning the globe. Its parent corporation, HSBC Holdings plc, called "HSBC Group," is headquartered in London, and its Chief Executive Officer is located in Hong Kong. Its key U.S. affiliate is HSBC Bank USA N.A. (HBUS). HBUS operates more than 470 bank branches throughout the United States, manages assets totaling about \$200 billion, and serves around 3.8 million customers. It holds a national bank charter, and its primary regulator is the U.S. Office of the Comptroller of the Currency (OCC), which is part of the U.S. Treasury Department. HBUS is headquartered in McLean, Virginia, but has its principal office in New York City. HSBC acquired its U.S. presence by purchasing several U.S. financial institutions, including Marine Midland Bank and Republic National Bank of New York. A senior HSBC executive told the Subcommittee that HSBC acquired its U.S. affiliate, not just to compete with other U.S. banks for U.S. clients, but primarily to provide a U.S. platform to its non-U.S. clients and to use its U.S. platform as a selling point to attract still more non-U.S. clients. HSBC operates in many jurisdictions with weak AML controls, high risk 117-129, 183-187, http://www.ffiec.gov/bsa_aml_infobase/documents/BSA_AML_Man_2010.pdf. Prior versions of this Manual were issued in 2005 and 2007. ⁶ See "International Standards on Combating Money Laundering and the Financing of Terrorism & Proliferation: The FATF Recommendations," issued by the Financial Action Task Force (2/2012), FATF Recommendation 13. 3 clients, and high risk financial activities including Asia, Middle East, and Africa. Over the past ten years, HSBC has also acquired affiliates throughout Latin America. In many of these countries, the HSBC affiliate provides correspondent accounts to foreign financial institutions that, among other services, are interested in acquiring access to U.S. dollar wire transfers, foreign exchange, and other services. As a consequence, HSBC's U.S. affiliate, HBUS, is required to interact with other HSBC affiliates and foreign financial institutions that face substantial AML challenges, often operate under weaker AML requirements, and may not be as familiar with, or respectful of, the tighter AML controls in the United States. HBUS' correspondent services, thus, provide policymakers with a window into the vast array of money laundering and terrorist financing risks confronting the U.S. affiliates of global banks. The Subcommittee also examined HSBC because of its weak AML program. In September 2010, the OCC issued a lengthy Supervisory Letter citing HBUS for violating federal AML laws, including by maintaining an inadequate AML program. In October 2010, the OCC issued a Cease and Desist Order requiring HSBC to strengthen multiple aspects of its AML program.⁷ The identified problems included a once massive backlog of over 17,000 alerts identifying possible suspicious activity that had yet to be reviewed; ineffective methods for identifying suspicious activity; a failure to file timely Suspicious Activity Reports with U.S. law enforcement; a failure to conduct any due diligence to assess the risks of HSBC affiliates before opening correspondent accounts for them; a 3-year failure by HBUS, from mid-2006 to mid- 2009, to conduct any AML monitoring of \$15 billion in bulk cash transactions with those same HSBC affiliates, despite the risks associated with large cash transactions; poor procedures for assigning country and client risk ratings; a failure to monitor \$60 trillion in annual wire transfer activity by customers domiciled in countries rated by HBUS as lower risk; inadequate and unqualified AML staffing; inadequate AML resources; and AML leadership problems. Since many of these criticisms targeted severe, widespread, and longstanding AML deficiencies, they also raised questions about how the problems had been allowed to accumulate and why the OCC had not compelled corrective action earlier. During the course of its investigation into HSBC's AML deficiencies, the Subcommittee issued multiple subpoenas and collected and reviewed over 1.4 million documents, including bank records, correspondence, emails, and legal pleadings. The Subcommittee staff also conducted over 75 interviews with officials at HSBC Group, HBUS, and other HSBC affiliates, as well as with U.S. banking regulators. In addition, the Subcommittee received numerous briefings from HSBC legal counsel, initiated inquiries with foreign banks that had HSBC accounts, and consulted with experts on AML and terrorist financing issues. HSBC was fully cooperative with the inquiry, producing documentation and witnesses from around the world, including documents for which it could have claimed privilege. As a result of its investigation, the Subcommittee has focused on five issues illustrating key AML and terrorist financing problems that continue to impact correspondent banking in the United States. They include opening U.S. correspondent accounts for high risk affiliates without conducting due diligence; facilitating transactions that hinder U.S. efforts to stop terrorists, drug 7 On the same day, in coordination with the OCC, the Federal Reserve issued a Cease and Desist order to HBUS' holding company, HSBC North America Holdings, Inc. (HNAH), citing HNAH for an inadequate AML program and requiring it to revamp and strengthen both its program and that of HBUS. 4 traffickers, rogue jurisdictions, and other from using the U.S. financial system; providing U.S. correspondent services to banks with links to terrorism; clearing bulk U.S. dollar travelers cheques despite signs of suspicious activity; and offering high risk bearer share corporate accounts. Avoiding the money laundering risks involved in these activities requires an effective AML program, with written standards, knowledgeable and adequate staff, the infrastructure needed to monitor account and wire transfer activity for suspicious transactions, effective AML training, and a compliance culture that values obtaining accurate client information. In addition to focusing on these five issues at HBUS, the Subcommittee investigation examined the regulatory failures that allowed these and other AML problems to fester for years. Servicing A High Risk Affiliate. In 2001, the Subcommittee's investigation debunked the notion that U.S. banks should open a correspondent account for any foreign bank with a banking license, establishing instead the need to use due diligence to evaluate the money laundering and terrorist financing risks posed by a specific foreign financial institution before opening an account. Today, some U.S. affiliates of global banks engage in an equally ill-advised practice, opening correspondent accounts for any affiliate owned by the parent holding corporation, with no analysis of the AML or terrorist financing risks. Until recently, HSBC Group policy instructed its affiliates to assume that all HSBC affiliates met the Group's AML standards and to open correspondent accounts for those affiliates without additional due diligence. For years, HBUS followed that policy, opening U.S. correspondent accounts for HSBC affiliates without conducting any AML due diligence. Those affiliates have since become major clients of the bank. In 2009, for example, HBUS determined that "HSBC Group affiliates clear ed] virtually all USD U.S. dollar] payments through accounts held at HBUS, representing 63% of all USD payments processed by HBUS."⁸ HBUS failed to conduct due diligence on HSBC affiliates despite a U.S. law that has required all U.S. banks, since 2002, to conduct these due diligence reviews before opening a U.S. correspondent account for any foreign financial institution, with no exception made for foreign affiliates. One HSBC affiliate that illustrates the AML problems is HSBC Mexico, known as HBMX. HBUS should have, but did not, treat HBMX as a high

risk correspondent client subject to enhanced due diligence and monitoring. HBMX operated in Mexico, a country under siege from drug crime, violence and money laundering; it had high risk clients, such as Mexican casas de cambios and U.S. money service businesses; and it offered high risk products, such as U.S. dollar accounts in the Cayman Islands. In addition, from 2007 through 2008, HBMX was the single largest exporter of U.S. dollars to HBUS, shipping \$7 billion in cash to HBUS over two years, outstripping larger Mexican banks and other HSBC affiliates. Mexican and U.S. authorities expressed repeated concern that HBMX's bulk cash shipments could reach that volume only if they included illegal drug proceeds.. The concern was that drug traffickers unable to deposit large amounts of cash in U.S. banks due to AML controls, were transporting U.S. dollars to Mexico, arranging for bulk deposits there, and then using Mexican financial institutions to insert the cash back into the U.S. financial system. In addition to its high risk location, clients, and activities, HBMX had a history of severe AML deficiencies. Its AML problems included a widespread lack of Know-Your Customer 8 See 9/9/2009 chart entitled, "HSBC Profile," included in "HSBC OFAC Compliance Program," a presentation prepared by HSBC and provided to the OCC, at HSBC OCC 8874197. 5 (KYC) information in client files; a dysfunctional monitoring system; bankers who resisted closing accounts despite evidence of suspicious activity; high profile clients involved in drug trafficking; millions of dollars in suspicious bulk travelers cheque transactions; inadequate staffing and resources; and a huge backlog of accounts marked for closure due to suspicious activity, but whose closures were delayed. For eight years, from 2002 to 2010, HSBC Group oversaw efforts to correct HBMX's AML deficiencies, while those efforts fell short. At the same time, HSBC Group watched HBMX utilize its U.S. correspondent account, without alerting HBUS to the AML risks it was incurring. HBUS compounded the AML risks it incurred from HBMX through its own AML deficiencies, which included failing to investigate or evaluate HBMX's AML risks. HBUS also failed, from mid-2006 to mid-2009, to conduct any AML monitoring of its U.S. dollar transactions with HSBC affiliates, including HBMX, despite the obvious well-known risks attendant with large cash transactions. In addition, because HBUS deemed HBMX to be located in a low risk country, HBUS failed until 2009, to monitor HBMX's wire transfer or account activity. HBMX illustrates the money laundering and drug trafficking risks that result when the U.S. affiliate of a global bank serves as the U.S. gateway for a high risk affiliate allowed to operate with no initial due diligence or ongoing monitoring. Circumventing OFAC Prohibitions. The United States has devoted significant resources to stopping some of the most dangerous persons and jurisdictions threatening the world today from utilizing the U.S. financial system, including terrorists, persons involved with weapons of mass destruction, drug traffickers, and persons associated with rogue jurisdictions such as Iran, North Korea, and Sudan. To implement the law, the U.S. Treasury Department's Office of Foreign Assets Control (OFAC) has developed a list of prohibited persons and countries which banks use to create an "OFAC filter" to identify and halt potentially prohibited transactions. Transactions stopped by this filter typically undergo an individualized review to see if the transaction can proceed or the funds must be blocked. Because the OFAC filter can end up delaying or blocking transactions that are permitted under U.S. law or by other jurisdictions, some non-U.S. financial institutions have used tactics to circumvent it. Common tactics include stripping information from wire transfer documentation to conceal the participation of a prohibited person or country, or characterizing a transaction as a transfer between banks in approved jurisdictions, while omitting underlying payment details that would disclose participation of a prohibited originator or beneficiary. In the case of Iran, some foreign banks also abused what were known as "U-turn" transactions, which were allowable transactions under Treasury regulations prior to November 2008. In recent years, the United States has imposed steep penalties on banks that violated the OFAC prohibitions. At HBUS, documents provided to the Subcommittee indicate that, for years, some HSBC affiliates took action to circumvent the OFAC filter when sending OFAC sensitive transactions through their U.S. dollar correspondent accounts at HBUS. From at least 2001 to 2007, two HSBC affiliates, HSBC Europe (HBEU) and HSBC Middle East (HBME), repeatedly sent Uturn transactions through HBUS without disclosing links to Iran, even though they knew HBUS required full transparency to process U-turns. To avoid triggering the OFAC filter and an individualized review by HBUS, HBEU systematically altered transaction information to strip 6 out any reference to Iran and characterized the transfers as between banks in approved jurisdictions. The affiliates' use of these practices, which even some within the bank viewed as deceptive, was repeatedly brought to the attention of HSBC Group Compliance, by HBUS compliance personnel and by HBEU personnel who objected to participating in the document alteration and twice announced deadlines to end the activity. Despite this information, HSBC Group Compliance did not take decisive action to stop the conduct or inform HBUS about the extent of the activity. At the same time, while some at HBUS claimed not to have known they were processing undisclosed Iranian transactions from HSBC affiliates, internal documents show key senior HBUS officials were informed as early as 2001. In addition, HBUS' OFAC filter repeatedly stopped Iranian transactions that should have been disclosed to HBUS by HSBC affiliates, but were not. Despite evidence of what was taking place, HBUS failed to get a full accounting of what its affiliates were doing or ensure all Iranian transactions sent by HSBC affiliates were stopped by the OFAC filter and reviewed to ensure they were OFAC compliant. In addition, documents show that, from 2002 to 2007, some HSBC affiliates sent potentially prohibited transactions through HBUS involving Burma, Cuba, North Korea, Sudan, and other prohibited countries or persons. Other documents indicate that some HSBC affiliates may have sent non-U.S. dollar messaging traffic through U.S. servers in which the OFAC filter was not turned on or was restricted. An outside auditor hired by HBUS has so far identified, from 2001 to 2007, more than 28,000 undisclosed, OFAC sensitive transactions that were sent through HBUS involving \$19.7 billion. Of those 28,000 transactions, nearly 25,000 involved Iran, while 3,000 involved other prohibited countries or persons. The review has characterized nearly 2,600 of those transactions, including 79 involving Iran, and with total assets of more than \$367 million, as "Transactions of Interest" requiring additional analysis to determine whether violations of U.S. law occurred. While the aim in many of those cases may have been to avoid the delays associated with the OFAC filter and individualized reviews, rather than to facilitate prohibited transactions, actions taken by HSBC affiliates to circumvent OFAC safeguards may have facilitated transactions on behalf of terrorists, drug traffickers, or other wrongdoers. While HBUS insisted, when asked, that HSBC affiliates provide fully transparent transaction information, when it obtained evidence that some affiliates were acting to circumvent the OFAC filter, HBUS failed to take decisive action to confront those affiliates and put an end to the conduct. HBUS' experience demonstrates the strong measures that the U.S. affiliate of a global bank must take to prevent affiliates from circumventing OFAC prohibitions. Disregarding Links to Terrorism. For decades, HSBC has been one of the most active global banks in the Middle East, Asia, and Africa, despite being aware of the terrorist financing risks in those regions. In particular, HSBC has been active in Saudi Arabia, conducting substantial banking activities through affiliates as well as doing business with Saudi Arabia's largest private financial institution, Al Rajhi Bank. After the 9-11 terrorist attack in 2001, evidence began to emerge that Al Rajhi Bank and some of its owners had links to financing organizations associated with terrorism, including evidence that the bank's key founder was an early financial benefactor of al Qaeda. In 2005, HSBC announced internally that its affiliates should sever ties with Al Rajhi Bank, but then reversed itself four months later, leaving the decision up to each affiliate. HSBC Middle East, among other HSBC affiliates, continued to do business with the bank. 7 Due to terrorist financing concerns, HBUS closed the correspondent banking and banknotes accounts it had provided to Al Rajhi Bank. For nearly two years, HBUS Compliance personnel resisted pressure from HSBC personnel in the Middle East and United States to resume business ties with Al Rajhi Bank. In December 2006, however, after Al Rajhi Bank threatened to pull all of its business from HSBC unless it regained access to HBUS' U.S. banknotes program, HBUS agreed to resume supplying Al Rajhi Bank with shipments of U.S. dollars. Despite ongoing troubling information, HBUS provided nearly \$1 billion in U.S. dollars to Al Rajhi Bank until 2010, when HSBC decided, on a global basis, to exit the U.S. banknotes business. HBUS also supplied U.S. dollars to two other banks, Islami Bank Bangladesh Ltd. and Social Islami Bank, despite evidence of links to terrorist financing. Each of these specific cases shows how a global bank can pressure its U.S. affiliate to provide banks in countries at high risk of terrorist financing with access to U.S. dollars and the U.S. financial system. Clearing Suspicious Bulk Travelers Cheques. Another AML issue

involves HBUS' clearing more than \$290 million in bulk U.S. dollar travelers checks in less than four years for a Japanese regional bank, Hokuriku Bank, despite evidence of suspicious activity. From at least 2005 to 2008, HBUS cleared bulk travelers cheques for Hokuriku Bank on a daily basis, at times clearing \$500,000 or more in U.S. dollars per day. The cheques were in denominations of \$500 or \$1,000, submitted in large blocks of sequentially numbered cheques, and signed and countersigned with the same illegible signature. An OCC examination which determined that HBUS was clearing travelers cheques with inadequate AML controls, discovered the stacks of Hokuriku travelers cheques being processed on a daily basis, and directed HBUS to investigate. When HBUS sought more information, Hokuriku Bank at first delayed responding, then provided minimal information, and finally declined to investigate further, claiming to be constrained by bank secrecy laws from disclosing client-specific information. HBUS eventually learned that the travelers cheques were purchased by Russians from a bank in Russia, a country at high risk of money laundering. HBUS also learned that the Japanese bank had little KYC information or understanding why up to \$500,000 or more in bulk U.S. dollar travelers cheques purchased in Russia were being deposited on a daily basis into one of 30 different Japanese accounts of persons and corporations supposedly in the used car business. In October 2008, under pressure from the OCC, HBUS stopped processing the travelers cheques, but continued the correspondent relationship, despite the Japanese bank's poor AML controls. Two years later, in 2010, an OCC examination uncovered the ongoing relationship, between HSBC and Hokuriku, which the OCC thought had ended. In 2012, after the Subcommittee inquired about the account, HBUS closed it. Since travelers cheques have been misused by terrorists, drug traffickers, and other criminals, the HBUS experience shows how a U.S. affiliate with ineffective AML controls can end up clearing suspicious bulk travelers cheques and facilitating the movement of hundreds of millions of U.S. dollars across international lines to unknown recipients. Offering Bearer Share Accounts. Over the course of a decade, HBUS opened over 2,000 accounts in the name of bearer share corporations, a notorious type of corporation that invites secrecy and wrongdoing by assigning ownership to whomever has physical possession of the shares. At its peak, HBUS' Miami office had over 1,670 bearer share accounts; the New York office had over 850; and the Los Angeles office had over 30. The Miami bearer share accounts alone held assets totaling an estimated \$2.6 billion, and generated annual bank revenues of \$26 million. Multiple internal audits and regulatory examinations criticized the accounts as high risk and advocated that HBUS either take physical custody of the shares or require the corporations to register the shares in the names of the shareholders, but HBUS bankers initially resisted tightening AML controls, and regulators took no enforcement action. Two examples of the accounts illustrate the risks they posed. In the first, Miami Beach hotel developers, Mauricio Cohen Assor and Leon Cohen Levy, father and son, used bearer share accounts they opened for Blue Ocean Finance Ltd. and Whitebury Shipping Time-Sharing Ltd. to help hide \$150 million in assets and \$49 million in income. In 2010, both were convicted of criminal tax fraud and filing false tax returns, sentenced to ten years in prison, and ordered to pay back taxes, interest, and penalties totaling more than \$17 million. A second example involves a wealthy and powerful Peruvian family which pressed HBUS to grant a waiver from its AML requirements that bearer share corporations either register their shares or place those shares in bank custody. Bank documents showed how HBUS bankers pressed Compliance personnel to grant the waiver to please a wealthy client. These accounts demonstrate the AML risks associated with bearer share accounts, whose owners seek to hide their identities. Today, following an initiative that concluded in 2011, HBUS has reduced its bearer share accounts to 26, most of which are frozen, while at the same time maintaining a policy that allows the bank to open new bearer share accounts in the future. Regulatory Failures. HBUS' severe AML deficiencies did not happen overnight; they accumulated over time, even though its primary regulator, the OCC, conducted regular AML examinations. Part of the reason HBUS' AML problems were not cured is attributable to certain peculiar and ineffective aspects of the OCC's AML oversight effort. First, unlike other U.S. bank regulators, the OCC does not treat AML deficiencies as a matter of bank safety and soundness or a management problem. Instead it treats AML deficiencies as a consumer compliance matter, even though AML laws and consumer protection laws have virtually nothing in common. One consequence of this approach is that the OCC considers AML problems when assigning a bank's consumer compliance rating, but not when assigning the bank's management rating or its overall composite rating. As a result, AML deficiencies do not routinely lower the ratings that national banks receive as part of their safety and soundness evaluations, and so do not increase the deposit insurance that banks pay for incurring heightened risk, contrary to how AML problems are handled at other federal banking agencies. At HBUS, after citing the bank for severe AML deficiencies, the OCC lowered its consumer compliance rating but not its management rating. A second problem is that the OCC has adopted a practice of foregoing the citation of a statutory or regulatory violation in its Supervisory Letters and annual Reports of Examination when a bank fails to comply with one of the four mandatory components of an AML program. The four minimum statutory requirements of an AML program are AML internal controls, an AML compliance officer, AML training, and independent testing of the effectiveness of its AML program. By consistently treating a failure to meet one or even several of these statutory requirements as a "Matter Requiring Attention" instead of a legal violation, the OCC diminishes the importance of meeting each requirement, sends a more muted message about the need for corrective action, and makes enforcement actions more difficult to pursue if an AML deficiency persists. In contrast, citing a violation of law when one critical component of a bank's AML program is inadequate sends a strong message to bank management that its AML program is deficient, does not meet minimum statutory requirements, and requires remediation to ensure compliance with the law. At HBUS, the OCC identified 83 Matters Requiring Attention over five years, without once citing a legal violation of federal AML law. It was only when the OCC found HBUS' entire AML program to be deficient that the OCC finally cited the bank for a legal violation. Additional problems illustrated by the HBUS case history include the OCC's practice of conducting narrowly focused AML examinations of specific banking units without also assessing HBUS' overall AML program; the OCC's reluctance, despite mounting AML deficiencies, to make timely use of formal and informal enforcement actions to compel improvements in HBUS' AML program; and the practice by some OCC examiners to issue Supervisory Letters that sometimes muted AML examination criticisms or weakened recommendations for AML reforms at HBUS. While the OCC insists that its AML approach has merit, the HSBC case history, like the Riggs Bank case history examined by this Subcommittee eight years ago,⁹ provides evidence that the current OCC system has tolerated severe AML deficiencies for years, permitted national banks to delay or avoid correcting identified problems, and allowed smaller AML issues to accumulate into a massive problem before OCC enforcement action was taken. An experienced OCC AML examiner told the Subcommittee: "I thought I saw it all with Riggs but HSBC was the worst situation I'd ever seen," yet during the six-year period from 2004 to 2010, OCC officials did not take any formal or informal enforcement action to compel HBUS to strengthen its AML program, essentially allowing its AML problems to fester. In 2009, after learning of two law enforcement investigations involving AML issues at the bank, the OCC suddenly expanded and intensified an ongoing AML examination and allowed it to consider a wide range of AML issues. The OCC examination culminated in the issuance, in September 2010, of a blistering supervisory letter listing numerous, serious AML problems at the bank. In October 2010, the OCC also issued a Cease and Desist Order requiring HBUS to revamp its AML controls. In response, HBUS has announced a number of key organizational and policy initiatives to improve its AML program in the United States and globally. While those initiatives are promising, HBUS announced similarly promising AML reforms in 2003, when confronted with an AML enforcement action by the Federal Reserve Bank of New York and New York State Banking Department. Even before the OCC lifted that order in 2006, HBUS' AML program deteriorated. Both HBUS and the OCC will have to undertake a sustained effort to ensure the newest round of changes produce a better AML outcome. HSBC is the quintessential global bank, operating hundreds of affiliates in 80 countries, with its U.S. affiliate acting as the gateway into the U.S. financial system for the entire network. ⁹ See "Money Laundering and Foreign Corruption: Enforcement and Effectiveness of the Patriot Act," U.S. Senate Permanent Subcommittee on Investigations, S.Hrg. 108-633 (July 15, 2004). ¹⁰ The OCC allowed AML problems at HBUS to build up until they represented major AML vulnerabilities for the United States. Going forward, HBUS needs far stronger controls to ensure it

doesn't leave AML risks to the U.S. financial system unattended; the OCC needs a much better approach to resolve AML problems in a more effective and timely manner.

The Federal Reserve Act of 1913

The Federal Reserve Act (ch. 6, 38 Stat. 251, enacted December 23, 1913, 12 U.S.C. ch.3) is an Act of Congress that created and set up the Federal Reserve System, the central banking system of the United States of America, and granted it the legal authority to issue Federal Reserve Notes (now commonly known as the U.S. Dollar) and Federal Reserve Bank Notes as legal tender. The Act was signed into law by President Woodrow Wilson. For nearly eighty years, the U.S. was without a central bank after the charter for the Second Bank of the United States was allowed to expire. After various financial panics, particularly a severe one in 1907, some Americans became persuaded that the country needed some sort of banking and currency reform that would, 1] when threatened by financial panics, provide a ready reserve of liquid assets, and furthermore allow for currency and credit to expand and contract seasonally within the U.S. economy. Some of this was chronicled in the reports of the National Monetary Commission (1909–1912), which was created by the Aldrich–Vreeland Act in 1908. Included in a report of the Commission, submitted to Congress on January 9, 1912, were recommendations and draft legislation with 59 sections, for proposed changes in U.S. banking and currency laws. 2] The proposed legislation was known as the Aldrich Plan, named after the chairman of the Commission, Republican Senator Nelson W. Aldrich of Rhode Island. The Plan called for the establishment of a National Reserve Association with 15 regional district branches and 46 geographically dispersed directors primarily from the banking profession. The Reserve Association would make emergency loans to member banks, print money, and act as the fiscal agent for the U.S. government. State and nationally chartered banks would have the option of subscribing to specified stock in their local association branch. 2] It is generally believed that the outline of the Plan had been formulated in a secret meeting on Jekyll Island in November 1910, which Aldrich and other well connected financiers attended. 3] Since the Aldrich Plan essentially gave full control of this system to private bankers, there was strong opposition to it from rural and western states because of fears that it would become a tool of certain rich and powerful financiers in New York City, referred to as the "Money Trust". 4] Indeed, from May 1912 through January 1913 the Pujo Committee, a subcommittee of the House Committee on Banking and Currency, held investigative hearings on the alleged Money Trust and its interlocking directorates. These hearings were chaired by Rep. Arsene Pujo, a Democratic representative from Louisiana. 5] In the election of 1912, the Democratic Party won control of the White House and both chambers of Congress. The party's platform stated strong opposition "to the so called Aldrich bill for the establishment of a central bank." However, the platform also called for a systematic revision of banking laws in ways that would provide relief from financial panics, unemployment and business depression, and would protect the public from the "domination by what is known as the Money Trust." 6] edit]Legislative history

The banking and currency reform plan advocated by President Wilson in 1913 was sponsored by the chairmen of the House and Senate Banking and Currency committees, Representative Carter Glass, a Democrat of Virginia and Senator Robert Latham Owen, a Democrat of Oklahoma. According to the House committee report accompanying the Currency bill (H.R. 7837) or the Glass-Owen bill, as it was often called during the time, the legislation was drafted from ideas taken from various proposals, including the Aldrich bill. 6] However, unlike the Aldrich plan, which gave controlling interest to private bankers with only a small public presence, the new plan gave an important role to a public entity, the Federal Reserve Board, while establishing a substantial measure of autonomy for the (regional) Reserve Banks which, at that time, were allowed to set their own discount rates. Also, instead of the proposed currency being an obligation of the private banks, the new Federal Reserve note was to be an obligation of the U.S. Treasury. In addition, unlike the Aldrich plan, membership by nationally chartered banks was mandatory, not optional. The changes were significant enough that the earlier opposition to the proposed reserve system from Progressive Democrats was largely assuaged; instead, opposition to the bill came largely from the more business-friendly Republicans instead of from the Democrats. 1] After months of hearings, debates, votes and amendments, the proposed legislation, with 30 sections, was enacted as the Federal Reserve Act. The House, on December 22, 1913, 7] agreed to the conference report on the Federal Reserve Act bill by a vote of 298 yeas to 60 nays, with 76 not voting. The Senate, on December 23, 1913, agreed to it by a vote of 43 yeas to 25 nays with 27 not voting. The record shows that there were no Democrats voting "nay" in the Senate and only two in the House. The record also shows that almost all of those not voting for the bill had previously declared their intentions and were paired with members of opposite intentions. 8] edit]The Act

The plan adopted in the original Federal Reserve Act called for the creation of a System that contained both private and public entities. There were to be at least eight, and no more than 12, private regional Federal reserve banks (12 were established) each with its own branches, board of directors and district boundaries 9] and the System was to be headed by a seven member Federal Reserve Board made up of public officials appointed by the President and confirmed by the Senate (strengthened and renamed in 1935 as the Board of Governors of the Federal Reserve System with the Secretary of the Treasury and the Comptroller of the Currency dropped from the Board). 10] Also created as part of the Federal Reserve System was a 12 member

Federal Advisory Committee 11] and a single new United States currency, the Federal Reserve Note. 12] In the Federal Reserve Act, Congress provided that all nationally chartered banks were required to become members of the Federal Reserve System. The Act required these banks to purchase specified non-transferable stock in their regional Federal reserve banks, and to set aside a stipulated amount of non-interest bearing reserves with their respective reserve banks. (Since 1980, all depository institutions have been required to set aside reserves with the Federal Reserve. Such institutions are entitled to certain Federal Reserve services. 13]. State chartered banks were given the option of becoming members of the Federal Reserve System and in the case of the exercise of such option were to be subject to supervision, in part, by the Federal Reserve System. 14] Member banks became entitled to have access to discounted loans at the discount window in their respective reserve banks, to a 6% annual dividend in their Federal Reserve stock, and to other services. 15] Section 15 of the Act also permitted Federal Reserve banks to act as fiscal agents for the United States government. 16] Section 25 allowed banks to establish foreign branches. Citibank became the first to do so with a branch in Buenos Aires. 17] edit]Subsequent amendments

In the 1930s the Federal Reserve Act was amended to create the Federal Open Market Committee (FOMC), consisting of the seven members of the Board of Governors of the Federal Reserve System and five representatives from the Federal reserve banks (Section 12B). The FOMC is required to meet at least four times a year (the practice is usually eight times) and is empowered to direct all open-market operations of the Federal reserve banks. During the 1970s, the Federal Reserve Act was amended to require the Board and the FOMC "to promote effectively the goals of maximum employment, stable prices, and moderate long-term interest rates." 18] Also in that decade, the Act was amended so that the member governor proposed by the President to be Chairman would have a four year term as Chairman and would be subject to confirmation by the Senate (member governors per se each have 14 year terms, with a specific term ending every two years) (Section 10). The Chairman was also required to appear before Congress at semi-annual hearings to report on the conduct of monetary policy, on economic development, and on the prospects for the future. 19] The Federal Reserve Act has been amended by some 200 subsequent laws of Congress. citation needed] It continues to be one of the principal banking laws of the United States. edit]Criticism

Main article: Criticism of the Federal Reserve Controversy about the Federal Reserve Act and the establishment of the Federal Reserve System has existed since prior to its passage. Some of the questions raised include: whether Congress has the Constitutional power to delegate its power to coin money or issue paper money, whether the Federal Reserve is a public cartel of private banks (also called a banking cartel) established to protect powerful financial interests, and whether the Federal Reserve's actions increased the severity of the Great Depression in the 1930s (and/or the severity or frequency of other boom-bust economic cycles, such as the late-2000s recession). Allegations that the Act was passed while most of Congress was away for Christmas on December 23 are not supported by the legislative history: The house passed the bill 298-60 with 76 not voting, while the Senate passed it 43-25 with 27 not voting, 20] showing 70%-80% participation before accounting for announced pairs.

[SpitFireList](#) Gold Warriors Golden Lily Treasure

Introduction: Highlighting their consummately important book Gold Warriors; the program proudly presents Sterling and Peggy Seagrave.

Pursuing the subject of the fabulous amount of wealth stolen by the Japanese during World War II under Golden Lily (the formal name of the Japanese looting program), this broadcast supplements discussion presented in FTR#’s 428, 446, 451, 501, 509. Having secreted over \$100-billion (in 1940’s dollars) worth of precious metals and gems in the Philippines alone, the Japanese postwar economic largess was founded largely on the plunder garnered from their rape of Asia.

The program and the interview begin with the story of one of the more important postwar US intelligence operatives—former OSS and CIA agent Severino Diaz Garcia Santa Romana-nicknamed “Santy.” The discoverer of much of the gold hidden in the Philippines by Prince Chichibu and General Yamashita under “Golden Lily”, Santa Romana worked with General Edward Lansdale to secret the gold into foreign bank accounts. There, it was subsequently utilized for a number of purposes, in particular the financing of postwar US intelligence operations. As the Seagraves explain, a pivotal event in the recovery of the Philippines Golden Lily caches was the torture of General Yamashita’s driver, who eventually yielded the whereabouts of the repositories.

Among other uses, the recovered gold was used to finance covert operations and purchase political allegiance during the Cold War. In addition to being used to resurrect the very militarists, fascists and oligarchs that had prosecuted Japan’s war of aggression, the monies were combined with treasure recovered from the Nazis to create an enormous slush fund called the Black Eagle trust. This huge repository of clandestine wealth was used to stabilize the postwar financial system, finance covert operations, and purchase influence among America’s Cold War allies. Conceived of, and realized, by some

of the most powerful American political and financial power brokers, the Black Eagle trust ultimately became a source of enormous corruption, as it became a “Treasure of the Sierra Madre”, luring many individuals and institutions into temptation and, sometimes, death.

A frightening reminder of the insecurity surrounding the centers of great wealth can be found in the chilling stories of Norbert Schlei, W.R. “Cotton” Jones’, Santy’s heirs and Australian broker Peter Johnston who attempted to lawfully negotiate or verify financial instruments influenced by Golden Lily wealth. Terror and death can be the rewards for rectitude. Many of the institutions bailed out by the U.S. Taxpayer in the wake of the financial meltdown in 2008 have vast amounts of stolen gold hidden away from the prying eyes of regulators.

Program Highlights Include: The establishment and operation of the M-Fund—designed to establish and perpetuate the Japanese reactionaries who had engineered Japan’s war of aggression; the Yotsuya Fund—designed to finance the coercion, intimidation and murder of the political opposition in Japan; the Keenan Fund—set up to bribe witnesses in order to whitewash Japanese war criminals; Kodama Yoshio—Japanese admiral, gangster and the CIA’s main man in postwar Japan; the Showa Trust—set up to enrich Emperor Hirohito; the Marcos regime in the Philippines and its attempts at manipulating both the Japanese and American beneficiaries of the Golden Lily; the Reagan administration’s attempts at using Golden Lily loot in the Philippines in order to ease the US back on to the Gold Standard; the careers of Black Eagle trust architects Henry Stimson, John J. McCloy, Robert Lovett and Robert B. Anderson; review of the career and fascist ideology of General Charles Willoughby, MacArthur’s intelligence chief; Richard Nixon’s decision to turn one of the aggregates of Golden Lily over to Japanese war criminal (and later Prime Minister) Kishi Nobosuke. Nixon agreed to turn the M-Fund over to Kishi in exchange for kickbacks to Nixon’s 1960 presidential bid.
